Morton, 1996-12-23 A Historical Introduction to the Philosophy of Mind is designed both to provide a selection of core readings on the subject and to make those readings accessible by providing commentaries to guide the reader through initially intimidating material Each commentary explains technical concepts and provides

background on obscure arguments as they arise setting them in the historical and intellectual milieu from which they emerged The readings concentrate on providing the student with a solid grounding in the theories of representative figures of the major philosophical movements from Plato and Aristotle to important recent figures such as Fodor and Dennett A glossary of key terms is also included

The Mystery of Mind Peter M.K. Chan, 2003-06-10 The Mystery of Mind is a systematic and critical introduction to the philosophy of mind At issue is what is known as the mind body problem How does a body support a mind with its brain Pivotal to the book is the author's working out of an adverbial concept of mind that is user friendly to the materialist cause It is upon the strength of this adverbial concept that the author has come to hold that the conceptual gap between the neurobiological and the psych cognitive could in fact be bridged It is also the author's contention that despite shortcomings of other materialist approaches that have been taken in our time an intelligible case for the truth of materialism could still be made in the form of a biological emergent two aspect scenario i e when the adverbial concept of mind he advocates is also brought to bear All in all what The Mystery of Mind offers is a systematic introduction to one of the living philosophical issues that have engaged the human intellects for more than two thousand years This is also the central issue that has motivated research in artificial intelligence cognitive psychology neuroscience and the philosophy of mind in our time

The Materialist Theory of Mind, 1971 **The Materialist Theory of Mind** Louis DeWald Sass, 1953 *The Rediscovery of the Mind* John R. Searle, 1992-07-08 In this major new work John Searle launches a formidable attack on current orthodoxies in the philosophy of mind More than anything else he argues it is the neglect of consciousness that results in so much barrenness and sterility in psychology the philosophy of mind and cognitive science there can be no study of mind that leaves out consciousness What is going on in the brain is neurophysiological processes and consciousness and nothing more no rule following no mental information processing or mental models no language of thought and no universal grammar Mental events are themselves features of the brain like liquidity is a feature of water Beginning with a spirited discussion of what's wrong with the philosophy of mind Searle characterizes and refutes the philosophical tradition of materialism But he does not embrace dualism All these isms are mistaken he insists Once you start counting types of substance you are on the wrong

track whether you stop at one or two In four chapters that constitute the heart of his argument Searle elaborates a theory of consciousness and its relation to our overall scientific world view and to unconscious mental phenomena He concludes with a criticism of cognitive science and a proposal for an approach to studying the mind that emphasizes the centrality of consciousness to any account of mental functioning In his characteristically direct style punctuated with persuasive examples Searle identifies the very terminology of the field as the main source of truth He observes that it is a mistake to suppose that the ontology of the mental is objective and to suppose that the methodology of a science of the mind must concern itself only with objectively observable behavior that it is also a mistake to suppose that we know of the existence of mental phenomena in others only by observing their behavior that behavior or causal relations to behavior are not essential to the existence of mental phenomena and that it is inconsistent with what we know about the universe and our place in it to suppose that everything is knowable by us

Emergent Materialism Selton Luke Peters,1995 An introduction to some of the major objections against traditional materialism Topics include the identity of mental and physical events the question of the existence of irreducibly psychic properties the function of consciousness and the problem of personal identity

Contingent Immaterialism Ben Lazare Mijuskovic,1984-01-01

The Philosophy of Mind Dale Jacquette,2009-04-23 In Philosophy of Mind The Metaphysics of Consciousness Dale Jacquette provides students and professionals with a concise and accessible overview of this fascinating subject The book covers all the key topics and debates in the philosophy of mind and introduces the full range of choices available in approaching the mind body problem Exploring classical and contemporary texts the book surveys the subject s historical background and current applications Crucially Jacquette offers a defence of property dualism as an alternative solution to the mind body problem instead of the mainstream eliminativist and reductivist strategies Clearly structured and featuring useful diagrams a glossary of key terms and advice on further reading the book is ideal for classroom use Fully revised updated and expanded to meet the needs of a new generation of philosophy students this second edition is the ideal companion to the study of the philosophy of mind
