Priestley, 2012-12-06 reason for delaying its study has to do with the question of mathematical maturity No use is made here of trigonometric logarithmic or exponential functions except in occasional optional material indicating how such functions can be handled A perceptive remark made by George Pólya suggests how we can simultaneously learn mathematics and learn about mathematics i.e. about the nature of mathematics and how it is developed If the learning of mathematics reflects to any degree the invention of mathematics it must have a place for guessing for plausible inference The reader will find plenty of opportunity here for guessing The early chapters go at a gentle pace and invite the reader to enter into the spirit of the investigation Exercises asking the reader to

make a guess should be taken in this spirit as simply an invitation to speculate about what is the likely truth in a given situation without feeling any pressure to guess correctly Readers will soon realize that a matter about which they are asked to guess will likely be a topic of serious discussion later on **Finite Math for Liberal Arts** Dilip Kumara Datta,2006
