Masters Of Illusion The World Bank And The Poverty Of Nations:

Masters of Illusion Catherine Caufield, 1998 This is a history of the World Bank which was set up in 1945 with the pledge to narrow the gap between the First and Third Worlds but which has done nothing of the sort The author argues that the Bank's bureaucrats insulated from public scrutiny are guilty of overlooking the human equation **The World and a Very Small Place in Africa** Donald R. Wright, 2015-05-18 Niumi a small little known territory located on the bank of the Gambia River in West Africa is seemingly far from the reaches of world historical events And yet the outside world has long had a significant and increasingly profound impact on Niumi This fascinating work shows how global events have affected people's lives over the past eight centuries in this small region in Africa's smallest country Drawing on written and oral testimony and writing in a clear and personal style Donald R Wright connects globalization with real people in a real place This new edition updates discussions of global history and African history based on current studies and new developments that have been factored into the interpretive framework Reflecting on recent visits to Niumi Wright extends the story into 2009 to consider the impact of global recession and domestic political repression under a regime in power for the past fifteen years Punctuating the narrative are photographs maps and Perspectives boxes on selected topics such as the sale of slaves five centuries ago colonial sexism the fate of press freedom and how popular culture affects growing up in a traditional society Throughout the author deals with African history seriously global trends critically and human lives sensitively

Human Rights Obligations of the World Bank and the IMF Sigrun Skogly, 2012-11-12 This book explores the human rights obligations of two of the largest international financial institutions namely the World Bank and the International Monetary Fund Based on international legal methodology this book addresses these two institutions in public international law and assesses the extent to which international law provides foundations for obligations in the field of human rights This book analyses any possible obligations related to the effect of the two institutions own programmes and projects The core of this analysis is focused on the two institutions international legal personality and addresses their relationship to international law as legal subjects rather than as a collectivity of states with international legal personality Building on the traditional sources of international law such as customary international law general principles of international law and treaty law the book concludes that the two institutions are under an obligation to respect human rights in their operations This implies that they will break their obligations if they make the human rights situation worse as a result of their programmes or projects It also concludes that the World Bank and the IMF are not under obligations to promote or fulfil human rights but that they may legitimately do so if they can do it within their Articles of Agreement the treaties establishing the institutions The book also looks at the practical implications of the obligation to respect which involves both substantial and procedural obligations These obligations will even if limited in their scope imply that the two institutions need to include human rights checks in the planning implementation and evaluation stages of projects and programmes The final part of the book looks at redress

possibilities in situations where either of the two institutions may be in breach of their human rights obligations **Palaces of Hope** Ronald Niezen, Maria Sapignoli, 2017-01-26 This book assembles a range of work by researchers who have entered the social worlds of global organizations *Silent Revolution* Duncan Green, 2003-04 Silent Revolution includes new or amplified discussions of capital markets and the role they play in the increasing depth and frequency of financial crisis in Latin America National Security and Core Values in American History William O. Walker III, William O. Walker, 2009-04-06 Drawing upon themes from the nation's past William O Walker III presents a new interpretation of the history of American exceptionalism **Adjudicating Climate Change** William C. G. Burns, Hari M. Osofsky, 2009-07-27 Courts have emerged as a crucial battleground in efforts to regulate climate change Over the past several years tribunals at every level of government around the world have seen claims regarding greenhouse gas emissions and impacts These cases rely on diverse legal theories but all focus on government regulation of climate change or the actions of major corporate emitters This book explores climate actions in state and national courts as well as international tribunals in order to explain their regulatory significance It demonstrates the role that these cases play in broader debates over climate policy and argues that they serve as an important force in pressuring governments and emitters to address this crucial problem As law firms and public interest organizations increasingly develop climate practice areas the book serves as a crucial resource for practitioners policymakers and academics Public Health in Practice Andrew Watterson, 2017-04-29 This introductory text examines the public health practice of a range of professionals and includes case studies that span a variety of public health disciplines Key issues covered include the exploration of inter professional collaboration the implementation of current policies and the ways in which public health professionals address the root causes of ill health in areas such as poverty housing pollution unemployment and social exclusion **The Right to Development and International Economic Law** Isabella D Bunn, 2012-03-01 The United Nations is commemorating the 25th anniversary of the 1986 Declaration on the Right to Development which proclaimed the right to be an inalienable human right by virtue of which every human person and all peoples are entitled to participate in contribute to and enjoy economic social cultural and political development in which all human rights and fundamental freedoms can be realized The UN now aims to mainstream the right into its policies and operational activities and is reviewing prospects for an internationally binding legal instrument The evolution of the right to development however has been dominated by debates about its conceptual validity and practical ramifications It has been hailed as the cornerstone of the entire human rights system and criticized as a distracting ideological initiative Questions also persist about the role of the right in reforming the international economic order This book examines the legal and moral foundations of the right to development addressing the major issues It then considers the right to development in the global economy noting the challenges of globalization and identifying key principles such as differential treatment of developing countries participation and accountability It relates the right to broad objectives such as the Millennium Development Goals

