Maternal Recognition Of Pregnancy Ciba Foundation Symposium 64:

Maternal Recognition of Pregnancy Julie Whelan, 2009-09-16 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world *Fertilization of the Human Egg In Vitro* Henning M Beier, H. R. Lindner, 2012-12-06 The Organon Symposia have actually become a tradition keeping up with exciting developments in reproductive medicine The purpose of this symposium on Fertilization of the Human Egg in Vitro was to bring together the still limited number of clinical specialists in the field and to stimulate another group of basic research people to exchange their experiences and knowledge hopefully promoting close cooperation between the two groups It was a kind of scientific first that all research teams so far successful in achieving the birth of a healthy baby fertilized in vitro came together at a workshop conference without a large audience of spectators and reporters but with a small number of highly critical colleagues from the fields of basic reproductive physiology and comparative developmental biology This atmosphere allowed for the close exchange of results hypotheses diagnostic and therapeutic procedures criticism and respect and created very productive discussions all of which furthered the aim of the method To help more childless couples to have their own babies by the ultima ratio procedure of in vitro fertilization and embryo replacement The book that has emerged from this symposium will help to disseminate the great amount of information and experience gathered among the scientifically and clinically interested colleagues of many other hospitals and universities who could not be invited to the meeting At the same time it will prove that there is much more work to be done in the basic and clinical sciences of human embryology and reproductive biology Handbook of Mutagenicity Test Procedures B.J. Kilbey, M. Legator, W. Nicholson, C. Ramel, 2012-12-02 The compilation of this book was prompted by the necessity of a bench volume which could provide the necessary background information on materials experimental design pitfalls and difficulties in order to perform a particular test in an acceptable way with a minimal need for additional expert help This Second Edition updates this information providing a comprehensive bench guide methods known to be reliable a broad spectrum of approaches tips to avoid pitfalls when using unfamiliar techniques data from population records safety aspects of mutagens and carcinogens basic statistical concepts for experiment design This on the bench methodological text provides the necessary information for most of the common assays for genetic damage in use The book includes methods which have been sufficiently used and tested to make their use reliable but also presents methods which are not widely used at present but which might prove most useful in screening for mutagenic effects Proteins and Steroids in Early Pregnancy H.M. Beier, P. Karlson, 2012-12-06 It is about 15 years since the first presentation on uteroglobin was given to a group of developmental biologists reproductive physiologists and geneticists who had gathered in November 1966 at Konstanz Germany In the following decade so much knowledge was

accumulated that a special symposium seemed appropriate This was organized as a satellite symposium to the International Congress of Endocrinology at Hamburg and brought together 50 scientists at Aachen These scientists working in the field of proteins and steroids in early pregnancy recognized the impact of what had been reported and many of them later agreed to contribute to this book and thus to present their research data available until December 1980 The present volume covers a relatively broad spectrum of data and observations which shed some light on preimplantational embryonic life and on the supports and obstacles provided by the maternal organism with respect to final accomplishment of normal implantation and establishment of pregnancy The book will serve both as a textbook and as a scientific dictionary for Ph D students postdoctoral fellows and advanced scientists working in this area The course of early pregnancy depends very much on a proper balance of steroid hormones and the induction of protein synthesis by steroid hormones is one of the well known fundamental processes in cellular differentiation and embryonic development *Male Infertility* T.B. Hargreave, 2012-12-06 Twenty five years ago the subject of male infertility scarcely existed in urological practice At that time semen analysis was a rather cursory microscopic test the scope of endocrine and hormone tests was limited and debate about the relevance of a varicocele was only just beginning Since then progress has owed about as much to sociological change as medical progress Acceptance that problems of fertility should be shared between partners is now no longer questioned and the willingness of both husband and wife to recognise this and to seek help has been an important change in clinical practice This book is concerned primarily with male infertility and it will be evident that this is now a substantial subject in its own right However a need for a broad perspective in this subject is emphasised by a chapter on female assessment as well as reference to female aspects of infertility wherever relevant so that the reader remains properly aware that this subject is a problem for the couple Because our knowledge of this subject is changing so rapidly Mr Hargreave has separated the contents into two parts The first is concerned with basic biological problems and investigations with a full evaluation of current knowledge and methods Also details of new techniques that offer the prospect of real progress are a special attraction in this section

Handbook of Laboratory Animal Science Jann Hau, Per Svendsen, Steven J. Schapiro, 1994-06-02 This two volume set presents a comprehensive description of laboratory animal genetics diseases health monitoring nutrition and the environmental impact on animal testing It considers the ethics of animal experimentation through a complete review of European and North American legislation on the topic It discusses alternatives to animal experiments including the use of isolated organs cell cultures and computer simulations The book also examines general methods including experimental design and statistical evaluation non surgical and surgical techniques anesthesia and post mortem examinations Reviews of animal models for studying diseases of different organ systems infectious diseases cancer and toxicology are featured as well

Ovarian Follicular and Corpus Luteum Function C. P. Channing, 2012-12-06 Immunological Aspects of Reproduction and Fertility Control J. P. Hearn, 1980 **Regulation of Implantation and Establishment of Pregnancy in Mammals**

