One Giant Leap Charles Fishman, 2020-09-22 The New York Times bestselling meticulously researched and absorbingly written The Washington Post story of the trailblazers and the ordinary Americans on the front lines of the epic Apollo 11 moon mission President John F Kennedy astonished the world on May 25 1961 when he announced to Congress that the United States should land a man on the Moon by 1970 No group was more surprised than the scientists and engineers at NASA who suddenly had less than a decade to invent space travel When Kennedy announced that goal no one knew how to navigate to the Moon No one knew how to build a rocket big enough to reach the Moon or how to build a computer small enough and powerful enough to fly a spaceship there No one knew what the surface of the Moon was like or what astronauts could eat as they flew there On the day of Kennedy s historic speech America had a total of fifteen minutes of spaceflight experience with just five of those minutes outside the atmosphere Russian dogs had more time in space than US astronauts Over the next decade more than 400 000 scientists engineers and factory workers would send twenty four astronauts to the Moon Each hour of space flight would require one million hours of work back on Earth to get America to the Moon on July 20 1969 A veteran space reporter with a vibrant touch nearly every sentence has a fact an insight a colorful quote or part of a piquant anecdote The Wall Street Journal and in One Giant Leap Fishman has written the sweeping definitive behind the scenes account of the furious race to complete one of mankind s greatest achievements It s a story filled with surprises from the item the astronauts almost forgot to take with them the American flag to the extraordinary impact Apollo would have back on Earth and on the way we live today From the research labs of MIT where the eccentric and legendary pioneer Charles Draper created the tools to fly the Apollo spaceships to the

factories where dozens of women sewed spacesuits parachutes and even computer hardware by hand Fishman captures the exceptional feats of these ordinary Americans It s been 50 years since Neil Armstrong took that one small step Fishman explains in dazzling form just how unbelievable it actually was Newsweek
