Planning for the Unplanned Aseem Inam, 2013-11-26 How do cities plan for the unplanned Do cities plan for recovery from every possible sudden shock How does one prepare a plan for the recovery after a tragedy like the September 11 2001 terrorist attacks on New York The book discovers the systematic features that contribute to the success of planning institutions In cities filled with uncertainty and complexity planning institutions effectively tackle unexpected and sudden change by relying on the old and the familiar rather than the new and the innovative The author argues that planning programs institutions were successful because they were bureaucratic and relied on standardized routines rigorous sets of established regimes familiar programs and institutionalized hierarchies Also contrary to popular perception neither the leaders at the top of the institutions nor those workers at the grassroots level were the most important in the implementation of such routines The key actors were middle managers because they knew the institutional structures inside out what the routines were and how to use them and were successful go betweens between national governments and grassroots community groups Case studies from Mexico City Los Angeles and New York provide a deeper understanding of urban planning processes The case studies reveal that systematic institutional analysis helps us understand what works in planning and why They also demonstrate the manner in which institutional routines serve as powerful and effective tools for addressing novel situations

Behind the Label Edna Bonacich, Richard Appelbaum, 2000-06-28 In a study crucial to our understanding of American social inequality Edna Bonacich and Richard Appelbaum investigate the return of sweatshops to the apparel industry especially in Los Angeles The new sweatshops they say need to be understood in terms of the decline in the American welfare state and its strong unions and the rise in global

and flexible production Apparel manufacturers now have the incentive to move production to wherever low wage labor can be found while maintaining arm s length contractual relations that protect them from responsibility The flight of the industry has led to a huge rise in apparel imports to the United States and to a decline in employment Los Angeles however remains a puzzling exception in that its industry employment has continued to grow to the point where L A is the largest center of apparel production in the nation Not only the availability of low wage immigrant often undocumented workers but also the focus on moderately priced fashion sensitive women s wear makes this possible Behind the Label examines the players in the L A apparel industry including manufacturers retailers contractors and workers evaluating the maldistribution of wealth and power The authors explore government and union efforts to eradicate sweatshops while limiting the flight to Mexico and elsewhere and they conclude with a description of the growing antisweatshop movement Los Angeles Times Best Nonfiction Book of 2000

Street Level: Los Angeles in the Twenty-First Century Rob Sullivan, 2016-04-01 In the latter part of the C20th a series of seminal books were written which examined Los Angeles by the likes of Reyner Banham Mike Davis Edward Soja Allen Scott Michael Dear Frederick Jameson Umberto Eco Bernard Henri Levy and Jean Baudrillard which have been hugely influential in thinking about cities more broadly The debates which were generated by these works have tended to be very heated and either defensive or offensive in approach A sufficient amount of time has since passed that a more measured approach to evaluating this work can now be taken The first section of this book Contra This and Contra That provides such a critique of the various theories applied to Los Angeles during the last century balancing the positive with the negative The second part of the book is an investigation of L A as it exists on the ground today While political the theoretical stance taken in this investigation is not mounted as a platform from which to advocate a particular ideology Instead it encompasses cultural as well as economic issues to put forth a view of L A which is coherent and cogent while at the same time considering its multi layed complex and ever changing qualities It concludes by arguing that sectorised off and totalizing visions of the city will not do as instruments of urban analysis and that

only a theory as mobile as its target will do one that replicates the polymer nature of this place It proposes that extending that theory to the world beyond this particular city only a theory that models itself on the mobile and polymer nature of the world while still retaining a sense of the actual and the real will do as an instrument with which to comprehend the world In doing so this book is not only a model by which to think through Los Angeles but as a model by which to think through other world cities