the human rights based approach to development and environmental sustainability Implications for international economic law and policy in the areas of trade development finance and corporate responsibility are assessed The conclusion looks to the legal and ethical contributions and limitations of the right to development in this new context With an academic and professional background in international law human rights and moral theology the author brings a unique interdisciplinary focus to this timely project

Catching Up Vladislav Inozemtsev, 2017-07-12 Disparities between the economic development of nations have widened throughout the twentieth century and they show no sign of closing In the nineteenth century the economic potential of developed countries was three times that of the rest of the world Today the gap is twenty times greater and the trend is increasing In this provocative reexamination of theories of accelerated development or catching up Vladislav L Inozemtsev traces the evolution of thinking about how countries lagging behind can most swiftly move forward and assesses their prospects for success in this effort Inozemtsev reviews the experience of the Soviet Union as well as the recent experience of Japan China and Southeast Asia He finds that those countries that have moved forward most rapidly have successfully adapted new technology to old processes But even then they face daunting odds as they grapple with the need to change their population's ideas and behavior And in the 1990s their rates of development have noticeably declined Catching Up assesses prospects for successful application of theories of accelerated development in the global economy Inozemtsev's pessimistic conclusion is that rapid industrial progress is not achievable in the information society of the twenty first century Inozemtsev reaches this conclusion after reviewing theories of accelerated development thinking from the diverse viewpoints of the 1940s and 1950s to the more intensive ideological polarization of the 1960s Inozemtsev believes it will be impossible for non Western nations to catch up with the West because of their inability to generate or control information and knowledge

Globalisation and the Challenge to Criminology Francis Pakes, 2013-01-04 There is no doubt that globalisation has profound effects on crime justice and our feelings of security identity and belonging Many of these affect both the making of laws and the breaking of laws It has been argued however that criminology has been too provincial focusing as it often does on national laws and issues whilst others have said that globalisation is the stuff of international relations global finance and trade not of criminology This book disputes this by asserting that criminology has a firm place in this arena and globalisation offers the discipline a challenge that it should

relish Some of the field's top scholars from the UK the US Canada Australia and New Zealand consider these challenges and present cutting edge analysis and debate Topics covered include transnational organised crime international policing and a range of other issues involving global harm such as genocide the workings of international financial institutions the fate of international migrants and the impact of anti immigration sentiments in Europe A particular focus is on borders and arrangements that deal with migration and populations that are excluded and adrift This book highlights criminology's analysis and engagement in new understandings of globalisation in particular its harmful and unethical manifestations and offers a mode of scrutiny and vigilance Globalisation and the Challenge to Criminology will be of particular interest to those studying criminology criminal justice policing security and international relations as well as those who seek to understand globalisation and in particular its harmful outcomes **Encyclopedia of Government and Politics** M. E.

Hawkesworth, Maurice Kogan, 2004 This is a brand new edition of the critically acclaimed Encyclopedia of Government and Politics which has been fully revised and updated to provide a systematic account of politics and political studies at the beginning of the new millennium Providing a penetrating analysis of government and politics at a global regional and nation state level the Encyclopedia assesses both traditional and contemporary approaches and projects the paths of future research The articles provide a degree of critical analysis far beyond a simple descriptive outline of the subject Internationally respected contributors have been carefully selected to present contending approaches to related topics both to clarify the political implications of the various methodologies and to enrich the portrayal of political life With its expanded revised and updated coverage Encyclopedia of Government and Politics is more than ever an indispensable tool for students teachers professional analysts and policy makers **Crossroads, Directions and A New Critical Race Theory** Francisco

