Moyen Age Renaibance:

Progress of Medieval and Renaissance Studies in the United States and Canada, 1923 **The Worlds of Petrarch**
Giuseppe Mazzotta, 1993-10-20 At the center of Petrarch's vision announcing a new way of seeing the world was the individual a sense of the self that would one day become the center of modernity as well This self however seemed to be fragmented in Petrarch's work divided among the worlds of philosophy faith and love of the classics politics art and religion of Italy France Greece and Rome In recent decades scholars have explored each of these worlds in depth In this work Giuseppe Mazzotta shows for the first time how all these fragmentary explorations relate to each other how these separate worlds are part of a common vision Written in a clear and passionate style *The Worlds of Petrarch* takes us into the politics of culture the poetic imagination into history and ethics art and music rhetoric and theology With this encyclopedic strategy Mazzotta is able to demonstrate that the self for Petrarch is not a unified whole but a unity of parts and at the same time that culture emerges not from a consensus but from a conflict of ideas produced by opposition and dark passion These conflicts intrinsic to Petrarch's style of thought lead Mazzotta to a powerful rethinking of the concepts of fragments and unity and finally to a new understanding of the relationship between them *A Companion to the Medieval World* Carol Lansing, Edward D. English, 2012-10-11 Drawing on the expertise of 26 distinguished scholars this important volume covers the major issues in the study of medieval Europe highlighting the significant impact the time period had on cultural forms and institutions central to European identity Examines changing approaches to the study of medieval Europe its periodization and central themes Includes coverage of important questions such as identity and the self sexuality and gender emotionality and ethnicity as well as more traditional topics such as economic and demographic expansion kingship and the rise of the West Explores Europe's understanding of the wider world to place the study of the medieval society in a global context *A Cultural History of the Human Body in the Medieval Age* Linda Kalof, 2012-03-01 The Christian Jewish and Muslim communities of medieval Western Europe conceived of the human body in manifold ways The body was not a fixed or unmalleable mass of flesh but an entity that changed its character depending on its age its interactions with its environment and its diet For example a slave would have been marked by her language her name her religion or even by a sign burned onto her skin not by her color alone Covering the period from 500 to 1500 and using sources that range across the full spectrum of medieval literary scientific medical and artistic production this volume explores the rich variety of medieval views of both the real and the metaphorical body *A Cultural History of the Human Body in the Medieval Age* presents an overview of the period with essays on the centrality of the human body in birth and death health and disease sexuality beauty and concepts of the ideal bodies marked by gender race class and age cultural representations and popular beliefs and the self and society *Negotiating Secular and Sacred in Medieval Art* Amanda Luyster, 2017-07-05 Offering original analysis of the convergence between sacred and secular in medieval works of art and architecture this collection explores both the

usefulness and limitations of these terms for describing medieval attitudes The modern concepts of sacred and secular are shown to be effective as scholarly tools but also to risk imposing false dichotomies The authors consider medieval material culture from a broad perspective addressing works of art and architecture from England to Japan and from the seventh to the fifteenth century Although the essays take a variety of methodological approaches they are unified in their emphasis on the continuing and necessary dialectic between sacred and secular The contributors consciously frame their interpretations in terms and perspectives derived from the Middle Ages thereby demonstrating how the present art historical terminology and conceptual frameworks can obscure the complexity of medieval life and material culture The resonance among essays opens possibilities for productive cross cultural study of an issue that is relevant to a diversity of cultures and sub periods

Introducing an innovative approach to the literature of the field this volume complicates and enriches our understanding of social realities across a broad spectrum of medieval worlds American Book Prices Current ,1925 A record of literary properties sold at auction in the United States *Photography and Cultural Heritage in the Age of Nationalisms* Ewa Manikowska,2020-09-08 The second half of the 19th century was a time of extensive political upheaval in central east Europe that saw the negotiation of conflicting territorial claims in the region by the Russian Austrian and Prussian empires The post WW1 settlement gave rise to the formation of the independent nation states of Poland Lithuania Ukraine Latvia and Belarus Less well know is that this same period was also an era of keen photographic activity During this time of empire state and nation building cultural heritage was a potent vehicle and a provider of collective memory and identity This innovative account analyses the relationship between politics history cultural heritage and photography in central east Europe between 1859 and 1945 To understand the work photographs do in the construction of cultural heritage the author analyses a wide range of little known photographic archives created by contemporary professional and amateur photographers Their work was extensively exploited in contemporary debates appearing in albums books journals exhibitions museum exhibits postcards and newspapers aimed at both scientific and popular and national and international publics An extensive analysis of how photographic practices and outcomes were applied borrowed copied appropriated and transmitted shows how photography was used to exert or subvert power on the one hand and as a tool in constructing and negotiating group identities on the other By weaving photography and its patterns of making dissemination and archival survival through major historical narratives this volume reveals the centrality of photography and visual discourse at pivotal moments of modern history Violence and Justice in Bologna Sarah Rubin Blanshei,2018-04-02 This collection of essays offers a unique contribution to the study of violence and justice in a late medieval and early modern Italy by combining a multivocal perspective with a case study focus on the city state of Bologna Drawing on the city s singularly rich archival resources the authors explore various facets of violence ranging from the interpersonal to the less frequently studied typologies of blasphemy rape political rebellion and student brawls and set the institutions of the police and law courts into their socio

political and cultural contexts They also apply a broad variety of quantitative and qualitative approaches processual microhistorical legalism comparative and criminological to their assessments of the procedures and practices of criminal justice and the experiences of violent behavior providing both short term in depth analyses of specific events and over arching reviews of long term trends Bologna itself with its renowned university economic innovations strategic importance as a commercial and cultural crossroads its political volatility and experiments with diverse constitutional structures provides a rewarding laboratory for analyzing changes and continuities in late medieval and early modern violence and justice From these studies emerges a narrative that challenges the traditional portrayal of those periods as eras when brutality and rage were normal in social relations and criminal justice was characterized mainly by punitive strategies of torture and repression
