

MAKING SELECTIONS

7.5- How to Use the Magnetic Lasso Tool in Photoshop- (cont'd.):

object in the image as you trace its border, type a value between 1 and 100 into the "Frequency" field. A higher value increases the frequency with which the Magnetic Lasso Tool sets its fastening points at the edge of the image element as you trace its border.

To toggle using pen or stylus pressure to change the width setting of the Magnetic Lasso Tool if using a stylus tablet, click the "Use tablet pressure to change pen width" button in the Options bar Control panel to turn it on or off. If enabled, the button appears selected with square shading around it. If enabled, an increase to the pen pressure when using the Magnetic Lasso Tool decreases the edge width setting.

To use the Magnetic Lasso Tool in Photoshop after applying the desired tool settings, click and drag the pointer of the Magnetic Lasso Tool's mouse pointer icon around the border of the object in the image to select. Note that the selection line appears at the tip of the arrow icon for the Magnetic Lasso Tool. As you do this, the tool adds fastening point anchors where it finds the object's edges.

To delete the previously-added fastening point anchor, if needed, press the "Delete" key on your keyboard. Then back up and re-drag the line at the edge of the object. To manually set a fastening point anchor at any point as you are dragging, click the mouse. You may need to do this in crevasses and corners of the object's border in the image.

To finish the selection, trace your way back to the starting point. Then hover the Magnetic Lasso Tool's pointer icon over the origin point until a small circle appears next to the tool's pointer icon. Then click to close the selection. Alternatively, to close a selection before returning to the origin point anchor, which draws a straight line from that point back to the origin point, double-click at any point as you drag with the Magnetic Lasso Tool.
