Glick, Ellen M. Berman, John F. Clarkin, 2003-09-01 Marital and Family Therapy now in its Fourth Edition continues its tradition as a classic resource for psychiatrists and family therapists trainees and practitioners alike by combining psychiatric and integrative family models into a single framework The recent growth and changes in the field especially the movement away from narrowly based schools of therapy toward an integrative approach prompted the authors to expand and rewrite the text The authors have included the results of 20 years of successful field testing by trainees and have supplemented the text with well placed case vignettes and charts The authors have further renewed the appeal of this definitive text by 1 rewriting the discussion of how new attitudes and information about gender culture class and race are affecting family theory building 2 updating their text for compatibility with DSM IV TR and ICD 10 3 adding a section on treating Axis I disorders by combining family therapy with medication 4 adding a section on the new subspecialty of family systems medicine 5 offering the latest on family therapy effectiveness and training and 6 discussing afresh the ethical financial and professional issues facing therapists today With two new authors up to date references for the advanced therapist and suggested readings for both instructor and student this volume will spend little time on the shelf Psychiatrists family therapists social workers nurses family education teachers counselors family physicians and family law professionals will turn to this practical reference time and time again as they seek a better understanding of the evolving field of marital and family therapy     Family Systems Application to Social Work Karen Gail Lewis, 2015-07-24 Originally published in 1991 this title is a valuable social work text which demonstrated how to apply family system concepts to clinical situations encountered in work with inner city populations at the time Unlike traditional theories in clinical social work which were oriented toward the individual this fascinating book offers a paradigm for social work that encompasses the client his or her immediate and extended family the community the government and the social worker The family systems concepts in this refreshing volume are illustrated by case examples addressing the specific issues of AIDS and drug abuse homelessness foster care wife abuse care of those with intellectual disabilities and adoption issues Social workers and social work students can still gain perspective from these insightful chapters and will discover that it is not pathological people that make difficult populations but difficult life situations that breed pathology     *Adolescents and Their Families* Terry S Trepper, Mark Worden, 2014-02-25 This comprehensive book introduces and integrates adolescent developmental themes and family system theory into a coherent assessment and intervention model Author Mark Worden views the adolescent as active in shaping the family interactions as much as the family is influential in shaping the adolescent's behavior He takes a pragmatic approach to therapy emphasizing what best explains the clinical phenomena and what works best for change To this end a heavy

emphasis is placed on the process of evaluation and intervention of adolescents and their families with typical therapeutic dilemmas This practical book is organized to take the reader through the first evaluation interview through the planning of intervention strategies and through the beginning middle and termination phases of treatment Case examples bring Adolescents and Their Families to life highlighting conceptual discussions Topics discussed in this important book range from the integration of adolescent and family psychology to the employment of a contextual dialectic goodness of fit paradigm to evaluate adolescent family interface to matching the intervention with the family A step by step discussion of the first interview and diverse intervention strategies are discussed as are frequent clinical syndromes acting out underachievement eating disorders divorce single parenthood depression and suicide Graduate students and clinicians will find this appealing book an ideal resource as will experienced therapists beginning to work with adolescents and families The book will also serve as an excellent primary or ancillary text for graduate courses in psychotherapy with adolescents and in family therapy courses High school guidance counselors social workers and psychologists will also find many valuable applications in this timely book

Edelstein, Michel Hersen, M.E. Thase, 2013-06-29 During the past several decades the field of mental health care has expanded greatly This expansion has been based on greater recognition of the prevalence and treatability of mental disorders as well as the availability of a variety of forms of effective treatment Indeed throughout this period our field has witnessed the introduction and the wide spread application of specific pharmacological treatments as well as the development refinement and more broadly based availability of behavioral psychodynamic and marital and family interventions The community mental health center system has come into being and increasing numbers of mental health practitioners from the fields of psychiatry psychology social work nursing and related professional disciplines have entered clinical practice In concert with these developments powerful sociopolitical and socioeconomic forces including the deinstitutionalization movement of the late 1960s and early 1970s and the cost containment responses of the 1980s necessitated by the spiraling cost of health care have shaped the greatest area of growth in the direction of outpatient services This is particularly true of the initial assessment and treatment of nonpsychotic mental disorders which now can often be managed in ambulatory care

settings Thus we decided that a handbook focusing on the outpatient treatment of mental disorders would be both timely and useful When we first began outlining the contents of this book the third edition of the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders DSM III was in its fourth year of use     Family Art Psychotherapy Helen B Landgarten, 2013-06-17 An integrated guide to the entire range of clinical art therapy Its scope is immense covering every age range in a variety of settings from schools and outpatient clinics to psychiatric hospitals and private treatment Of special value are the extensive case studies and 148 illustrations     Treating Troubled Children and Their Families Ellen F. Wachtel, 2004-06-02 Integrating systemic psychodynamic and cognitive behavioral perspectives this acclaimed book presents an innovative framework for therapeutic work Ellen Wachtel shows how parents and children all too often get entangled in patterns that cause grief to both generations and demonstrates how to help bring about change with a combination of family focused and child focused interventions Vivid case examples illustrate creative ways to engage young children in family sessions and conduct complementary sessions with children and parents alone using a variety of strengths based developmentally informed strategies The paperback edition features a new preface in which the author reflects on the continuing evolution of her approach     Intimate Partner and Family Abuse John Hamel, LCSW, 2008-06-16 The collected case examples are noteworthy in their diversity of presenting issue treatment format and outcome As a whole they underline our continued need to conduct assessments with clients prior to initiating treatment to direct treatment toward identified client related problems in essence meeting clients where they are and to collect data that speaks to the effectiveness of our interventions in many settings and with many types of clients Jennifer Langhinrichsen Rohling PhD Professor of Psychology University of South Alabama Shows how to successfully conduct family interventions using case studies Includes male perpetrated female perpetrated and mutual violence scenarios Presents a variety of theoretical orientations Includes discussion questions after each case study This casebook showcases a wide variety of couples and families whose domestic violence cases vary in their composition ethnic and socioeconomic status and mental health issues The case authors outline different therapeutic approaches for each case including cognitive behavioral family systems feminist problem solving and many others Each account includes a thorough description of the assessment procedure treatment goals and reasons for selecting a particular approach and an account of the course of treatment The book is primarily intended for mental health professionals and graduate students in the fields of family therapy counseling and family violence but will also be of value to anyone in the field of family violence and those concerned with domestic violence public policy prevention and intervention
