Materialist Conception Of History A Critical Analysis:

The Materialist Conception of History Karl Federn, 1939 The Making of Marx's Critical Theory (RLE Marxism) Allen Oakley, 2015-05-08 Marx's written output was massive. Much of it remained unpublished in his own lifetime and there is still no complete edition of the extant works although most have been published in one form or another. This book first published in 1983 provides an analytical guide to the complex chronological and evolving substantive structure of Marx's main writings in critical theory. The format is concise and accessible with each phase of Marx's evolving critical theory of capitalist society being summarized in a diagram. An invaluable guide for students of Marx it will lead them through the maze of his works to a potentially deeper understanding of his thought. Allen Oakley believes that in order to fully comprehend Marx's critical theory it is essential to trace its complex evolution. Any serious study of Marx's critique of capitalism must begin with an appreciation of the bibliographical framework within which his evolving ideas were manifested. Oakley is opposed to approaches to the study of Marx's critique which take little account of its chronology; such approaches he believes are incomplete and potentially misleading with respect to the meaning and significance of the critique. The book includes bibliographical evidence about the unfinished state of Marx's critical project and its ever-changing scope and organization. It argues therefore that the methodological and substantive status of Capital must be interpreted cautiously for bibliographical evidence shows it to be an unfinished climax to an ambiguous critical theoretical project of uncertain dimensions. To read it as in any sense a final and definitive statement of Marx's critical theory is the author believes to be deluded. **Mao**

Tse-Tung's Theory of Dialectic F.Y.K. Soo, 2012-12-06 The year 1979 ushered in a new phase in China's long and continuous revolution. Currently this new phase is being symbolically referred to by the Chinese leaders themselves as the New Long March, a continuation of the legendary and historical Long March in terms of modernization which comprises the Four Modernizations: Agriculture, Industry, Science and Technology, and Military Defense. Such an all-encompassing attempt at modernization may appear to some at least to be something new or may indicate a radical shift in her policy. But upon closer examination this decision seems only to reflect an historical continuity in terms of the two major long-term goals of the Chinese Revolution: national independence and modernization or industrialization. The former would make China strong; the latter wealthy. For ever since the Opium War in 1840 and throughout the Revolutions of 1911 and 1949, China has always pursued these two revolutionary goals though with different emphases at different times. This has been especially true during the past three decades as this twofold goal has dictated all of China's important policies both domestic and foreign. In other words, while the concrete policies may have appeared to be lacking in unity at times, they have been formulated with the specific intent of achieving national independence and modernization. From this perspective, the New Long March marks the passage of post-Mao China beyond the transition of succession toward the continued pursuit of the same revolutionary goals.

Max Weber and Karl Marx Karl Lowith, 2002-11 First Published in 2004 Routledge is an imprint of Taylor Francis and

informa company *Francis Fukuyama and the End of History* Howard Williams, E Gwynn Matthews, David Sullivan, 2016-07-20 Fukuyama's concept of the End of History has been one of the most widely debated theories of international politics since the end of the Cold War. This book discusses Fukuyama's claim that liberal democracy alone is able to satisfy the human aspiration for freedom and dignity and explores the way in which his thinking is part of a philosophical tradition which includes Kant, Hegel and Marx. Two new chapters in this second edition discuss the ways in which Fukuyama's thinking has developed; they include his celebrated and controversial criticism of neoconservatism and his complex intellectual relationship to Samuel Huntington whose Clash of Civilizations thesis he rejects but whose notion of political decay is central to his more recent work. The authors here argue that Fukuyama's continuing fundamental contributions to debates concerning the spread of democracy and threat of global terror mark him out as one of the most important thinkers of the twenty-first century.

