**Left Behind** Edward P. St. John, 2015-11-30. This book argues that American cities have been engaged for the past three decades in a radical but failing effort to transform general and vocational high schools into college preparatory institutions. By examining the educational reforms in four urban charter schools across the United States and four public high schools in New York City, it reveals how educators contend with the challenge of developing new courses while providing social support for students to build college-going cultures.

**Workforce Education** William B. Bonvillian, Sanjay E. Sarma, 2021-02-02. A roadmap for how we can rebuild America's working class by transforming workforce education and training. The American dream promised that if you worked hard, you could move up with well-paying working class jobs providing a gateway to an ever-growing middle class. Today, however, we have increasing inequality, not economic convergence. Technological advances are putting quality jobs out of reach for workers who lack the proper skills and training. In *Workforce Education*, William Bonvillian and Sanjay Sarma offer a roadmap for rebuilding America's working class. They argue that we need to train more workers more quickly, and they describe innovative methods of workforce education that are being developed across the country.

*Winning at Math* Paul

D. Nolting, 2002 Every student must pass math courses to graduate Doing well in math can both increase your career choices and allow you to graduate Winning at Math will help you improve your math grades quickly and easily The format of Winning at Math has been revised to make it easier to read and it contains much more proven math study skills techniques The chapter on test anxiety has been expanded to assist students with math anxiety not just test anxiety From publisher's description Teacher Learning and Leadership Ann Lieberman, Carol Campbell, Anna Yashkina, 2016-08-25 Teacher Learning and Leadership asserts that teachers should be put at the center of creating developing organizing implementing and sharing their own ideas for school change rather than being passive recipients of knowledge from the outside It argues that there is tremendous potential for the good of students and the professionalization of teaching when teachers work collaboratively to develop their own and their colleagues professional knowledge and practices and are supported by school and system leaders unions and government The book draws on the groundbreaking work of the Teacher Learning and Leadership Program in Ontario and uses an in depth case study to illustrate its points It demonstrates how professional development built around collaboration teacher leadership curriculum development technology and pedagogy can be organized in a way that redistributes control and responsibility to teachers thereby instilling a genuine sense of pride and accomplishment in their work This book is a sincere outreach from the authors who advocate for the professional development of by and for teachers as individuals and importantly as a collective profession The authors argue that projects like the TLLP a joint initiative between the Ontario Ministry of Education and the Ontario Teachers Federation can radically and positively transform teachers knowledge skills and practices The book provides an important model for school change led by teachers rather than experts in partnership with school and system leaders and is a fascinating read for all those concerned with teaching teacher development and educational change
