Stigum, 2015-12-29 As most econometricians will readily agree the data used in applied econometrics seldom provide accurate measurements for the pertinent theory s variables Here Bernt Stigum offers the first systematic and theoretically sound way of accounting for such inaccuracies He and a distinguished group of contributors bridge econometrics and the philosophy of economics two topics that seem worlds apart They ask How is a science of economics possible The answer is elusive Economic theory seems to be about abstract ideas or it might be said about toys in a toy community How can a researcher with such tools learn anything about the social reality in

which he or she lives This book shows that an econometrician with the proper understanding of economic theory and the right kind of questions can gain knowledge about characteristic features of the social world It addresses varied topics in both classical and Bayesian econometrics offering ample evidence that its answer to the fundamental question is sound The first book to comprehensively explore economic theory and econometrics simultaneously Econometrics and the Philosophy of Economics represents an authoritative account of contemporary economic methodology About a third of the chapters are authored or coauthored by Heather Anderson Erik Børn Christophe Bontemps Jeffrey A Dubin Harald E Goldstein Clive W J Granger David F Hendry Herman Ruge Jervell Dale W Jorgenson Hans Martin Krolzig Nils Lid Hjort Daniel L McFadden Grayham E Mizon Tore Schweder Geir Storvik and Herman K van Dijk

ScholarlyEditions.com      The Nation in Children's Literature Kit Kelen, Bjorn Sundmark, 2013-02-11 This book explores the meaning of nation or nationalism in children's literature and how it constructs and represents different national experiences. The contributors discuss diverse aspects of children's literature and film from interdisciplinary and multicultural approaches ranging from the short story and novel to science fiction and fantasy from a range of locations including Canada, Australia, Taiwan, Norway, America, Italy, Great Britain, Iceland, Africa, Japan, South Korea, India, Sweden, and Greece. The emergence of modern nation states can be seen as coinciding with the historical rise of children's literature while stateless or diasporic nations have frequently formulated their national consciousness and experience through children's literature both instructing children as future citizens and highlighting how ideas of childhood inform the discourses of nation and citizenship. Because nation and childhood are so intimately connected, it is crucial for critics and scholars to shed light on how children's literatures have constructed and represented historically different national experiences. At the same time, given the massive political and demographic changes in the world since the nineteenth century and the formation of nation states, it is also crucial to evaluate how the national has been challenged by changing national languages through globalization, international commerce, and the rise of English. This book discusses how the idea of childhood pervades the rhetoric of nation and citizenship and how children and childhood are represented across the globe through literature and film.

**Sport, Outdoor Life and the Nordic World** Nils Asle Bergsgård, Solfrid Bratland-Sanda, Richard Giulianotti, Jan Ove Tangen, 2020-05-21 Sport, Outdoor Life and the Nordic World explores the Nordic model of sport and outdoor life with respect to such issues as sport facilities, mountain guiding, women and ethnic minorities, urban planning, anti-doping, health, elite sport, coaching and leadership, and the globalization of sport. The aims of the volume are twofold. First, it advances knowledge of Nordic sport and outdoor life as important fields of social activity in their own rights. Second, it enhances the understanding of the Nordic model of society and the ways in which this is constructed, explored, and challenged within and through sport and outdoor life activities. In doing so, the contributors explore a range of

key themes notably how modern Nordic sport and outdoor life activities emerged and are organized through specific social policies how they may challenge or harbour forms of social exclusion particularly in regard to gender or minority populations how they are affected by and respond to deviant practices such as doping how they may contribute to alleviating social problems and how they confront major structural challenges and changes such as the impacts of globalization and the continuing dominance of neoliberal economic policies Interdisciplinary in approach *Sport Outdoor Life and the Nordic World* is essential reading for those studying Nordic sports and societies and will also appeal to students academics and wider readers with interests in sport studies sociology social policy cultural studies anthropology and public health The chapters were originally published as a special issue of *Sport in Society* [International Perspectives on Exclusionary Pressures in Education](#) Elizabeth J. Done, Helen Knowler, 2023-02-27 This book examines and problematises the concept of educational inclusion within schools Despite varying definitions of inclusion according to national context there is a growing consensus that educational systems presented as inclusive in policy and professional discourse in practice legitimise processes that appear far from inclusive The editors and contributors draw together research from multiple contexts that considers systemic exclusionary pressures and practices from multiple perspectives particularly less visible forms of social and educational exclusion The book calls for true inclusion as an overriding socio political and educational policy objective and to end the marginalisation of specific groups beyond familiar neoliberal political discourses of piecemeal remediation **Are there different types of child-directed speech?
