Material Culture And The Study Of American Life:

Material Culture and the Study of American Life, 1978 **American Material Culture** Edith Mayo, 1984 The use of objects as source materials for scholarship has been increasingly legitimized by the growth of American Studies programs which are now in the forefront in their work with objects The use of the museum as a primary resource is currently being given a position of increasing importance in American Studies scholarship *Material Culture Studies in America* Thomas J. Schlereth, 1999 The country's leading authority on use of artifactual evidence in historical research collects twenty five classic essays and gives his overview of the field of material culture *Material Culture in America* Helen Sheumaker, Shirley Wajda, 2007-11-07 The first encyclopedia to look at the study of material culture objects images spaces technology production and consumption and what it reveals about historical and contemporary life in the United States Reaching back 400 years *Material Life in America An Encyclopedia* is the first reference showing what the study of material culture reveals about American society revelations not accessible through traditional sources and methods In nearly 200 entries the encyclopedia traces the history of artifacts concepts and ideas industries peoples and cultures cultural productions historical forces periods and styles religious and secular rituals and traditions and much more Everyone from researchers and curators to students and general readers will find example after example of how the objects and environments created or altered by humans reveal as much about American life as diaries documents and texts Think Like a Curator Donna R. Braden, 2025-04-01 Most history museums large and small indoor and outdoor have a staff member with the title of curator or at minimum have tasks that can be classified as curator's work But understanding what is involved in doing this work is more complicated than it seems This book will help you to think like a curator Written by an author who has spent 45 years doing this type of work at one of the largest history museums in the country this book guides the reader through curatorial methodology in today's world with topics that include reading objects shaping collections engaging in rigorous research the curatorial role in exhibitions and historic site interpretation the basics of curatorial writing and curators as leaders It gives special focus to applying DEAI lenses as well as aligning with institutional mission and goals incorporating audience perspectives and using conceptual and systems thinking Both succinct and substantial this book includes easy explanations step by step process guides practical tips real life examples activities and source lists *Selling Shaker* Stephen Bowe, Peter Richmond, 2007-01-01 The simple yet striking lines of Shaker design grace much of the furniture we see in high end department stores and beautiful examples of it adorn the pages of Architectural Digest and House Beautiful How did this style evolve from its origins in a humble small religious community to the international design phenomenon it is today This illustrated study explores the emergence of the Shaker style and how it was vigorously promoted by scholars and artists into the prominence it now enjoys The heart of the Shaker style lies in the religious movement founded in the eighteenth century where Stephen Bowe and Peter Richmond begin their chronicle From there the authors

chart the evolution of the style into the twentieth century particularly in the hands of design media scholars and art institutions These Shaker agents repositioned Shaker style continuously from local vernacular to high culture and then popular culture Drawing on a rich array of sources including museum catalogs contemporary design magazines and scholarly writings *Selling Shaker* illustrates in detail how the Shaker style entered the general design consciousness and how the original aesthetic was gradually diluted into a generic style for a mass audience A wholly original and fascinating study of American design and consumption *Selling Shaker* is a unique resource for collectors scholars and anyone interested in the cultural history of a design aesthetic

Spaces that Tell Stories Donna R. Braden, 2019-07-12 Historical environments delight visitors because of their ability to make them feel transported to another time and place These environments found in both museum exhibitions and historic structures are usually rich with objects that hint at deeper stories and context But these spaces often lack rigor in terms of historical and interpretive methodology along with a thoughtful and purposeful integration of storytelling principles *Spaces That Tell Stories Creating Historical Environments* offers a fresh look at historical environments providing a roadmap for applying this rigor and integrating these principles into the creation of such environments It begins by delving into the power of these environments for museum visitors drawing upon multiple cross disciplinary fields An in depth how to methodology follows which begins with the steps of framing the project by aligning it with institutional goals defining audiences involving visitor studies and inviting community engagement It continues through the steps of researching creating interpreting refining and evaluating the impact of the environment The author s methodology is applicable to environments in both historic structures and museum exhibits from different eras places and topics It is also scalable to museums varying sizes and budgets To give a sense of how the methodology laid out in this book translates into real world practice detailed case studies appear throughout along with practical tips checklists charts descriptive photographs and source lists An extensive bibliography follows *Spaces That Tell Stories Creating Historical Environments* is a unique contribution to the museum field It is a must read for museum professionals installing or upgrading historic environments while the methodology and case studies also offer practical strategies for other museum professionals working with collections exhibitions and interpretation and how these are integrated thoughtful insights into museum practice for students and a helpful toolkit for local historians
