Approaches to Drawing in Architectural and Urban Design Fabio Colonnese, Nuno Grancho, Robin Schaeffer, 2024-04-04 Architects draw for a variety of purposes they draw to assimilate places and precedents to generate ideas to develop a concept into a consistent project in a team to communicate ideas and solutions to patrons and clients and to guide building contractors during the construction stages as well as to produce further elaborations in order to publish their project in a treatise a journal or their own portfolio Most importantly architects draw to think and to manage complexity in a visual way By taking into account innovative and interdisciplinary uses of architectural drawing in the design process both historical and current the collection of chapters and interviews in this book frames a new critical perspective

and a uniquely contextual appreciation of drawing as a way to encourage spatial thinking and practice in architecture and urbanism The authors take the discussion to a new level of philosophical sophistication while also considering drawing in relation to a series of specific engagements with urban development planning and architecture **Drawing on**

The Place of the Viewer Kerr Houston, 2019-05-07 In recent decades art historians and critics have occasionally emphasized a dynamic embodied mode of looking accenting the role of the viewer and the complex interplay between beholders and works of art In The Place of the Viewer Kerr Houston shows that an attention to the position and physical experiences of beholders has in fact long informed art historical analyses and that close study of the theme can lead to a fuller understanding of the discipline the act of viewership and individual works of art Simultaneously attentive to historical ideas and contemporary scholarship this book identifies a vein of thought that has been generally overlooked and proposes new ways of seeing familiar works and traditions
