Offshore Drilling United States. Congress. House. Committee on Natural Resources, 2009 *Offshore Oil Drilling at Santa Barbara* United States. Congress. House. Committee on Interior and Insular Affairs. Subcommittee on Mines and Mining, 1974 *The Legal Regime of Offshore Oil Rigs in International Law* Hossein Esmaeili, 2017-03-02 This book reviews and examines the relevant portions of all international treaties cases and the national law and practice of states in relation to international aspects of offshore oil rigs By doing so it offers an understanding of the legal regime surrounding oil rigs and formulates an international law framework It investigates the issues under consideration by analyzing provisions of international law pertaining to all aspects of oil rigs as well as international treaties and their travaux preparatoires It also examines the national legislation of major offshore oil and gas producers and defines a framework of customary international entities such as the OSPAR and the petroleum industries of certain major offshore oil producers Based upon the book's findings it is clear that in spite of their increasing importance offshore oil installations are subject to fragmentary and vague legal rules under international law *A History of Architectural Modelmaking in Britain* David Lund, 2022-12-16 Architectural modelmakers have long carried out their work hidden behind the scenes of architectural design and in presenting a history of architectural modelmaking in Britain for the first time this book casts a new light on their remarkable skills and achievements By telling the story of the modelmakers who make architectural models rather than architects who commission and use them this book seeks to celebrate their often overlooked contribution to the success and endurance of the architectural model in Britain over the past one hundred and forty years Drawing from extensive archival research and interviews with practicing and retired modelmakers this book traces the complete history of architectural modelmaking in Britain from its initial emergence as a specialist occupation at the end of the nineteenth century through to the present day It reveals the legacy of John Thorp the first professional architectural modelmaker in Britain who opened his business in London in 1883 and charts the lives and careers of the innovative and creative modelmakers who followed him It examines the continually evolving materials tools and processes of architectural modelmaking and outlines the profound ideological economic and technological influences that have shaped the profession's development Illustrated with over one hundred photographs of architectural models from previously undocumented archives this book will be of great interest to architectural modelmakers academics and historians as well as anyone with an interest in architectural history and modelmaking *Federal Register* , 1957 *The ROV HandBook* Giancarlo Icolari, 2018-01-01 It is innate in human being to discover and explore what they do not know and the ocean is one of those The sea covers 71% of the earth's surface We know the five great oceans are Pacific Atlantic Indian Arctic and Antarctic but we know only the 10% of the deep sea and we know less than 10% of the creatures that live there Definitely one of the factors that has played as an antagonist in the knowledge of the sea was the absence of technologies to explore the depths Fortunately in 60 years man has made great strides

managing to get to touch even the deepest point of the abyss the Mariana Trench and this is thanks to modern technology as ROV The ROVs are used in scientific research in the Oil Gas defense research for humanitarian purposes in the construction and maintenance of marine culture such as support to renewable energy nuclear in archeology in the hunt for treasures and openings of sea mines Many people are wondering what ROVs are and what they are used for others are wondering how to become a ROV Operator The purpose of this manual is not only to give an answer to these questions but also to teach future ROV pilots how to become professionals marine robotics

unable to tell us what capital is Liberals and Marxists both think of capital as an economic entity that they count in universal units of utils or abstract labour respectively But these units are totally fictitious Nobody has ever been able to observe or measure them and for a good reason they don't exist Since liberalism and Marxism depend on these non-existing units their theories hang in suspension They cannot explain the process that matters most the accumulation of capital This book offers a radical alternative According to the authors capital is not a narrow economic entity but a symbolic quantification of power It has little to do with utility or abstract labour and it extends far beyond machines and production lines Capital the authors claim represents the organized power of dominant capital groups to reshape or reorder their society Written in simple language accessible to lay readers and experts alike the book develops a novel political economy It takes the reader through the history assumptions and limitations of mainstream economics and its associated theories of politics It examines the evolution of Marxist thinking on accumulation and the state And it articulates an innovative theory of capital as power and a new history of the capitalist mode of power

Geopolitics and Energy Diplomacy in the Caspian Region Yunis Gurbanov, 2024-06-04 Could the Caspian Region replace Russia's or the Persian Gulf's immense energy potential with their energy resources Yunis Gurbanov explores the strategic importance of the region in post-USSR Eurasian policies of major global actors namely China the EU the USA and Russia and examines Azerbaijan's Kazakhstan's and Turkmenistan's oil and gas resources as alternatives to conventional suppliers He shows that the Caspian region's resources could serve as alternative energy sources on a global level mitigating dependence on traditional suppliers and stabilizing energy prices
