*Clinical Low Field Strength Magnetic Resonance Imaging* Hans-Martin Klein, 2015-10-03 This book covers all aspects of low field MRI describing its advantages problems and prerequisites Individual chapters are devoted to site planning safety considerations coils imaging technique image quality optimization the imaging of different anatomic regions and likely future developments The factors that must be borne in mind when selecting a low field system are clearly identified and detailed attention is paid to the applications for which such a system is adequate The focus on high field systems has led to a situation where only a few systems with field strengths lower than 0.5 T survive Some of these systems possess high field features such as multichannel coils and strong gradients furthermore sequence technology and image processing techniques taken from higher field strength systems have resulted in impressive imaging capabilities While 1.5 T systems will probably continue to remain the standard low field systems offer advantages such as the feasibility of dynamic joint examinations improvement of T1 contrast reduction of magnetic effects and decreased radiofrequency exposure Low field strength MRI consequently has the potential to contribute to optimal patient management and given comparable image quality its application may become an issue of patient safety This book will be an invaluable asset to all who are involved in planning and or running a low field strength MRI facility

Peters, 2003-10-25 The 6th International Conference on Medical Imaging and Computer Assisted Intervention MICCAI 2003 was held in Montreal, Quebec, Canada at the Fairmont Queen Elizabeth Hotel during November 15-18, 2003 This was the first time the conference had been held in Canada The proposal to host MICCAI 2003 originated from discussions within the Ontario Consortium for Image Guided Therapy and Surgery a multi institutional research consortium that was supported by the Government of Ontario through the Ontario Ministry of Enterprise Opportunity and Innovation The objective of the conference was to offer clinicians and scientists a forum within which to exchange ideas in this exciting and rapidly growing field MICCAI 2003 encompassed the state of the art in computer assisted interventions medical robotics and medical image processing attracting experts from numerous multidisciplinary professions that included clinicians and surgeons computer scientists medical physicists and mechanical electrical and biomedical engineers The quality and quantity of submitted papers were most impressive For MICCAI 2003 we

received a record 499 full submissions and 100 short communications. All full submissions of 8 pages each were reviewed by up to 5 reviewers and the 2 page contributions were assessed by a small subcommittee of the Scientific Review Committee. All reviews were then considered by the MICCAI 2003 Program Committee resulting in the acceptance of 206 full papers and 25 short communications. The normal mode of presentation at MICCAI 2003 was as a poster; in addition, 49 papers were chosen for oral presentation.
