Masters Of Equitation On The Canter:

Masters of Equitation on Canter ,2001 **Masters of Equitation on Counter-Canter and Flying Changes** ,2002

Edited by Martin Diggle this is the third book in his series Diggle has perused the literature of equitation from Xenophon to the present day and collected together the views of leading authorities on the counter canter and flying changes The compiled text and illustrations form a unique academic reference work and practical training aid for the serious student of riding Contains biographies of the masters represented **Masters of Equitation on Trot** ,2001 This book explores the enormous value of the trot in schooling and suppling the horse and explains how the natural trot of a recently backed horse is developed into the working gait which will later form the basis for collection and extension Trot is the gait at which much of a horse s general schooling is carried out It is most suited to this purpose since it is more impulsive than walk and less complex than canter As a consequence of its diagonal nature all four legs perform an equal amount of work and the back muscles flex and extend alternately on each side of the spine producing an overall suppling effect If the trot is to fulfil its role as the training gait it must be of good quality and should improve and develop as training progresses Of course this improvement and development may go far beyond the bounds of the working trot to spectacular extensions and the ultimate levels of collection as seen in piaffe and passage however in this treatise the emphasis is fundamentally upon the development of the working trot and its role as the foundation of training Masters of Equitation on Trot is essential reading for all riders who wish to lay the correct foundations for their horses schooling and will fascinate all readers interested in equestrian history
