Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors    ENC Focus ,1999    **Innovative Curriculum**

**Materials** ,1999      **The Future of Assessment** Carol Anne Dwyer,2017-09-25 text This volume stems from the 2003 Educational Testing Service Invitational Conference that convened leading scholars and practitioners from education psychology economics statistics and public policy to discuss the important topic of measurement and accountability The chapters cover all significant aspects of the current accountability scene with careful but not exclusive attention to the No Child Left Behind act Written by nationally recognized scholars with a mandate to write in a non technical style this volume will appeal to anyone seriously interested in school reform and the educational accountability movement      **Mathematics and Science Curriculum Programs** ,2002      **Assessing Impact** Joellen Killion,2008 Discusses planning and performing staff evaluations and evaluating staff development programs in order to improve staff training and overall student achievement      **What Every Principal Needs to Know to Create Equitable and Excellent Schools** George Theoharis,Jeffrey S. Brooks,2015-04-25 School leaders who succeed at creating a high achieving learning community must also be committed to creating an equitable environment for all students In this new book key scholars across the content areas show how to put into practice a commitment to equity and excellence across the Pre K12 spectrum Readers learn directly from experts in each of the content domains literacy mathematics science social studies music early childhood special education English language learners world languages and physical education how a commitment to social justice and equity can be grounded in core subject areas why each has a place in the school and what they need to know and do in each subject area This book is a critical instructional leadership resource for new and veteran principals who want to see all students succeed Contributors Antonio J Castro Julie Causton Theoharis Virginia Collier Katherine Delaney Catherine Ennis Virginia Goatley Beth Graue Rochelle Gutierrez Kathleen A Hinchman Anne Karabon Christi Kasa Dave McAlpine Mitchell Robinson Victor Sampson Sherry A Southerland and Wayne Thomas      **Mathematics Curriculum Topic Study** Page Keeley,Cheryl M. the Maine Mathematics and Science Alliance the NSF funded Curriculum Topic Study CTS process can help educators align their practice with research based concepts and skills required in local state and national standards Successfully field tested with hundreds of teachers mathematics coordinators and staff developers this book contains 92 ready to use CTS guides arranged in seven categories that are aligned with NCTM content and process standards Designed to work in a variety of contexts the CTS process will help teachers Increase their content and pedagogical knowledge Better understand and access mathematics research Translate standards to the classroom in a conscious scholarly way Learn to recognize and address learning difficulties Increase opportunities for all students to achieve mathematical literacy An essential investment toward improving student achievement in mathematics for K 12 teachers staff developers directors of curriculum department chairs and math educators this innovative resource is also appropriate for preservice teachers and preservice higher education faculty

Curriculum Summaries ,1998      *Helping Children Learn Mathematics* Robert E. Reys,Mary Lindquist,Diana V. Lambdin,Nancy L. Smith,2008-12-15 The ninth edition of this best selling elementary math methods textbook continues the rich history of this book with a dash of new breath and a new contemporary design It has been updated to reflect current recommendations readings and practices while maintaining the characteristics and features that have made it a popular choice of instructors This new edition remains an invaluable text for students who are being introduced to teaching elementary mathematics In addition its depth also makes it appropriate for teachers to use as they continue to learn about teaching mathematics Publsiher s website

**Standards-based School Mathematics Curricula** Sharon L. Senk,Denisse R. Thompson,2020-07-24 The Curriculum and Evaluation Standards for School Mathematics published by the National Council of Teachers of Mathematics in 1989 set forth a broad vision of mathematical content and pedagogy for grades K 12 in the United States These Standards prompted the development of Standards based mathematics curricula What features characterize Standards based curricula How well do such curricula work To answer these questions the editors invited researchers who had investigated the implementation of 12 different Standards based mathematics curricula to describe the effects of these curricula on students learning and achievement and to provide evidence for any claims they made In particular authors were asked to identify content on which performance of students using Standards based materials differed from that of students using more traditional materials and content on which performance of these two groups of students was virtually identical Additionally four scholars not involved with the development of any of the materials were invited to write critical commentaries on the work reported in the other chapters Section I of Standards Based School Mathematics Curricula provides a historical background to place the current curriculum reform efforts in perspective a summary of recent recommendations to reform school mathematics and a discussion of issues that arise when conducting research on student outcomes Sections II III and IV are devoted to research on mathematics curriculum projects for elementary middle and high schools respectively The final section is a commentary by Jeremy Kilpatrick Regents Professor of Mathematics Education at

the University of Georgia on the research reported in this book. It provides a historical perspective on the use of research to guide mathematics curriculum reform in schools and makes additional recommendations for further research. In addition to the references provided at the end of each chapter, other references about the Standards-based curriculum projects are provided at the end of the book. This volume is a valuable resource for all participants in discussions about school mathematics curricula, including professors and graduate students interested in mathematics education, curriculum development, program evaluation, or the history of education; educational policy makers; teachers; parents; principals; and other school administrators. The editors hope that the large body of empirical evidence and the thoughtful discussion of educational values found in this book will enable readers to engage in informed civil discourse about the goals and methods of school mathematics curricula and related research.
