Masterpieces of the J. Paul Getty Museum: Drawings Nicholas Turner, Lee Hendrix, 1997-09-25 The collection of European drawings in the J. Paul Getty Museum built up over a decade and a half has increased steadily in both breadth and depth. While the holdings of drawings from the Italian Renaissance are particularly strong including for instance a double-sided sheet by Leonardo da Vinci, other schools the French in particular are also well represented. The collection's emphasis is on major draftsmen such as David, Dürer, Gainsborough, Goya, Ingres, Piranesi, Poussin, Raphael, Rembrandt, Rubens, Tintoretto, Titian, Veronese, and Watteau, while the occasional acquisition of groups of drawings has added strength in certain areas such as the German and Swiss Renaissance. Organized by national school with artists represented chronologically within each, this volume focuses on the most important drawings in the collection which admirably illustrate the development of European drawing from the Renaissance onward.

Caspar David Friedrich: The Soul of Nature Alison Hokanson, Joanna Sheers Seidenstein, 2025-02-03 Caspar David Friedrich (1774-1840) reimagined European landscape painting by portraying nature as a setting for profound spiritual and emotional encounters. Working in the vanguard of the German Romantic movement which championed a radical new understanding of the bond between nature and the inner self, Friedrich developed pictorial subjects and strategies that emphasize the individuality, intimacy, open-endedness, and complexity of our responses to the natural world. The vision of the landscape that unfolds in his art—meditative, mysterious, and full of wonder—is still vital today. Presented in honor of the 250th anniversary of Friedrich's birth in 2024, *Caspar David Friedrich: The Soul of Nature* is the

first comprehensive exhibition dedicated to the artist held in the United States Organized in cooperation with the Alte Nationalgalerie of the Staatliche Museen zu Berlin Staatliche Kunstsammlungen Dresden and Hamburger Kunsthalle with unprecedented loans from more than 30 lenders in Europe and North America the exhibition will present approximately 75 works by Friedrich Oil paintings finished drawings and working sketches from every phase of the artist's career along with select examples by his contemporaries will illuminate how Friedrich developed a symbolic vocabulary of landscape motifs to convey the personal and existential meanings that he discovered in nature The exhibition will situate Friedrich's art within the tumultuous politics and vibrant culture of 19th century German society and by extension highlight the role of German Romanticism in shaping modern perceptions of the natural world

The Archaeology of Martin's Hundred Ivor Noël Hume, Audrey Noël Hume, 2001 The Archaeology of Martin's Hundred explores the history and artifacts of a 20,000 acre tract of land in Tidewater Virginia one of the most extensive English enterprises in the New World Settled in 1618 all signs of its early occupation soon disappeared leaving no trace above ground More than three centuries later archaeological explorations uncovered tantalizing evidence of the people who had lived, worked and died there in the seventeenth century Part I Interpretive Studies addresses four critical questions each with complex and sometimes unsatisfactory answers Who was Martin? What was a hundred? When did it begin and end? Where was it located? We then see how scientific detective work resulted in a reconstruction of what daily life must have been like in the strange and dangerous new land of colonial Virginia The authors use first person accounts, documents of all sorts and the treasure trove of artifacts carefully unearthed from the soil of Martin's Hundred Part II Artifact Catalog illustrates and describes the principal artifacts in 110 figures The objects divided by category and by site range from ceramics which were the most readily and reliably datable to glass of which there was little to metalwork in all its varied aspects from arms and armor to rail splitters, wedges and finally to tobacco pipes The Archaeology of Martin's Hundred is a fascinating account of the ways archaeological fieldwork, laboratory examination and analysis based on lifelong study of documentary and artifact research came together to increase our knowledge of early colonial history Copublished with the Colonial Williamsburg Foundation
