

A study was started on the possible "low consumption" alternative design for the big dipoles of the PCL.

Key aspects:

- To provide a "low consumption" design solution
- RELIABILITY is a key word for these magnets: they will be placed in a dumping tunnel, area very radioactive and interventions must be MINIMIZED.
- The magnets could be subjected to high doses of radiation (new simulation on-going)
- Assumptions are the following:
  - The most simple (and economic) cryogenic solution seems to take advantage of the cryo coolants available at the IP (Detector Solenoid). They will be at 4.5 K (LHe to the solenoid) or at 40-60 K (thermal shields). Distance from the PCL magnets: 35-100m (depending by the PCL versions considered).
  - In these condition the cost of the cryogenic system will consist in the cryogenic transfer line and the valve box for the distribution to the magnets. Other solution are also considered.
  - For the magnet COILS, several possibility are evaluated:
    - "Classic SC" solution (i.e. NbTi)
    - HTS (High Temperature Superconductor) (i.e. MgB<sub>2</sub>, YBCO, etc.)

Each solution has advantages and disadvantages, trying to identify them to provide some first evaluations..

"Active" coil cross-section comparison for some different solutions.

Other aspect to be considered:

- Complexity/cost of the coil winding
- Complexity/cost of cryostats
- Operation
- Stability and radiation resistance

**Contemporary Perspective on Capital in Educational Contexts** RoSusan D. Bartee,2010-08-01 The edited volume Contemporary Perspectives on Capital in Educational Contexts is timely in its unique and appropriate analyses of the prevailing internal and external dynamics of capital as indicative of the type of currency within institutional structures or the currency among individual stakeholders of education The intersection of capital and currency emerges similarly and differently within the American compulsory based system of K 12 and the choice based system of higher education More specifically Contemporary Perspectives on Capital in Educational Contexts disentangles the broader challenges and opportunities of the institution of education and the individuals who comprise Emerging insights from the analyses provide an informed basis for ascertaining the rules of engagement and means of negotiation for the respective constituencies With that said this volume essentially responds to three important questions 1 What are the tenets of capital and currency in public schools and higher education 2 How do institutions and individuals navigate those tenets and 3 What general and specific implications do capital hold for the educational pipeline and beyond These questions provide a useful framework for engaging critical conversations about the dynamics of capital while offering perspectives about how to improve the quality of currency in K 12 or colleges and universities These questions further serve as a basis for eliciting more questions toward the consideration capital as both a conceptual construct and applicable model Contemporary Perspectives on Capital in Educational Contexts too is an expansion of the work of School matters Why African American students need multiple forms of capital where Bartee Brown 2006 examines how the acquisition and possession of capital equips African American students in a highperforming high achieving magnet school in Chicago for competitiveness in school generated and non school generated activities Success experienced by the students and the school become associated with the academic rigor and reputation while any shortcomings reflect an inadequate capacity of the school or the student to appropriately engage the other School matters Why African American students need multiple forms of capital 2006 further introduces an initial exploration of different forms of capital as producer improve the status quo through inputs consumer participant based upon outputs and regulator maintain the status quo through the process within the educational system The multifaceted role of capital demonstrates its span of influence for institutional and individual capacities

and educational outcomes as identified by policy makers and experts of OECD countries brought together at the Washington Conference Preparing Youth for the 21st Century      **Resources in Education** ,2001-04      **Learning from the Federal Market?Based Reforms** William J. Mathis,Tina M. Trujillo,2016-06-01 Over the past twenty years educational policy has been characterized by top down market focused policies combined with a push toward privatization and school choice The new Every Student Succeeds Act continues along this path though with decision making authority now shifted toward the states These market based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement But has this approach been successful Has learning improved Have historically low scoring schools turned around or have the reforms had little effect Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy This book presents the evidence Drawing on the work of the nation s most prominent researchers the book explores the major elements of these reforms as well as the social political and educational contexts in which they take place It examines the evidence supporting the most common school improvement strategies school choice reconstitutions or massive personnel changes and school closures From there it presents the research findings cutting across these strategies by addressing the evidence on test score trends teacher evaluation miracle schools the Common Core State Standards school choice the newly emerging school improvement industry and re segregation among others The weight of the evidence indisputably shows little success and no promise for these reforms Thus the authors counsel strongly against continuing these failed policies The book concludes with a review of more promising avenues for educational reform including the necessity of broader societal investments for combatting poverty and adverse social conditions While schools cannot single handedly overcome societal inequalities important work can take place within the public school system with evidence based interventions such as early childhood education detracking adequate funding and full service community schools all intended to renew our nation s commitment to democracy and equal educational opportunity      **Handbook of Field Experiments** Esther Duflo,Abhijit Banerjee,2017-03-21 Handbook of Field Experiments Volume Two explains how to conduct experimental research presents a catalog of research to date and describes which areas remain to be explored The new volume includes sections on field experiments in education in developing countries how to design social protection programs a section on how to combat poverty and updates on data relating to the impact and determinants of health levels in low income countries Separating itself from circumscribed debates of specialists this volume surpasses the many journal articles and narrowly defined books written by practitioners This ongoing series will be of particular interest to scholars working with experimental methods Users will find results from politics education and more Balances methodological insights with analyses of principal findings and suggestions for further research Appeals broadly to social scientists seeking to develop an expertise in field experiments Written in a language that is accessible to graduate students and non specialist economists      **Hope at Last for At-risk Youth** Robert D. **Exploring the School Choice Universe** Kevin G. Welner,Patricia H. Hinchey,William J. Mathis,Gary Miron,2013-02-01 Exploring the School Choice Universe Evidence and Recommendations gives readers a comprehensive complete picture of choice policies and issues In doing so it offers cross cutting insights that are obscured when one looks only at single issue or a single approach to choice The book examines choice in its various forms charter schools home schooling online schooling voucher plans that allow students to use taxpayer funds to attend private schools tuition tax credit plans that provide a public subsidy for private school tuition and magnet schools and other forms of public school intra and interdistrict choice It brings together some of the top researchers in the field presenting a comprehensive overview of the best current knowledge of these important policies The questions addressed in Exploring the School Choice Universe are of most importance to researchers and policy makers What do choice programs actually do What forms do they take Who participates and why What are the funding implications What are the results of different forms of school choice on outcomes that matter like student performance segregation and competition effects Do they affect teachers working conditions Do they drive innovation The contents of this book offer reason to believe that choice policies can further some educational goals But they also suggest many reasons for caution If choice policies are to be evidence based a re examination is in order The information insights and recommendations facilitate a more nuanced understanding of school choice and provide the basis for designing sensible school choice reforms that can pursue a range of desirable outcomes      **Teaching Speaking,**

Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness for example commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA sponsored Handbook. Organized into seven sections, the Handbook focuses on: 1. disciplinary foundations of educational policy, 2. methodological perspectives, 3. the policy process, 4. resources management and organization, 5. teaching and learning policy, 6. actors and institutions, and 7. education access and differentiation. Drawing from multiple disciplines, the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions, and methods will drive future policy research? Topics such as early childhood education, school choice, access to higher education, teacher accountability, and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are objectively analyzed by authors and commentators. Each of the seven sections concludes with two commentaries by leading scholars in the field. The first considers the current state of policy design and the second addresses the current state of policy research. This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research.
