Duemler,1993 This book attempts to provide an ethical foundation with which to address the question Should we spread life beyond Earth It examines the material conditions of the solar system the limits of consciousness the limits of society and the long term possibilities of sending human life out into the universe The author delineates the ethical criteria of sentient life and considers justifications of space travel for the purpose of human expansion Duemler gives special attention to the utilitarian explanation which concludes that if life did gnyad throughout the solar system or even the galaxy then this would serve to increase the amount of sentient life and if life in the
