The Routledge Companion to Contemporary Anthropology Simon Coleman, Susan B. Hyatt, Ann Kingsolver, 2016-11-25 The Routledge

Companion to Contemporary Anthropology is an invaluable guide and major reference source for students and scholars alike introducing its readers to key contemporary perspectives and approaches within the field. Written by an experienced international team of contributors with an interdisciplinary range of essays, this collection provides a powerful overview of the transformations currently affecting anthropology. The volume both addresses the concerns of the discipline and comments on its construction through texts, classroom interactions, engagements with various publics and changing relations with other academic subjects. Persuasively demonstrating that a number of key contemporary issues can be usefully analyzed through an anthropological lens, the contributors cover important topics such as globalization, law and politics, collaborative archaeology, economics, religion, citizenship and community health and the environment. The Routledge Companion to Contemporary Anthropology is a fascinating examination of this lively and constantly evolving discipline.

Archaeological Semiotics Robert W. Preucel, 2010-04-26 This interdisciplinary book examines archaeology's engagement with semiotics from its early structuralist beginnings to its more recent Peircian encounters. It represents the first sustained engagement with Peircian semiotics in archaeology as well as the first discussion of how pragmatic anthropology articulates with anthropological archaeology. Its central thesis is that archaeology is a distinctive kind of semiotic enterprise, one devoted to giving meaning to the past in the present through the study of materiality. It complements standard studies of linguistics and reformulates contemporary theories of material culture. Providing an introduction to Saussure and a review of his legacy across structural, symbolic and cognitive anthropology, Preucel goes on to present the Peircian alternative and highlights its influence on pragmatic anthropology. Of special interest are the discussions of the interrelations of structuralism and processual archaeology, poststructuralism and postprocessual archaeologies, and cognitive science and cognitive archaeology. The author offers two original case studies demonstrating how material culture pragmatically mediates social relations: one focusing on the aftermath of the Pueblo Revolt from 1680-1694 and the other on the New England utopian community of Brook Farm from 1842-1846. Throughout his analysis, Preucel emphasizes the close links between archaeology and other social sciences. But he also contends that archaeology, by virtue of the powerful ideological character of the past, can open up new spaces for discourse and dialogue about meaning and, in the process, make a valuable contribution to contemporary semiotics.

Continuities and Changes in Maya Archaeology Charles Golden, Greg Borgstede, 2004-03 This book presents the current state of Maya archaeology by focusing on the history of the field for the last 100 years, present-day research and forward-looking prescription for the direction of the field.

Maritime Archaeology and Social Relations Virginia Dellino-Musgrave, 2006-11-22 This book analyses British action in the Southern Hemisphere in the late 18th century, examining two Royal Navy ships: one off the Argentinean coast and one off the Southeast Australian coast. The author goes beyond a descriptive analysis of wrecks by treating them and their cargoes as embodiments of 18th-century social relations. The book challenges traditional approaches, providing a perspective that emphasises the richness, diversity and complexity of

British action **Diplomacy by Design** Marian H. Feldman, 2006-05-15 During the fourteenth and thirteenth centuries BCE the kings of Egypt Babylonia Assyria and Hatti participated in a complex international community These two hundred years also witnessed the production of luxurious artworks made of gold ivory alabaster and faience objects that helped to foster good relations among the kingdoms In fact as Marian H Feldman makes clear here art and international relations during the Late Bronze Age formed an unprecedented symbiosis in concert with expanded travel and written communications across the Mediterranean And thus diplomacy was invigorated through the exchange of lavish art objects and luxury goods which shared a repertoire of imagery that modern scholars have called the first International Style in the history of art Previous studies have focused almost exclusively on stylistic attribution of these objects at the expense of social contextualization Feldman's *Diplomacy by Design* instead examines the profound connection between art produced during this period and its social and political contexts revealing inanimate objects as catalysts or even participants in human dynamics Feldman's fascinating study shows the ways in which the diplomatic circulation of these works actively mediated and strengthened political relations intercultural interactions and economic negotiations and she does so through diverse disciplinary frameworks including art history anthropology and social history Written by a specialist in ancient Near Eastern art and archaeology who has excavated and traveled extensively in this area of the world *Diplomacy by Design* considers anew the symbolic power of material culture and its centrality in the construction of human relations *Ceramics and Society* Valentine Roux, 2019-02-14 Pottery is the most ubiquitous find in most historical archaeological excavations and serves as the basis for much research in the discipline But it is not only its frequency that makes it a prime dataset for such research it is also that pottery embeds many dimensions of the human experience ranging from the purely technical to the eminently symbolic The aim of this book is to provide a cutting edge theoretical and methodological framework as well as a practical guide for archaeologists students and researchers to study ceramic assemblages As opposed to the conventional typological approach which focuses on vessel shape and assumed function with the main goal of establishing a chronological sequence the proposed framework is based on the technological approach Such an approach utilizes the concept of chaîne opératoire which is geared to an anthropological interpretation of archaeological objects The author offers a sound theoretical background accompanied by an original research strategy whose presentation is at the heart of this book This research strategy is presented in successive chapters that are geared to explain not only how to study archaeological assemblages but also why the proposed methods are essential for achieving ambitious interpretive goals In the heated debate on the equation stating that pots equal people which is a rather fuzzy reference to assumed relationships between mostly ethnic groups and pottery technology enables us to propose with conviction the equation pots equal potters In this way a well founded history of potters is able to achieve a much better cultural and anthropological understanding of ancient societies *Ancient Maya Pottery* James John Aimers, 2013-01-20 The ancient Maya produced a broad range of ceramics that has attracted concerted

