The Influence of Sea Power Upon History, 1660-1783 Alfred Thayer Mahan, 1890 **The Influence of Sea Power Upon History** Alfred T. Mahan, 2021-10-26 The Influence of Sea Power Upon History 1890 is a work of naval history and strategy by Alfred Thayer Mahan Drawing on decades of experience as a naval officer researcher and university lecturer Mahan develops his theory of sea power in the seventeenth and eighteenth centuries in this popular and important text Despite a lack of primary sources The Influence of Sea Power would prove essential to the expansion of European and American imperialism through the use of naval might and has been cited as one of the most influential works of the nineteenth century The history of Sea Power is largely though by no means solely a narrative of contests between nations of mutual rivalries of violence frequently culminating in war For Alfred Thayer Mahan there was no greater indicator of national might throughout history than control of the planet's oceans In this detailed study of the subject drawn from years of research and lectures given at the Naval War College in Rhode Island Mahan traces the influence of sea power on such conflicts as the English Revolution and the Seven Years War to argue that supremacy of the seas coincides with global commercial and political dominance throughout history Immediately successful The Influence of Sea Power Upon History would justify the expansion of imperialism as well as shape the naval arms race between Great Britain and Germany in the years preceding the First World War With a beautifully designed cover and professionally typeset manuscript this edition of Alfred Thayer Mahan's The Influence of Sea Power Upon History is a classic of naval strategic scholarship reimagined for modern readers

The Influence of Sea Power upon the French Revolution and Empire 1793-1812 (Complete) Alfred Thayer Mahan, 2020-09-28 When first asked to undertake that duty the question naturally arose how to impart to the subject of Naval History an aspect which in this very utilitarian age should not be open to the ready reproach of having merely archaological interest and possessing no practical value for men called upon to use the changed materials of modern naval war You won't have much to say about history was then the somewhat discouraging comment of a senior officer of his own service In pondering this matter it occurred to the author whose acquaintance with naval history was at that time wholly superficial that the part played by navies and by maritime power generally as a factor in the results of history and as shaping the destinies of nations and of the world had received little or no particular attention If this were so an

analysis of the course of events through a series of years directed to show the influence of Sea Power upon History would at least serve to imbue his hearers with an exalted sense of the mission of their calling and might also by throwing light upon the political bearings of naval force contribute to give the service and the country a more definite impression of the necessity to provide a fleet adequate to great undertakings lest if an occasion should arise for what he has ventured to call statesmanship directing arms we should be found unprepared through having no sufficient armed force to direct In avowing this as the original and for a time at least almost the sole motive of his work the author practically confesses that he at the beginning had no scientific appreciation or reasoned knowledge of the naval history of the past Upon giving this the attention required by his new duties and collating the various incidents with the teachings of recognized authorities upon land warfare he soon came to recognize that the principles which they claimed to be of general application in their own specialty received also ample and convincing illustration in naval annals although the development of the Art of War at sea has been slower and is now less advanced than on shore This backward result has been due partly to uncertainties peculiar to the sea and partly to a contempt for the study of the past and of its experience as not practical from which the naval profession has not yet wholly rid itself Thus in its course the author s former work without abandoning its first simple motive expanded into an attempt to analyze the strategic conduct of the naval campaigns as well as the tactical features of the various battles all too few in which any clear tactical purpose was shown by the commanders engaged The cordial reception given to the work by his professional brethren in Great Britain as well as at home has been to him not only most gratifying but wholly unexpected Its chief significance is however not personal The somewhat surprised satisfaction testified is virtually an admission that in the race for material and mechanical development sea officers as a class have allowed their attention to be unduly diverted from the systematic study of the Conduct of War which is their peculiar and main concern For if the commendation bestowed be at all deserved it is to be ascribed simply to the fact that the author has been led to give to the most important part of the profession an attention which it is in the power of any other officer to bestow but which too few actually do
