Distributed Computing Nancy A. Lynch, Alexander A. Shvartsman, 2010-08-24 This book constitutes the refereed proceedings of the 24th International Symposium on Distributed Computing DISC 2010 held in Cambridge CT USA in September 2010 The 32 revised full papers selected from 135 submissions are presented together with 14 brief announcements of ongoing works all of them were carefully reviewed and selected for inclusion in the book The papers address all aspects of distributed computing and were organized in topical sections on transactions shared memory services and concurrency wireless networks best student paper consensus and leader election mobile agents computing in wireless and mobile networks modeling issues and adversity and self stabilizing and graph algorithms Distributed Computing

Maurice Herlihy, 2000 This book constitutes the refereed proceedings of the 14th International Conference on Distributed Computing DISC 2000 held in Toledo Spain in October 2000 The 23 revised full papers presented together with one invited contribution were carefully reviewed and selected from more than 100 submissions The papers address a variety of current issues in distributed computing including mutual exclusion distributed algorithms protocols approximation algorithms distributed cooperation electronic commerce self stabilizing algorithms lower bounds networking broadcasting Internet services interconnection networks distributed objects CORBA etc **Distributed Computing and Internet Technology**

Günter Fahringer, Sapna Gopinathan, Laxmi Parida, 2019-01-02 This book constitutes the proceedings of the 15th International Conference on Distributed Computing and Internet Technology ICDCIT 2019 held in Bhubaneswar India in January 2019 The 18 full papers and 14 short papers presented together with 5 invited papers were carefully reviewed and selected from 115 submissions The papers present research in three areas distributed computing Internet technologies and societal applications **Web Information Systems and Mining**

Liu Wenyin, Xiangfeng Luo, Fu Lee Wang, Jingsheng Lei, 2009-10-26 Researchers and professionals Temporally Distributed Symptoms in Technical Diagnosis Klaus Nökel, 1991-07-24 Complex machines can fail in complex ways Often the nature of the fault can be determined only through the interpretation of machine behavior over time This book presents a novel approach to the representation and recognition of temporally distributed symptoms Existing diagnostic expert systems usually operate under a set of simplifying assumptions that limit their applicability A common assumption is that the device to be diagnosed has a static behavior with the relation between inputs and outputs constant over time In most realistic application domains this assumption is violated and both the normal intended function of the device and the potential malfunctions are complex behaviors over time This book addresses the problem of systematically treating information about fault symptoms that are spread out over periods of time These symptoms are characterized by a specific order of events and in the general case a single snapshot of the device state does not suffice to recognize the symptoms Instead one has to plan a measurement sequence that consists of several observations at more than one time point Starting with a classification of various types of dynamic faulty behavior the author identifies

temporally distributed systems TDSs and designs a representation language that allows TDSs to be specified in a declarative manner The definition of a successful match of a measurement sequence against a TDS specification is operationalized as an algorithm which plans such an observation sequence based on the TDS specification The author demonstrates that his novel solution is a generic paradigm independent building block for diagnostic expert systems by embedding it into the frameworks of both an associative and a model based diagnostic system The book will be valuable both for researchers working on applications of temporal reasoning and prospective users of technical expert systems

Intelligent Distributed Computing IV Mohammad Essaaidi, Michele Maugeri, Costin Badica, 2010-09-20 The 33 peer reviewed contributions published in this book address a wide range of topics related to the theory and applications of intelligent distributed computing and multi agent systems They cover topics from bio informatics to semantic web services

Connectionism in Context Andy Clark, Rudi Lutz, 2012-12-06 Connectionism in Context aims to broaden and extend the debate concerning the significance of connectionist models The volume collects together a variety of perspectives by experimental and developmental psychologists philosophers and active AI researchers These contributions relate connectionist ideas to historical psychological debates e g over behaviourism and associationism to develop mental and philosophical issues The result is a volume which addresses both familiar but central topics such as the relation between connectionism and classical AI and less familiar but highly challenging topics such as connectionism associationism and behaviourism the distinction between perception and cognition the role of environmental structure and the potential value of connectionism as a means of symbol grounding The nine essays have been written with an interdisciplinary audience in mind and avoid both technical jargon and heavy mathematics

