Nimzowitsch Defense Short games in chess have always fascinated me what is it that is causing a player to go so wrong that he or she loses within 15 moves or 25 moves as in my Chess Miniatures Series The games in this book illustrate the making of and punishment of a lot of typical mistakes Loose pawns pieces Not calculating far enough Over burdened pieces Overlooked intermediary moves Miscalculations Not sensing danger And much more of that kind But the names also include a surprising amount of tactics see the front cover White to move sometimes even missed tactical opportunities I have chosen only from games of players that were rated 2350 and above or would have rated as such but it was before the rating system was put in place because I felt that if mistakes like these can be played by such strong players then there are lessons to be learned for the majority of the rest of us Further I sorted away the worst games such as when one side a piece is threatened and the other side forgets to move a threatened piece even that happens among strong players Through the study of the games in this book should help you avoid a lot of mistakes in your own games help you to take advantage of the mistakes of your opponents and ultimately sharpen your tactics and tactical awareness by answering the prompts to the diagrammed positions Enjoy
