Little, 2023-11-03 Expertly navigating the interdisciplinary field of economic anthropology Peter D Little illustrates how an anthropological perspective can deepen understandings of customary and global markets different types of money diversified livelihoods of the poor gendered and racialized labor climate change and other global issues By questioning common dichotomies such as the informal versus formal sectors and customary versus modern institutions the book uncovers those hidden connections power relations and economic actors and processes that underpin real economies throughout the world **A Companion to the Anthropology of Africa** Roy Richard Grinker, Stephen C. Lubkemann, Christopher B. Steiner, Euclides Gonçalves, 2019-02-06 An essential collection of scholarly essays on the

anthropology of Africa offering a thorough introduction to the most important topics in this evolving and diverse field of study. The study of the cultures of Africa has been central to the methodological and theoretical development of anthropology as a discipline since the late 19th century. As the anthropology of Africa has emerged as a distinct field of study, anthropologists working in this tradition have strived to build a disciplinary conversation that recognizes the diversity and complexity of modern and ancient African cultures while acknowledging the effects of historical anthropology on the present and future of the field of study. *A Companion to the Anthropology of Africa* is a collection of insightful essays covering the key questions and subjects in the contemporary anthropology of Africa with a key focus on addressing the topics that define the contemporary discipline. Written and edited by a team of leading cultural anthropologists, it is an ideal introduction to the most important topics in the field, both those that have consistently been a part of the critical dialogue and those that have emerged as the central questions of the discipline's future. Beginning with essays on the enduring topics in the study of African cultures, *A Companion to the Anthropology of Africa* provides a foundation in the contemporary critical approach to subjects of longstanding interest. With these subjects as a groundwork, later essays address decolonization, the postcolonial experience, and questions of modern identity and definition, providing representation of the diverse thinking and scholarship in the modern anthropology of Africa.

Sure Road? Nationalisms in Angola, Guinea-Bissau and Mozambique Eric Morier-Genoud, 2012-04-19. This book brings together new research on the subject of nations and nationalisms in Angola, Guinea-Bissau, and Mozambique. It explores the history and politics of diverse nationalist discourses and ideologies and it revisits the formation and contemporary developments of national imagined communities in Portuguese-speaking Africa. It does so by drawing on several disciplines and by exploring themes as diverse as Frelimo's liberation literature, UNITA's moral economy, and the disaggregation of Guinea-Bissau. The authors provide novel insights in the hope of contributing to the academic and public debate on the subject, not least in those countries where, in the face of liberalisation, ruling parties and their opponents have been arguing intensively over and have sometimes struggled to reinvent a sense of national community. Through their engagement with the subject, authors also make a contribution to the general discussion of the concepts of nations and nationalism.

Beyond the Impasse Frans J. Schuurman, 1993. Development theory in the past decade has met with increasingly heavy criticism. Dependency theories as well as modes of production and world system approaches have come to be considered as internally inconsistent and inadequate for explaining the increasing diversity and unevenness of the Third World. This book confronts the theoretical impasse which many feel has been reached. Development scholars from various disciplines review recent changes in research priorities, procedures, and orientations and detect the emergence of new and diverse lines of theoretical development in the field. In particular, they deal with the important meta-theoretical, political, cultural, and ethical questions that have come to the fore.