The Study of History, 2000 History is a subject which never stands still. It is always changing its philosophies, its contours, its leading questions, its politics, its conceptual status and its methodologies. This bibliographical guide to the study of history is wide-ranging in scope, extending from the ancient world to the 20th century. It deliberately concentrates on modern historians' views, provides a substantial section on the philosophy of history, charts controversies and highlights the continual evolution and diversification of history. The material is logically organized in major areas and subsections, and cross-references are given where appropriate. An index of authors, editors and compilers is also provided.

Logic of Historical Explanation Clayton Roberts, 2010-11-01

Herbert Butterfield and the Interpretation of History K. Sewell, 2005-01-13 This book examines successive stages in the development of the thought of Sir Herbert Butterfield in relation to fundamental issues in the science of history. In a carefully nuanced way it lays bare the unspoken motivations and hidden tensions in Butterfield's debate with himself and with a host of contemporary historians in the period between 1924-79.

Marx's Ecology John Bellamy Foster, 2000-03-01 Progress requires the conquest of nature. Or does it? This startling new account overturns conventional interpretations of Marx and in the process outlines a more rational approach to the current environmental crisis. Marx is often assumed to have cared only about industrial growth and the development of economic forces. John Bellamy Foster examines Marx's neglected writings on capitalist agriculture and soil ecology, philosophical naturalism and evolutionary theory. He shows that Marx, known as a powerful critic of capitalist society, was also deeply concerned with the changing human relationship to nature. Marx's Ecology covers many other thinkers including Epicurus, Charles Darwin, Thomas Malthus, Ludwig Feuerbach, P. J. Proudhon and William Paley. By reconstructing a materialist conception of nature and society, Marx's Ecology challenges the spiritualism prevalent in the modern Green movement, pointing toward a method that offers more lasting and sustainable solutions to the ecological crisis.

Anti-Bolshevik Communism Paul Mattick, Jr., 2017-09-29 This title was first published in 1978. Communism aims at putting working people in charge of their lives. A multiplicity of Councils rather than a big state bureaucracy is needed to

empower working people and to focus control over society Mattick develops a theory of a council communism through his survey of the history of the left in Germany and Russia He challenges Bolshevik politics especially their perspectives on questions of Party and Class and the role of Trade Unions Mattick argues that the revolutions which succeeded first of all in Russia and China were not proletarian revolutions in the Marxist sense leading to the association of free and equal producers but state capitalist revolutions which were objectively unable to issue into socialism Marxism served here as a mere ideology to justify the rise of modified capitalist systems which were no longer determined by market competition but controlled by way of the authoritarian state Based on the peasantry but designed with accelerated industrialisation to create an industrial proletariat they were ready to abolish the traditional bourgeoisie but not capital as a social relationship This type of capitalism had not been foreseen by Marx and the early Marxists even though they advocated the capture of state power to overthrow the bourgeoisie but only in order to abolish the state itself a *The Conduct of War 1789-1961* J. F. C. Fuller, 2015-10-05 This book originally published in 1961 examines the wars from the age of absolute rulers and the destructive impact of revolutionary and democratic government on this state of affairs It discusses the relation between war and policy and takes into account how the character of war in the first half of the twentieth century affected international diplomacy Gramsci's Marxism Nigel M. Greaves, 2009 This book redresses the ambiguity that has arisen around Gramsci's writings in recent times It sets out to reclaim the philosophical linkages to historical materialism and to draw out a more integrated and less fragmented schema that seeks to place Gramsci on equal footing with other philosophers in the Marxist tradition *From Marx to Mises* David Ramsay Steele, 2013-12-15 In 1920 Ludwig von Mises proclaimed that all attempts to establish socialism would come to grief for reasons of informational efficiency At first socialists and economists took Mises's argument seriously but by the end of the Second World War a consensus prevailed that Mises had been discredited More recently that consensus has been rapidly reversed it is now widely agreed that Mises was right Yet the momentous implications of the Mises argument for economics politics culture and philosophy remain largely unexplored From Marx to Mises is a clear penetrating exposition of the economic calculation debate and a scrutiny of some of the broader issues it raises *Oppositional Discourses and Democracies* Michael Huspek, 2009-09-10 When citizens take to the streets pack assembly halls or share their ideas through the press they give voice to truths and logic that have otherwise been given little or no airing through available institutional channels This collection explores the tensions between democratic states and the dynamics of citizen voice Feminist Criticism and Social Change (RLE Feminist Theory) Deborah Rosenfelt, Judith Newton, 2013-05-20 This lively and controversial collection of essays sets out to theorize and practice a materialist feminist criticism of literature and culture Such a criticism is based on the view that the material conditions in which men and women live are central to an understanding of culture and society It emphasises the relation of gender to other categories of analysis such as class and race and considers the connection between ideology and cultural practice and the ways in which all

