Mastering Today's Software Edward G. Martin, Charles S. Parker, 1994-01 *Management Information Systems*
Patrick G. McKeown, Robert A. Leitch, 1993 *Database Management for Microcomputers* Jan L. Harrington, 1994 This book is primarily intended for use as a text in a database management course that approaches the subject as a business application. It can also be the basis for a short intensive relational database design seminar. Features: The first part of the text focuses on design of relational databases from how systems work to maximising relational design. Chapter 2 reviews the systems development cycle for students who have not recently studied systems analysis and design. The second portion of the text focuses on data manipulation including relational algebra, QBE, interactive SQL and database integrity. The final portion of the text presents the main issues of multiuser databases and data management. Examples in the book involve two case studies: Small Bank and Federated Taxi Company. Two additional case studies form the basis for end of chapter exercises. End of chapter discussion questions and exercises encourage students to view concepts in different contexts and give practice in assessing user needs, formulating good relational designs and creating effective queries. **Step-by-Step Lotus 1-2-3** Miguel Pendas, 1994 **Lotus 1-2-3 for Windows** Jeff Mock, 1996 Mastering Database Programming with Visual Basic 6 Evangelos Petroutsos, 2000-01-18 Evangelos Petroutsos is a computer engineer who gained much of his experience at the California Institute of Technology and MCI. **American Book Publishing Record**, 1992 Books in Print, 1991 Understanding Computers & Information Processing Charles S.
