students with the academic foundations and well rounded education they need to succeed and thrive in the twenty first century The old school day is also out of step with the reality of working families without a stay at home parent to manage their children s after school time Using an additional one to two hours the new school day reworks the schedule so that children can master core academic subjects receive individualized instruction and tutoring and be exposed to a broad array of topics such as the arts music drama and sports *Enriching Your Math Curriculum* Lainie Schuster,2010 Presents practices and routines designed to support and nourish teachers as they prepare and present a meaningful year of mathematics instruction for fifth grade mathematicians Offers activities lessons and narration that can be easily adapted or adjusted to fit the particular needs of the students or the requirements of a prescribed curriculum *Mathematicians and Education Reform, 1990-1991* Naomi Fisher,1993 This is the latest volume in the CBMS Conference Board of the Mathematical Sciences Issues in Mathematics Education series which seeks to stimulate the flow of information among mathematical scientists mathematics educators and mathematics teachers about innovative efforts to revitalize the teaching of the mathematical sciences at all levels The first part of this volume is devoted to detailed descriptions of a wide variety of educational projects undertaken by mathematicians These descriptions focus for the most part on substantial enterprises with an investment of several years and systematic review and evaluation By contrast the second part of the book centres on ideas that could be put into action at a modest level as a springboard for longer term projects This book is intended to stimulate and inspire mathematical scientists to pursue educational work In addition those who have already ventured into educational activities and may be ready for deeper involvement will also benefit from this exploration of what can be done This series is published in cooperation with the Mathematical Association of America *Resources in Education* ,1994

Slavin,Margarita Calderon,Margarita Calderon,2012-11-12 Latino or Hispanic children are one of the fastest growing groups in U S schools today On average these students perform worse than Anglo students on measures of academic

achievement and other measures of academic success and their drop out rate is high There are schools of excellence among those serving Latino children but the majority of these children are placed at risk by schools and community institutions unable to build on the cultural personal and linguistic strengths these children are likely to bring with them to school Schools serving Latino students need programs based on high quality research capable of being replicated and adapted to local circumstances and needs The purpose of this book is to present the current state of the art with respect to research on effective instructional programs for Latino students in elementary and secondary grades Surprisingly this has not been done before there are many books on the situation of Latino students in U S schools but none so far have reviewed research on the outcomes of programs designed to enhance the academic achievement of these students The chapters represent a broad range of methodologies from experimental to correlational to descriptive and the solutions they propose are extremely diverse Each examines in its own way programs and practices that are showing success Together they present a rich array of research based effective programs that are practical widely available and likely to make a profound difference What binds the chapters together is a shared belief that Latino students can succeed at the highest levels if they receive the quality of instruction they deserve and a shared belief that reform of schools serving many Latino students is both possible and essential This is a book filled with statistics description and reviews of research but even more it is filled with optimism about what schools for Latino students can be and what these students will achieve It is a highly relevant and useful resource for educators policymakers and researchers who want to use research to inform the decisions they make about how to help Latino students succeed in elementary and secondary schools and beyond
