Boughton,1999 Multiculturalism is a term that has been much used in educational texts in recent years Its usage is frequently taken for granted in the rhetoric of curriculum literature However it has recently become clear that there are significant variations of interpretations of multiculturalism in different world regions This book takes a new and deeper look at the notion of multiculturalism through the lens of art education In educational terms art is a unique tool for the investigation of cultural values because it transcends the barrier of language and provides visceral and tacit insights into

cultural change In order to address the educational interpretations and methods of implementing multiculturalism in different regions of the world this book contains discussion and analysis of perspectives on art education theory and practice from thirteen countries The authors of each chapter are respected multicultural experts in their geographic locations who are well equipped to provide unique insights into the particular issues of multiculturalism viewed from the perspective of art in educational contexts The book as a whole provides tools for the conceptual analysis of contemporary notions linked with multiculturalism such as interculturalism internationalism and globalisation It also provides strategies for art teaching in relation to these ideas While the term multicultural education is problematic this book presents conceptual frameworks that should assist educators to examine their own teaching on issues of equity and diversity that are central to the multicultural education debate

Archaeological Semiotics Robert W. Preucel, 2010-04-26 This interdisciplinary book examines archaeology's engagement with semiotics from its early structuralist beginnings to its more recent Peircian encounters It represents the first sustained engagement with Peircian semiotics in archaeology as well as the first discussion of how pragmatic anthropology articulates with anthropological archaeology Its central thesis is that archaeology is a distinctive kind of semiotic enterprise one devoted to giving meaning to the past in the present through the study of materiality It compliments standard studies of linguistics and reformulates contemporary theories of material culture Providing an introduction to Saussure and a review of his legacy across structural symbolic and cognitive anthropology Preucel goes on to present the Peircian alternative and highlights its influence on pragmatic anthropology Of special interest are the discussions of the interrelations of structuralism and processual archaeology poststructuralism and postprocessual archaeologies and cognitive science and cognitive archaeology The author offers two original case studies demonstrating how material culture pragmatically mediates social relations one focusing on the aftermath of the Pueblo Revolt from 1680 1694 and the other on the New England utopian community of Brook Farm from 1842 1846 Throughout his analysis Preucel emphasizes the close links between archaeology and other social sciences But he also contends that archaeology by virtue of the powerful ideological character of the past can open up new spaces for discourse and dialogue about meaning and in the process make a valuable contribution to contemporary semiotics

Unmaking Waste Sarah Newman, 2023-05-26 In *Unmaking Waste* Sarah Newman asks what happens when there are disagreements about what constitutes waste and what one should do with it both at singular moments in time for example when ideas about waste collide in emerging colonial contexts and across time such as between those who left things behind in the past and the archaeologists who recover them Newman examines ancient Mesoamerican understandings of waste Euro American perceptions of waste in New Spain and early modern European ideals of civility and Christian understandings of good and bad expressed metaphorically through cleanliness and filth These differing perceptions Newman argues demands that we rethink centuries of assumptions imposed on other places times and peoples so long as waste remains a category misunderstood to be common sensical and stable archaeological methods will prove unequal to their task

Newman instead proposes anamorphic archaeology an approach that emphasizes the possibility that archaeological objects have multiple physical and conceptual lives *Ethnic Ambiguity and the African Past* Francois G Richard, Kevin C

MacDonald, 2016-07-01 The collective inquiries in this volume address ethnicity in ancient Africa as social fact and political artifact along numerous dimensions Is ethnicity a useful analytic What can archaeology say about the kinds of deeper time questions which scholars have asked of identities in Africa Eleven authors engage with contemporary anthropological historical and archaeological perspectives to examine how ideas of self understanding belonging and difference in Africa were made and unmade They examine how these intersect with other salient domains of social experience states landscapes discourses memory technology politics and power The various chapters cover broad geographic and temporal ground following an arc across Senegal Mali Nigeria Cameroon the Democratic Republic of Congo Rwanda and East Africa spanning from prehistory to the colonial period **The Kikuyu and Kamba of Kenya** John Middleton, Greet Kershaw, 2017-02-10

Cognitive Perspectives on Israelite Identity breaks new ground in the study of ethnic identity in the ancient world through the articulation of an explicitly cognitive perspective In presenting a view of ethnicity as an epistemological rather than an ontological entity this work seeks to correct the pronounced tendency towards analytical groupism in the academic literature Challenging what Pierre Bourdieu has called our primary inclination to think the world in a substantialist manner this study seeks to break with the vernacular categories and commonsense primordialisms encoded within the Biblical texts whilst at the same time accounting for their tenacious hold on our social and political imagination It is the recognition of the performative and reifying potential of these categories of ethno political practice that disqualifies their appropriation as categories of social analysis The Uses of Style in Archaeology Margaret Wright Conkey, Christine Ann Hastorf, 1990 This book brings together essays that illustrate the different uses and interpretations of style in archaeology Style is a widely discussed and controversial issue which has always been central for archaeological interpretation The collection considers the history of

style in archaeology its relationship to the concept of style in art history and how stylistic analyses will differ according to different initial assumptions The essays show how stylistic interpretation works at different levels and they debate stylistic terminologies and concepts Although these essays show that there is no unified theory of style they underline the importance of continuing creative discussion through different themes and individual case studies

Ecological by Design Kjetil Fallan, 2022-11-22 How ecological design emerged in Scandinavia during the 1960s and 1970s building on both Scandinavia's design culture and its environmental movement Scandinavia is famous for its design culture and for its pioneering efforts toward a sustainable future In *Ecological by Design* Kjetil Fallan shows how these two forces came together in the late 1960s and early 1970s when Scandinavian designers began to question the endless cycle in which designed objects are produced consumed discarded and replaced in quick succession The emergence of ecological design in Scandinavia at the height of the popular environmental movement Fallan suggests illuminates a little known reciprocity between environmentalism and design not only did design play a role in the rise of modern environmentalism but ecological thinking influenced the transformation in design culture in Scandinavia and beyond that began as the modernist faith in progress and prosperity waned Fallan describes the efforts of Scandinavian designers to forge an environmental ethics in a commercial design culture sustained by consumption shows by recounting a quest for sustainability through Norwegian wood that one of the main characteristics of ecological design is attention to both the local and the global and explores the emergence of a respectful and sustainable paradigm for international development Case studies trace key connections to continental Europe Britain the US Central America and East Africa Today ideas of sustainability permeate design discourse but the historical emergence of ecological design remains largely undiscussed With this trailblazing book Fallan fills that gap

decarbonisation **Clothing** Robert Ross, 2008-07-08 In virtually all the countries of the world men and to a lesser extent women are today dressed in very similar clothing This book gives a compelling account and analysis of the process by which this has come about At the same time it takes seriously those places where for whatever reason this process has not occurred or has been reversed and provides explanations for these developments The first part of this story recounts how the cultural political and economic power of Europe and from the later nineteenth century North America has provided an impetus for the adoption of whatever was at that time standard Western dress Set against this Robert Ross shows how the adoption of European style dress or its rejection has always been a political act performed most frequently in order to claim equality with colonial masters more often a male option or to stress distinction from them which women perhaps under male duress more frequently did The book takes a refreshing global perspective to its subject with all continents and many countries being discussed It investigates not merely the symbolic and message bearing aspects of clothing but also practical matters of production and equally importantly distribution