Rodney D. Geisert, Fuller W. Bazer, 2015-10-08 Over the past few decades technological advances in transcriptomics proteomics metabolomics and glycomics along with the ability to selectively knockout genes of interest has greatly advanced our understanding of maternal conceptus interactions that are essential for the establishment and maintenance of a successful pregnancy This knowledge provides a foundation from which to build research endeavors to help resolve infertility embryonic loss and recurrent abortion in humans captive wild animals and important farm species The present volume on Regulation of Implantation and Establishment of Pregnancy in Mammals brings together current reviews from leading experts to address the diversity of mechanisms by which species establish and maintain pregnancy Implantation in rodents dogs pigs cattle sheep horses primates humans and embryonic diapause in wild species are discussed Reviews will provide current knowledge on the role of endometrial steroid receptors adhesion factors cytokines interferons steroids prostaglandins growth factors and immune cells involved with regulation of conceptus development *Reproductive Physiology of Marsupials* C. Hugh Tyndale-Biscoe, Marilyn Renfree, 1987-01-30 The results of this compilation of new research on the reproductive physiology of marsupials reveal much about their patterns of reproduction and evolution in comparison to monotremes and eutherians *Embryonic Mortality in Farm Animals* J.M. Sreenan, M.G. Diskin, 2012-12-06 Reproductive wastage is a major inefficiency in all livestock production with embryonic mortality accounting for a major portion of this loss Accordingly the Commission of the European Communities encouraged the organisation of a seminar on embryonic mortality in farm animals which was held in Brussels on the 11th and 12th of December 1984 This book contains the text of the papers discussions and final summary presented at that Seminar As a background to the Seminar the extent and timing of embryonic loss was described for farm animals Particular consideration was then given to the various mechanisms and signals both embryonic and uterine in origin that are so far known to be involved in the establishment of pregnancy Possible causes of embryonic death including physiological endocrinological genetic and immunological components were outlined and discussed The final summary contains general conclusions from the Seminar and recommendations for future research work on this topic J M Sreenan M G Diskin July 1985 THE EXTENT AND TIMING OF EMBRYONIC MORTALITY IN THE COW J M Sreenan M G Diskin The Agricultural Institute Belclare Tuam Galway Ireland ABSTRACT The extent and timing of embryonic mortality in heifers normal cows and repeat breeder cows has been reviewed **Current Catalog** National Library of Medicine (U.S.), 1979 First multi year cumulation covers six years 1965 70 Clinical In Vitro Fertilization C. Wood, A. Trounson, 2012-12-06 Man is entering a new era as a result of advances in human reproduction Techniques have been developed to assist in the creation of man artificial insemination and now in vitro fertilization IVF Soon other new methods based upon current advances of the IVF procedure will develop to improve the quality of human reproduction The book describes the conceptual framework and details of technique concerned with in vitro fertilization and embryo transfer ET Edwards and Steptoe first described the technique of IVF and ET and the subsequent births of two normal babies Since then

the success rate of the system has been improved by the use of fertility drugs to provide more oocytes and preincubation to mature the oocyte before fertilization As a result of the continued research from Melbourne and Cambridge more than 100 babies have been born A free interchange of information between the Cambridge and Melbourne groups has led to a predictable success rate of 15% 20% per laparoscopy and infertility centres all over the world are now copying the techniques It is an appropriate time to inform doctors and scientists to help them understand the various procedures involved in IVF and ET While many advances will occur in the future the establishment of high success rates in several of the critical steps in the procedure oocyte pick up rate 90% fertilization 90% and early embryo development 70% 90% signifies that some of the new techniques are stabilized sufficiently to warrant transmission of information by text rather than scientific journal

Cellular and Molecular Aspects of Implantation Stanley R. Glasser,David W. Bullock,2012-12-06 Long was I hugg d close long and long Immense have been the preparations for me Faithful and friendly the arms that have help d me Cycles ferried my cradle rowing and rowing like friendly boatmen For room to me stars kept aside in their own rings They sent influences to look after what was to hold me Before I was born out of my mother generations guided me My embryo has never been torpid nothing could overlay it Walt Whitman Song of Myself The womb is the seat of all mammalian life In pregnancy the uterus acquires this impor tance with the arrival of the fertilized egg which takes up residence for periods ranging from about 2 weeks in the opossum to about 2 years in the elephant The arrival of the embryo signals a crucial time for the establishment of pregnancy For several days the blas to cyst remains free in the uterine lumen where it depends on uterine secretions for its sur vival and differentiation During this time essential changes in the endometrium take place in preparation for attachment of the blastocyst and implantation Early embryonic loss is an economic problem of global proportions in animal husbandry where in pigs and cattle for example some 30% of all fertilizations fail to result in a pregnancy In humans this figure may be even higher and estimates of early spontaneous abortions range from 40 to 60% of all conceptions

Fertility Control S.L. Corson,R.J. Derman,1995-12-15 This is the second edition of Corson Derman and Tyrer s complete medical textbook on fertility control It has been revised and fully updated to include details about oral contraceptives and new progestins the female condom hormonal implantation new information about IUDs and the biochemistry biological effects and uses of mifepristone RU 486

Marshall's Physiology of Reproduction G.E. Lamming,2013-04-17 The most comprehensive review available today Marshall s Physiology of Reproduction is the classic reference source for teachers and researchers of animal reproduction Internationally recognised leaders in their respective fields provide an analytical synopsis of the area review current research and outline their philosophical approach to the subject Volume 3 of the fourth edition reviews the processes of pregnancy and lactation in mammals incorporating marsupials non primate eutherians and primates including man Book one covers pregnancy from ovulation to pre parturition

book two reviews fetal physiology parturition and lactation The extensive coverage of the physiology of human reproduction and lactation makes this volume a particularly important reference source for researchers in human fertility control while the review of large animal reproduction is relevant to veterinary and para veterinary workers The East African Medical Journal ,1989