scholarly attention for over a century Pottery sherds the most abundant artifacts recovered from sites reveal much about artistic expression religious ritual economic systems cooking traditions and cultural exchange in Maya society Today nearly every Maya archaeologist uses the type variety classificatory framework for studying sherd collections This impressive volume brings together many of the archaeologists signally involved in the analysis and interpretation of ancient Maya ceramics and represents new findings and state of the art thinking The result is a book that serves both as a valuable resource for archaeologists involved in pottery classification analysis and interpretation and as an illuminating exploration of ancient Mayan culture

Social Archaeologies of Trade and Exchange Alexander A Bauer, Anna S Agbe-Davies, 2016-06-16 This volume focuses on the anthropological concept of trade as a fundamentally social activity concerned not only with the movement of goods but also on the social context and consequences of that exchange The distinguished contributors discuss trade on a range of scales from a solitary confinement cell to trans oceanic networks in settings around the world and over the past 3000 years They address themes such as exchange as a communicative act the ways in which exchange transforms the relationship between people and things the significance of agency and power in contexts of trade and how sites of consumption and discard speak to processes of exchange The volume merges traditional

archaeological concerns about trade and exchange with more contemporary issues of agency identity and social meaning

Tikal David L. Lentz, Nicholas P. Dunning, Vernon L. Scarborough, 2015-02-23 The primary theoretical question addressed in this book focuses on the lingering concern of how the ancient Maya in the northern Petén Basin were able to sustain large populations in the midst of a tropical forest environment during the Late Classic period This book asks how agricultural intensification was achieved and how essential resources such as water and forest products were managed in both upland areas and seasonal wetlands or bajos All of these activities were essential components of an initially sustainable land use strategy that eventually failed to meet the demands of an escalating population This spiraling disconnect with sound ecological principles undoubtedly contributed to the Maya collapse The book's findings provide insights that broaden the understanding of the rise of social complexity the expansion of the political economy specifically and in general terms the trajectory of cultural evolution of the ancient Maya civilization

From Archaeology to Spectacle in Victorian Britain

Shawn Malley, 2016-04-15 In his examination of the excavation of ancient Assyria by Austen Henry Layard Shawn Malley reveals how by whom and for what reasons the stones of Assyria were deployed during a brief but remarkably intense period of archaeological activity in the mid nineteenth century His book encompasses the archaeological practices and representations that originated in Layard's excavations radiated outward by way of the British Museum and Layard's best selling *Nineveh and Its Remains* 1849 and were then dispersed into the public domain of popular amusements That the stones of Assyria resonated in debates far beyond the interests of religious and scientific groups is apparent in the prevalence of poetry exhibitions plays and dioramas inspired by the excavation Of particular note correspondence involving high ranking diplomatic personnel and museum officials demonstrates that the treasures brought home to fill the British Museum served not only as signs of symbolic conquest but also as covert means for extending Britain's political and economic influence in the Near East Malley takes up issues of class and influence to show how the middle class Layard's celebrity status both advanced and threatened aristocratic values Tellingly the excavations prompted disturbing questions about the perils of imperial rule that framed discussions of the social and political conditions which brought England to the brink of revolution in 1848 and resurfaced with a vengeance during the Crimean crisis In the provocative conclusion of this meticulously documented and suggestive book Malley points toward the striking parallels between the history of Britain's imperial investment in Mesopotamia and the contemporary geopolitical uses and abuses of Assyrian antiquity in post invasion Iraq

Decolonizing Indigenous Histories Maxine Oland, Siobhan M. Hart, Liam Frink, 2012-12-06 *Decolonizing Indigenous Histories* makes a vital contribution to the decolonization of archaeology by recasting colonialism within long term indigenous histories Showcasing case studies from Africa Australia Mesoamerica and North and South America this edited volume highlights the work of archaeologists who study indigenous peoples and histories at multiple scales The contributors explore how the inclusion of indigenous histories and collaboration with contemporary communities and

scholars across the subfields of anthropology can reframe archaeologies of colonialism The cross cultural case studies employ a broad range of methodological strategies archaeology ethnohistory archival research oral histories and descendant perspectives to better appreciate processes of colonialism The authors argue that these more complicated histories of colonialism contribute not only to understandings of past contexts but also to contemporary social justice projects In each chapter authors move beyond an academic artifice of prehistoric and colonial and instead focus on longer sequences of indigenous histories to better understand colonial contexts Throughout each author explores and clarifies the complexities of indigenous daily practices that shape and are shaped by long term indigenous and local histories by employing an array of theoretical tools including theories of practice agency materiality and temporality Included are larger integrative chapters by Kent Lightfoot and Patricia Rubertone foremost North American colonialism scholars who argue that an expanded global perspective is essential to understanding processes of indigenous colonial interactions and transitions