Valdes, Angela Harris, Jerome McCristal Culp, 2011-02-07 Its opponents call it part of the lunatic fringe a justification for black separateness the most embarrassing trend in American publishing It is Critical Race Theory But what is Critical Race Theory How did it develop Where does it stand now Where should it go in the future In this volume thirty one CRT scholars present their views on the ideas and methods of CRT its role in academia and in the culture at large and its past present and future Critical race theorists assert that both the procedures and the substance of American law are structured to maintain white privilege The neutrality and objectivity of the law are not just unattainable ideals they are harmful actions that obscure the law's role in protecting white supremacy This notion so obvious to some so unthinkable to others has stimulated and divided legal thinking in this country and increasingly abroad The essays in Crossroads Directions and a New Critical Race Theory all original address this notion in a variety of helpful and exciting ways They use analysis personal experience historical narrative and many other techniques to explain the importance of looking critically at how race permeates our national consciousness **Historical Companion to Postcolonial Literatures in English** Prem Poddar, 2019-08-07 This is the first reference guide to the political cultural and economic histories that form the subject matter of postcolonial literatures

written in English The focus of the Companion is principally on the histories of postcolonial literatures in the Anglophone world Africa the Middle East South Asia South east Asia Australia and New Zealand the Pacific the Caribbean and Canada There are also long entries discussing the literatures and histories of those further areas that have also claimed the title postcolonial notably Britain East Asia Ireland Latin America and the United States The Companion contains 220 entries written by 150 acknowledged scholars of postcolonial history and literature covers major events ideas movements and figures in postcolonial histories long regional survey essays on historiography and women s histories Each entry provides a summary of the historical event or topic and bibliographies of postcolonial literary works and histories Extensive cross references and indexes enable readers to locate particular literary texts in their relevant historical contexts as well as to discover related literary texts and histories in other regions with ease Rights of Accused Dr. Ashutosh,2009

Bioregionalism and Global Ethics Richard Evanoff,2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both Power of the Talking Stick Sharon J Ridgeway,Peter J Jacques,2015-11-17 The Power of the Talking Stick makes the case that reaching back to the beginning of the nation state and all through the current period of corporate led globalisation our governments and social institutions have been engaged in activities that will ultimately extinguish the world s ecological life support systems This book offers an alternative listening to indigenous leaders and others whose voices often go unheard in the din of contemporary culture Sharon Ridgeway and Peter Jacques offer a stark warning but their insights are firmly grounded in traditional knowledge and provide a way to see past the politics and rescue the earth An important resource for climate activists students and academics International

Economic Institutions M.A. van Meerhaeghe, 2013-03-14 What made me write this book was a feeling that students of international economics needed to fill out their knowledge of the theory with work on the practice of the major international economic organizations many of which are having a growing influence on the national economies of their members There was no single volume given over to a concise treatment of these organizations The annual reports of the international organizations themselves can be consulted of course but as a rule these are not noted for being brief and to the point the items of importance have to be fished out of a sea of useless detail nor do they go in for criticism of their own activities In selecting the organizations to be dealt with in the book I was guided by the influence they exert I have left out those whose activities consist mainly in the drafting of recommendations to which however meritorious they may be little or no attention is paid Some of them are included in the Introduction which provides a summary of a number of institutions not discussed separately in the body of the work There are however two exceptions the Organization for Economic Cooperation and Development OECD as the organization replacing the Organization for European Economic Cooperation OEEC and the United Nations Conference on Trade and Development UNCTAD whose meetings have succeeded in drawing much attention of the press

Post-colonial Shakespeares Ania Loomba, Martin Orkin, 1998 This carefully focused collection of superb new essays explores the multiple possibilities for the study of Shakespeare in an emerging postcolonial period Postcolonial Shakespeares examines the extent to which our assumption about key terms such as colonisation race and nation derive from early modern English culture It also looks at how such terms are themselves affected by what was established subsequently as colonial forms of knowledge The volume features original work by some of the leading critics within the field of Shakespeare studies including Andreas Bertoldi Jerry Brotton Jonathan Burton Jonathan Dollimore Terence Hawkes Margo Hendricks David Johnson Ania Loomba Michael Neill Martin Orkin Avraham Oz Nicholas Visser It is the most authoritative of such collections to date and represents an exciting step forward for both postcolonial and Shakespeare studies
