Mammalogy George A. Feldhamer,Joseph F. Merritt,Carey

Krajewski,Janet L. Rachlow,Kelley M. Stewart,2020-03-24 A completely revised and updated edition of the leading mammalogy textbook featuring color photographs throughout and a new streamlined structure for enhanced use in courses There are more than 6 400 species in the class Mammalia including the blue whale the largest animal that has ever lived and the pygmy shrew which weighs little more than a dime Such diversity among mammals has allowed them to play critical roles in every ecosystem whether marine freshwater alpine tundra forest or desert Reflecting the expertise and perspective of five leading mammalogists the fifth edition of *Mammalogy* Adaptation Diversity Ecology significantly updates taxonomy adds a new introductory chapter on the science of mammalogy and highlights several recently described species To enhance its appeal to students textual material has been reduced consolidated and streamlined without sacrificing breadth or depth of coverage The fifth edition includes for the first time stunning color photographs throughout chapters rearranged and grouped to best reflect phylogenetic relationships with updated numbers of genera and species for each family updated mammalian structural and functional adaptations as well as ordinal fossil histories recent advances in mammalian phylogeny biogeography social behavior and ecology with 12 new or revised cladograms reflecting current research findings new breakout boxes on novel or unique aspects of mammals new work on female post copulatory mate choice cooperative behaviors group defense and the role of the vomeronasal system discussions of the current implications of climate change and other anthropogenic factors for mammals Maintaining the accessible readable style for which Feldhamer and his coauthors are well known this new edition of *Mammalogy* is the authoritative textbook on this amazingly diverse class of vertebrates *Human Natures* Paul R. Ehrlich,2001-12-31 Why do we behave the way we do Biologist Paul Ehrlich suggests that although people share a common genetic code these genes do not shout commands at us at the very most they whisper suggestions He argues that human nature is not so much result of genetic coding rather it is heavily influenced by cultural conditioning and environmental factors With personal anecdotes a well written narrative and clear examples *Human Natures* is a major work of synthesis and scholarship as well as a valuable primer on genetics and evolution that makes complex scientific concepts accessible to lay readers **Bowker's Medical Books in Print** ,1975 **Ibexes in an African Environment** B. Nievergelt,2012-12-06 The Caprinae are characteristic ungulates of palaeartic mountain regions The Walia ibex *Capra ibex walie* a member of the Caprinae has colonized successfully the Simen mountains in Ethiopia and as such

presents an interesting act in the history of the Caprinae Apart from the question of how the Walia ibex or its ancestors ever reached the Simen mountains the only place it occurs I would like to stress a further point about half of the existing ungulate species in the world are endemic to Africa Eightyseven species of the Artiodactyla are reported to live in this continent while there are only 17 in South America Haltenorth 1963 Delany and Happold 1979 Such abundance of ungulate forms must have been attended by optimal utilization of the various habitats and form co adaptation of sympatric species Lamprey 1963 Bell 1970 Gentry 1970 Despite such intense competition however the Walia ibex found its natural niche still open Obviously its adaptations to living on steep cliffs have favoured its establishment over the already existing ungulate fauna in an afroalpine mountain area In fact none of the Cervids has achieved a similar successful colonisation on the African continent even though they are much older as a group and have already shown themselves to be well established on the American and Eurasian continents The Geographical Magazine Michael Huxley, 1975 Vols for 19 include a separate section called GM news and reviews