relations of power change with changing social and economic conditions By presenting a wide range of work by major feminist scholars this anthology in effect defines as well as illustrates the materialist feminist tendency in current literary criticism The essays in the first part of the book examine race ideology and the literary canon and explore the ways in which other critical discourse such as those of deconstruction and French feminism might be useful to a feminist and materialist criticism The second part of the book contains examples of such criticism in practice with studies of individual works writers and ideas An introduction by the editors situates the collected essays in relation both to one another and to a shared materialist feminist project Feminist Criticism and Social Change demonstrates the important contribution of materialist feminist criticism to our understanding of literature and society and fulfils a crucial need among those concerned with gender and its relation to criticism

Revisiting Marx's Critique of Liberalism Igor Shoikhedbrod, 2019-12-26 Revisiting Marx's Critique of Liberalism offers a theoretical reconstruction of Karl Marx's new materialist understanding of justice legality and rights through the vantage point of his widely invoked but generally misunderstood critique of liberalism The book begins by reconstructing Marx's conception of justice and rights through close textual interpretation and extrapolation The central thesis of the book is firstly that Marx regards justice as an essential feature of any society including the emancipated society of the future and secondly that standards of justice and right undergo transformation throughout history The book then tracks the enduring legacy of Marx's critique of liberal justice by examining how leading contemporary political theorists such as John Rawls Jürgen Habermas Axel Honneth and Nancy Fraser have responded to Marx's critique of liberalism in the face of global financial capitalism and the hollowing out of democratically enacted law The Marx that emerges from this book is therefore a thoroughly modern thinker whose insights shed valuable light on some of the most pressing challenges confronting liberal democracies today

Observations on Church and State James Frederick Ferrier, 2022-07-20 James Frederick Ferrier's Observations on Church and State offers a rigorous examination of the intricate relationship between religion and governance during a time of sociopolitical upheaval in the 19th century Ferrier employs a clear and analytical literary style blending philosophical discourse with historical context to illuminate the complexities of ecclesiastical authority and civil power His nuanced arguments challenge conventional perspectives making a significant contribution to political philosophy and ecclesiology particularly in response to the pressures of modernity and the emerging secularization of society Ferrier a prominent Scottish philosopher and political theorist drew upon his deep involvement in contemporary intellectual movements which emphasized reason and empiricism His unique background in law and philosophy informed his approach leading him to question traditional doctrines and advocate for a more rational interdependence between the church and state This work reflects his commitment to fostering understanding amidst societal tensions rooted in a desire for a more equitable and coherent societal framework Observations on Church and State is a

Lenin and the Logic of Hegemony Alan Shandro,2014-07-10 In *Lenin and the Logic of Hegemony* by means of a careful textual and contextual analysis of the writings of Lenin and his Marxist contemporaries Alan Shandro traces the contours of the anti metaphysical event identified by Gramsci in Lenin s political practice and theory the emergence of the philosophical fact of hegemony In so doing he effectively disputes conventional caricatures of Lenin s role as a political actor and thinker and unearths the underlying parameters of the concept of hegemony in the class struggle He thereby clarifies the conceptual status of this pervasive but now increasingly elusive notion and the logic of theory and practice at work in it
