Denis Summers-Smith

Searching For The Stork:

The Last Stork Summer Mary Brigid Surber, 2015-03-27 The Last Stork Summer is an account of Hitler's Germanization Program and how one Polish child Eva survives the designation of racially worthless. It gives readers an opportunity to look beyond the obvious terror and intimidation of a Nazi labor camp. Eva uses everything Hitler is trying to destroy: her memories, appreciation of God's creation, Poland's culture, her love of storks, and a protective friendship to survive being a Polish Catholic child at that moment in time.

Searching for the Stork Marion Lee Wasserman, 1989-08-01 *In Search of Truth* Lee Nelson, 2001 A bright future seemed assured for eighteen-year-old Clee Bixler. He'd attend Ole Miss, marry his high school sweetheart, and practice law in his hometown of Morristown, Mississippi. That was before the night of June 9, 1991, when the death of his errant father leaves the family penniless. While Clee and his mother work, his younger brother Bobby becomes a magnet for trouble. Bobby disappears the same night that bonds worth 200,000 are stolen. Clee fears the incidents are connected. Inadvertently, Clee brings suspicion upon himself with severe consequences. What happens during the long search for Bobby challenges Clee's faith, patience, and sense of fairness. It becomes a search for truth, justice, and the strength to forgive those who have wronged him. Memorable characters, some dangerous, provide situations rich with human emotion. Two beautiful women vie for his love. Each has had his heart. His task is to separate true love from fantasy.

FWS/OBS., 1982 *The Painted Stork* A. J. Urfi, 2011-07-15 The book will cover the entire range of the Painted Stork beyond its stronghold in India and Sri Lanka to other countries in E Asia as well. For the sake of comparison, relevant information will be included about the other species of storks, both solitary as well as colonial, of Asia as well as those in other parts of the world. Certainly, plenty of references will be made about the work done on the American

Wood Stork Studies are underway in order to better understand the role of the monsoon rains on the nesting pattern of Painted Stork besides attempting a review of the global status of the species The former is likely to be of interest in augmenting our understanding about how global climate change is going to affect birds across India and the second is likely to raise interesting points about the distribution of species and their ranges Both these studies will be carried through 2009 and should hopefully be included in the proposed book Naturally the focused interest in field research on the Painted Stork has resulted in accumulation of considerable information on this particular species which is beyond the information contained on some standard Indian and international works and ornithological texts The author hopes to include the entire spread of information of this species from its systematics evolution distribution ecology to its role in human culture as well as its association with mythologies In other words topics have not been restricted to the areas of the author s research but have spilled over into areas of anthropology ecology conservation etc

The Search for the Perfect Language Umberto

Eco,1997-04-08 The idea that there once existed a language which perfectly and unambiguously expressed the essence of all possible things and concepts has occupied the minds of philosophers theologians mystics and others for at least two millennia This is an investigation into the history of that idea and of its profound influence on European thought culture and history From the early Dark Ages to the Renaissance it was widely believed that the language spoken in the Garden of Eden was just such a language and that all current languages were its decadent descendants from the catastrophe of the Fall and at Babel The recovery of that language would for theologians express the nature of divinity for cabbalists allow access to hidden knowledge and power and for philosophers reveal the nature of truth Versions of these ideas remained current in the Enlightenment and have recently received fresh impetus in attempts to create a natural language for artificial intelligence The story that Umberto Eco tells ranges widely from the writings of Augustine Dante Descartes and Rousseau arcane treatises on cabbalism and magic to the history of the study of language and its origins He demonstrates the intimate relation between language and identity and describes for example how and why the Irish English Germans and Swedes one of whom presented God talking in Swedish to Adam who replied in Danish while the serpent tempted Eve in French have variously claimed their language as closest to the original He also shows how the late eighteenth century discovery of a proto language Indo European for the Aryan peoples was perverted to support notions of racial superiority To this subtle exposition of a history of extraordinary complexity Umberto Eco links the associated history of the manner in which the sounds of language and concepts have been written and symbolized Lucidly and wittily written the book is in sum a tour de force of scholarly detection and cultural interpretation providing a series of original perspectives on two thousand years of European History The paperback edition of this book is not available through Blackwell outside of North America

In Search of Sparrows Denis Summers-Smith,2010-10-30 The humble House Sparrow common everywhere was surprisingly poorly researched and Summers Smith s work soon provided interesting insights into this successful and adaptable little bird Denis Summers Smith first took up the study of the House Sparrow in 1947 thinking that the difficulties of travel in post war Britain would best suit the study of a species always close at hand As new opportunities to travel opened up his interest blossomed to take in the genus *Passer* as a whole His travels would ultimately lead to his study of all but one group found only in the deepest Turkestan and to the publication of his authoritative monograph on sparrows in 1988 While that book presented his knowledge of sparrow biology this volume tells the other human side of the tale His wry descriptions of the tribulations and unexpected pleasures of a traveller on four continents from the Himalayas and Thailand to Africa and the Americas with a good few islands in between are interspersed with observations and speculations on the biology of sparrows in a wide variety of habitats Everywhere local officials and birdwatchers warmed to the eccentric Scot in pursuit of the little birds that nobody notices but which so often make their

homes beside us The author s own photographs and delightful cartoons by Euan Dunn further paint the picture of this lifelong search
