Parallel Worlds A Journey Through Creation Higher Dimensions And The Future Of The Cosmos:

Parallel Worlds Michio Kaku, 2005 Sheds new light on discoveries that have revolutionized the field of cosmology and transformed understanding of the universe offering an explanation of the multiverse M theory and its implications in terms of the fate of our own universe

Parallel Worlds Michio Kaku, 2005-01 Parallel Worlds explores the possibility that one day we might be able to make the perilous journey from our universe into another more hospitable one via wormholes and dimensional portals Parallel worlds instead of being a plaything for theoretical physicists may one day be our only salvation In particular according to Einstein's theory black holes may actually be gateways to another universe

Gravity's Arc David Darling, 2007-07-27 Advance Praise for Gravity's Arc A beautifully written exposition of the still mysterious force that holds our universe together and the even more mysterious dark twin that may blow it apart Joshua Gilder coauthor of Heavenly Intrigue A lucid book as up to date as the effect of gravity on the bones of astronauts Denis Brian author of The Unexpected Einstein How did they do it How did one of the greatest geniuses who ever lived retard the study of gravity for 2 000 years How did a gluttonous tyrant with a gold nose revolutionize our view of the solar system How could an eccentric professor shake the foundations of an entire belief system by dropping two objects from a tower How did a falling apple turn the thoughts of a reclusive genius toward the moon And how could a simple patent clerk change our entire view of the universe by imagining himself riding on a beam of light In Gravity's Arc you'll discover how some of the most colorful eccentric and brilliant people in history first locked then unlocked the door to understanding one of nature's most essential forces You'll find out why Aristotle's misguided conclusions about gravity became an unassailable part of Christian dogma how Galileo slowed down time to determine how fast objects fall and why Isaac Newton erased every mention of one man's name from his magnum opus Principia You'll also figure out what Einstein meant when he insisted that space is curved whether there is really such a thing as antigravity and why some scientists think that the best way to get to outer space is by taking an elevator

beginning to accept the possibility of alternate realities and dimensions that warp time and space PSience takes the reader on a journey to where the normal and the paranormal intersect where the known and unknown converge where science greets the supernatural

The God Equation Michio Kaku, 2022-03-29 1 NEW YORK TIMES BESTSELLER The epic story of the greatest quest in all of science the holy grail of physics that would explain the creation of the universe from renowned theoretical physicist and author of *The Future of the Mind* and *The Future of Humanity* When Newton discovered the law of gravity he unified the rules governing the heavens and the Earth Since then physicists have been placing new forces into ever grander theories But perhaps the ultimate challenge is achieving a monumental synthesis of the two remaining theories relativity and the quantum theory This would be the crowning achievement of science a profound merging of all the forces of nature into one beautiful magnificent equation to unlock the deepest mysteries in science What happened before the Big Bang What lies on the other side of a black hole Are there other universes and dimensions Is time travel possible Why are we here Kaku also explains the intense controversy swirling around this theory with Nobel laureates taking opposite sides on this vital question It is a captivating gripping story what s at stake is nothing less than our conception of the universe Written with Kaku s trademark enthusiasm and clarity this epic and engaging journey is the story of *The God Equation*

Chapter 2 Are we only machines There are many phenomena that we encounter almost daily but which do not fit into the current materialistic worldview Such phenomena are often classified as anomalies or parapsychological when it is impossible to explain them with prevailing theories Such phenomena include premonitions intuition telepathy premonition dreams and synchronicity Science seeks to find objective truth but is such a goal even possible After all all objective information is based on subjective observation Robert Jahn and Brenda Dunne founders of the PEAR Princeton Engineering Anomalies Research laboratory which has studied the effect of the mind on matter for decades say Mind without matter leaves us with a world of

ephemeral abstraction matter without mind eliminates the essence of life itself It seems that the transition to the so called post materialistic era is essential We don t have any alternatives if we want to continue our life as humanity on Earth into the future We have to change our thinking It is time to understand our effect on physical reality and move to a new era beyond materialism You exist dive into hyperreality in which you are a significant participant Hyperreality book has been written to everyone seeking for answers about the nature of our reality purpose of everything consciousness and the connection between science and spirituality It may help you to understand phenomena that you earlier have only omitted This book is the answer that Johanna Blomqvist herself wanted to find as a teen when she was contemplating the question of reality why we are here and how should one live About the Author Johanna Blomqvist Ph D is a physicist entrepreneur and internationally published author In her work she combines a wide variety of fields and methods in a unique way often discussing topics from the cutting edge and unconventional areas of science Blomqvist is also a sought after lecturer educator and energy healer Since childhood she has been interested in understanding our reality consciousness and our role in this universe Johanna s first book From Quantum Physics to Energy Healing A Physicist s Journey to Mind and Healing was published on May 2018 She has written also Hyperreality Beyond the Horizon where Physics Meets Consciousness 2021 and The Mystery of Water A Physicist s Dive into Our Deepest Essence Fall 2024 Johanna lives in Helsinki Finland

Quantum Gravity and Its Preponed Birth Dr. Ashok Saxena, Er. Ashwarya Saxena, Er. Amit Saxena, 2023-06-01 The Geometrical string theory TREO MODEL is a compelling theory that challenges our understanding of the universe By introducing energy as the fifth dimension the model transforms the traditional space time continuum into an omnipresent space matrix with three interdependent components Space Time and Energy According to the model the contraction of space causes kinetic energy to erupt and time to slow down As the matrix contracts layer by layer in increasing number of dimensions of Space time it forms the fields of all four basic forces including gravity While the figure on the front cover page suggests that all bodies are pushed equally from all sides to be supported the model proposes that when another body comes into the gravitational field of any body both bodies get inadequate support from the common shared space matrix in between This leads to the falling of bodies towards each other which is perceived as the gravitational attraction of the other body
