Magna Didactica:

New Worlds Reflected Chloë Houston, 2016-05-06 Utopias have long interested scholars of the intellectual and literary history of the early modern period. From the time of Thomas More's *Utopia* (1516), fictional utopias were indebted to contemporary travel narratives with which they shared interests in physical and metaphorical journeys, processes of exploration and discovery, encounters with new peoples, and exchange between cultures. Travel writers too turned to utopian discourses to describe the new worlds and societies they encountered. Both utopia and travel writing came to involve a process of reflection upon their authors' societies and cultures as well as representations of new and different worlds. As awareness of early modern encounters with new worlds moves beyond the Atlantic World to consider exploration and travel, piracy and cultural exchange throughout the globe, an assessment of the mutual indebtedness of these genres as well as an introduction to their development is needed. *New Worlds Reflected* provides a significant contribution both to the history of utopian literature and travel and to the wider cultural and intellectual history of the time, assembling original essays from scholars interested in representations of the globe and new and ideal worlds in the period from the sixteenth to eighteenth centuries and in the imaginative reciprocal responsiveness of utopian and travel writing. Together, these essays underline the mutual indebtedness of travel and utopia in the early modern period and highlight the rich variety of ways in which writers made use of the prospect of new and ideal worlds. *New Worlds Reflected* showcases new work in the fields of early modern utopian and global studies and will appeal to all scholars interested in such questions.

Environmental Education

Matthew Etherington, 2023-08-03 This book has a single motif and a dual purpose. Its motif is the portrayal of influential authors within an environmental framework and worldview. The design is presented in different ways in which environmental understandings might be understood. The purposes are to engender in the reader a broad knowledge of some of the ideas and problems inherent in a discussion of nature and the environment and to stimulate the reader to go further into the sources of their tradition and worldview in search of meaning and insights that are uniquely relevant to their philosophy.

Foundations Matthew Etherington, 2025-05-16 This book is for undergraduate and graduate students, teachers, school administrators, organizational leaders, theologians, researchers, and education practitioners. It uncovers topics exclusive to education in general, particularly Christian education, while highlighting the experiences and perspectives of individual scholars in various contexts. This tenth anniversary volume focuses on language, community, agency, and identity topics. Each chapter ends with discussion questions that offer the reader freedom of thought and expression and an opportunity to engage with others, preferably in smaller groups.

Hist West Educ: Modern West V3 James Bowen, 2013-10-08 Volume Three of three; this is a reprint of James Bowen's *A History of Western Education* originally published by Methuen in the 1970s. Volume Three: *The Modern West, Europe, and the New World*. The final volume covers the period of educational dissent which became conspicuous in the early seventeenth century and reached crisis proportions in the late twentieth when the dominant

ideologies of progress and equality generated at the beginning of the nineteenth century were questioned for the first time on a widespread popular scale

The Reformation of Common Learning Howard Hotson, 2020 This book discusses the intersection of the great military and intellectual disruptions of the mid seventeenth century It examines how the Thirty Years War scattered representatives of Ramism from central Europe into old and new institutions especially into the northwest the Dutch Republic and England

Ramus, Pedagogy and the Liberal Arts Emma Annette Wilson, 2016-04-08 Most early modern scholars know that Petrus Ramus 1515 1572 is important but may be rather vague as to where his importance lies This new collection of essays analyses the impact of the logician rhetorician and pedagogical innovator across a variety of countries and intellectual disciplines reappraising Ramus in the light of scholarly developments in the fifty years since the publication of Walter Ong's seminal work *Ramus Method and the Decay of Dialogue* Chapters reflect the broad impact of Ramus and the Ramist method of teaching across many subjects including logic and rhetoric pedagogy mathematics philosophy and new scientific and taxonomic developments in the sixteenth and seventeenth centuries There is no current work that offers such a broad survey of Ramus and Ramism or that looks at him in such an interdisciplinary fashion Ramus influence extended across many disciplines and this book skillfully weaves together studies in intellectual history pedagogy literature philosophy and the history of science It will prove a useful starting point for those interested in Ramus and his impact as well as serving to redefine the field of Ramist studies for future scholars

Fritz Jahr and the Emergence of European Bioethics Iva Rincic, Amir Muzur, 2019 The book presents the results of a long research into the life and work of the German theologian and teacher Fritz Jahr 1895 1953 from Halle an der Saale who was the first to use the term bioethics as early as 1926 It is a revised history of bioethics with an overview of all 22 of Jahr's known published papers The analysis follows the diffusion after 1997 of the discovery of Fritz Jahr worldwide and particularly the contribution of Croatian bioethicists to it
