**Eastern European Mathematics Education in the Decades of Change** Alexander Karp, 2020-05-04 This contributed volume is devoted to the recent history and evolution of mathematics education in Eastern Europe exploring how it was influenced by social and political changes in this part of the world Despite the broad recognition of the importance of these changes little scholarship exists that examines the ways in which they were followed by changes in the teaching of mathematics in the post socialist countries Indeed the analyzed processes are complex and vary across the states Accordingly this book touches on many factors including differences in cultures and traditions that find expression in the teaching of mathematics Specifically this volume seeks to explore what changes there were in education in general and in the position of mathematics in school education in these years and how these changes may be explained and documented what changes there were in the content of mathematics education and its assessment and how were they motivated and adopted what new textbooks appeared and what new methodological ideas were offered in them how and why mathematics teacher education and or professional development changed what was the role if any of foreign influences on mathematics education etc The book will be of interest to both researchers in mathematics education and practitioners teachers as well as a broader audience of historians and educators exploring the political aspects of education

**The International Commission on Mathematical Instruction, 1908-2008: People, Events, and Challenges in Mathematics Education** Fulvia Furinghetti, Livia Giacardi, 2023-01-30 The book presents the history of ICMI through a prosopographical approach In other words it pays a lot of attention to the actors of the International movement The portraits of the members of the ICMI Central Committees 1908 1936 and ICMI Executive Committees 1952 2008 and other eminent figures in ICMI history who have passed away in the first 100 years of its life are the guiding thread of the volume Each portrait includes Biographical information An outline of the various contributions made by the individual in question to the study of problems pertaining to mathematics teaching education Primary bibliography Secondary with particular attention to the publications concerning the teaching of mathematics Images photos book frontispieces relevant manuscripts The authors of the portraits 30 altogether are

researchers in the history of mathematics mathematics and mathematics education The focus on the officer's role within ICMI and on his/her contributions to mathematics education make the portraits different from usual biographies In particular since most officers were active mathematicians the portraits shed light on aspects of their lesser known activity Connecting chapters place the action of these figures in the historical context and in the different phases of ICMI history **A**

**Panorama of Hungarian Mathematics in the Twentieth Century, I** Janos Horvath, 2010-06-28 A glorious period of Hungarian mathematics started in 1900 when Lip t Fej r discovered the summability of Fourier series This was followed by the discoveries of his disciples in Fourier analysis and in the theory of analytic functions At the same time Frederic Frigyes Riesz created functional analysis and Alfred Haar gave the first example of wavelets Later the topics investigated by Hungarian mathematicians broadened considerably and included topology operator theory differential equations probability etc The present volume the first of two presents some of the most remarkable results achieved in the twentieth century by Hungarians in analysis geometry and stochastics The book is accessible to anyone with a minimum knowledge of mathematics It is supplemented with an essay on the history of Hungary in the twentieth century and biographies of those mathematicians who are no longer active A list of all persons referred to in the chapters concludes the volume History of Mathematics in Hungary Until the 20th Century Barna Szénácssy, 1992 *Mathematical Cultures* Brendan Larvor, 2016-05-25

This collection presents significant contributions from an international network project on mathematical cultures including essays from leading scholars in the history and philosophy of mathematics and mathematics education Mathematics has universal standards of validity Nevertheless there are local styles in mathematical research and teaching and great variation in the place of mathematics in the larger cultures that mathematical practitioners belong to The reflections on mathematical cultures collected in this book are of interest to mathematicians philosophers historians sociologists cognitive scientists and mathematics educators **Index to Mathematical Problems, 1980-1984** Stanley Rabinowitz, 1992 A compendium of over 5 000 problems with subject keyword author and citation indexes Bibliography of Social Science Periodicals and Monograph Series: Hungary United States. **Confectionery and Chocolate Engineering** Ferenc A. Mohos, 2010-11-29 Confectionery and chocolate manufacture has been dominated by large scale industrial processing for several decades It is often the case though that a trial and error approach is applied to the development of new products and processes rather than verified scientific principles The purpose of this book is to describe the features of unit operations used in confectionary manufacturing In contrast to the common technology focused approach to this subject this volume offers a scientific theoretical account of confectionery manufacture building on the scientific background of chemical engineering The large diversity of both raw materials and end products in the confectionery industry makes it beneficial to approach the subject in this way The industry deals with a variety of vegetable based raw materials as well as milk products eggs gelatin and other animal based raw materials A study of confectionery and chocolate engineering must

therefore examine the physical and chemical as well as the biochemical and microbiological properties of the processed materials By characterizing the unit operations of confectionery manufacture the author who has over 40 years experience in confectionery manufacture aims to open up new possibilities for improvement relating to increased efficiency of operations the use of new materials and new applications for traditional raw materials The book is aimed at food engineers scientists technologists in research and industry as well as graduate students on relevant food and chemical engineering related courses
