1866-1949 is that he was deeply involved in the American eugenics movement. He was among the US academics to support eugenics long before German Nazis embraced it. A titan in a host of disciplines and a proponent of radical education reform, Seashore used his positional power to promote a constellation of education reforms consistent with central precepts of eugenics. Many of these reforms, including tracking gifted and talented programs and high-stakes standardized testing, were adopted and remain standard practice in the United States today. He promulgated the idea that musical talent is biologically inheritable, and he developed the first standardized tests of musical talent; these tests were used by early twentieth-century researchers in their attempts to determine whether there are race differences in musical talent. Seashore's ideas and work profoundly shaped music education's research trajectory as well as enduring commonsense beliefs about musical ability.

An intersectional analysis, *Destined to Fail*, focuses on the relationship between eugenics and Seashore's views on ability, race, and gender. Koza concludes that Seashore promoted eugenics and its companion eugenics because he was a true believer. She also discusses the longstanding silences surrounding Seashore's participation in eugenics. As a diagnosis and critique of the present, *Destined to Fail* identifies resemblances and connections between past and present that illustrate the continuing influence of eugenics and the systems of reasoning that made early twentieth-century eugenics imaginable and seem reasonable on education discourse and practice today. It maps out discursive, citational, and funding connections between eugenicists of the early twentieth century and contemporary White supremacists; this mapping leads to some of Donald Trump's supporters and appointees.

*Fossils on the Seashore* Stephen K. Donovan, 2025-08-15 *Fossils on the Seashore* is an expert and accessible guide to exploring the palaeontological richness of Britain's coastal landscapes. While inland sites are increasingly off-limits, the UK's extensive coastline remains a specimen-rich wonderland of fossils, and fossiliferous rock shining a light on questions of palaeoecology, preservation, and trace fossils. A retired geologist and expert palaeontologist, Dr Stephen Donovan balances scholarly knowledge with practical guidance. Designed for easy reference in the field, each chapter is concise and self-contained, equipping readers with the knowledge to identify fossils, understand ancient ecosystems, and appreciate the processes behind fossilisation. *Fossils on the Seashore* brings the author's extensive field experience to life, unlocking the geological and palaeontological secrets of the past from Britain's remarkable coastal landscapes. It is an indispensable resource for both amateur enthusiasts and emerging palaeontologists.

*Musical Emotions Explained* Patrik N. Juslin, 2019-03-21 Can music really arouse emotions? If so, what emotions and how? Why do listeners respond with different emotions to the same piece of music? Are emotions to music different from other emotions? Why do we respond to fictional events in art as if they were real, even though we know they're not? What is it that makes a performance of music emotionally expressive? Based on ground-breaking research, *Musical Emotions Explained* explores how music expresses and arouses emotions and how it becomes an object of aesthetic judgments. Within the book, Juslin demonstrates how psychological mechanisms from our ancient past engage with meanings in music at multiple levels of the brain to evoke a broad variety of

Synge,2024-11-24 A BOOK OF DISCOVERY The History of the World s Exploration From the Earliest Times to the Finding of the South Pole A LITTLE OLD WORLD No story is complete unless it begins at the very beginning But where is the beginning Where is the dawn of geography the knowledge of our earth What was it like before the first explorers made their way into distant lands Every day that passes we are gaining fresh knowledge of the dim and silent past Every day men are patiently digging in the old heaps that were once the sites of busy cities and as a result of their unwearying toil they are revealing to us the life stories of those who dwelt therein they are disclosing secrets writ on weather worn stones and tablets bricks and cylinders never before even guessed at Thus we read the wondrous story of ancient days and breathlessly wonder what marvellous discovery will thrill us next For the earliest account of the old world a world made up apparently of a little land and a little water we turn to an old papyrus the oldest in existence which tells us in familiar words unsurpassed for their exquisite poetry and wondrous simplicity of that great dateless time so full of mystery and awe In the beginning God created

the heaven and the earth And the earth was waste and void and darkness was upon the face of the deep and the spirit of God moved upon the face of the waters And God said Let there be a firmament in the midst of the waters and let it divide the waters from the waters And God divided the waters which were under the firmament from the waters which were above the firmament And God said Let the waters under the heaven be gathered into one place and let the dry land appear And God called the dry land Earth and the gathering together of the waters called he Seas Thus beautifully did the children of men express their earliest idea of the world s distribution of land and water      *Human Interaction with the Environment in the Red Sea* Dionysius A.