Distributed Computing Andrzej Pelc, 2007-09-07 This book constitutes the refereed proceedings of the 21st International Symposium on Distributed Computing DISC 2007 held in Lemesos Cyprus in September 2007 The 32 revised full papers selected from 100 submissions are presented together with abstracts of 3 invited papers and 9 brief announcements of ongoing works all of them were carefully selected for inclusion in the book The papers cover all current issues in distributed computing theory design analysis implementation and application of distributed systems and networks ranging from foundational and theoretical topics to algorithms and systems issues and to applications in various fields This volume concludes with a section devoted to the 20th anniversary of the DISC conferences that took place during DISC 2006 held in Stockholm Sweden in September 2006

Distributed, High-Performance and Grid Computing in Computational Biology Werner Dubitzky, Assaf Schuster, Peter Sloot, Michael Schroeder, Mathilde Romberg, 2007-01-03 The book constitutes the refereed proceedings of the International Workshop on Distributed High Performance and Grid Computing in Computational Biology GCCB 2006 held in Eilat Israel in January 2007 in conjunction with the 5th European Conference on Computational Biology ECCB 2006 The 13 revised full papers presented were carefully reviewed and selected from many high quality submissions

High Performance Computing - HiPC 2008 P. Sadayappan, Manish

Parashar,Ramamurthy Badrinath,Viktor K. Prasanna,2008-12-17 This book constitutes the refereed proceedings of the 15th International Conference on High Performance Computing HiPC 2008 held in Bangalore India in December 2008 The 46 revised full papers presented together with the abstracts of 5 keynote talks were carefully reviewed and selected from 317 submissions The papers are organized in topical sections on applications performance optimizazion parallel algorithms and applications scheduling and resource management sensor networks energy aware computing distributed algorithms communication networks as well as architecture *Distributed Computing and Internet Technology* Dang Van

Hung,Meenakshi D'Souza,2020-01-01 This book constitutes the proceedings of the 16th International Conference on Distributed Computing and Internet Technology ICDCIT 2020 held in Bhubaneswar India in January 2020 The 20 full and 3 short papers presented in this volume were carefully reviewed and selected from 110 submissions In addition the book included 6 invited papers The contributions were organized in topical sections named invited talks concurrent and distributed systems modelling and verification cloud and grid computing social networks machine learning and mobile networks data processing and blockchain technology and short papers **Distributed Computing** Pierre

Fraigniaud,2005-10-11 This book constitutes the refereed proceedings of the 19th International Conference on Distributed Computing DISC 2005 held in Cracow Poland in September 2005 The 32 revised full papers selected from 162 submissions are presented together with 14 brief announcements of ongoing works chosen from 30 submissions all of them were carefully selected for inclusion in the book The entire scope of current issues in distributed computing is addressed ranging from foundational and theoretical topics to algorithms and systems issues and to applications in various fields

High-Performance Computing and Networking Peter Sloot,Marian Bubak,Alfons Hoekstra,Bob

Hertzberger,1999-03-30 This book constitutes the refereed proceedings of the 7th International Conference on High Performance Computing and Networking HPCN Europe 1999 held in Amsterdam The Netherlands in April 1999 The 115 revised full papers presented were carefully selected from a total of close to 200 conference submissions as well as from submissions for various topical workshops Also included are 40 selected poster presentations The conference papers are organized in three tracks end user applications of HPCN computational science and computer science additionally there are six sections corresponding to topical workshops *Distributed Debugging: An Integrated Approach* Stephen

Lesavich,1991-03-15 The design and development of digital computer software for distributed concurrent programming environments has increased significantly in the past few years The presence of remote processors and concurrency greatly complicates the creation analysis testing and debugging of all software produced for these environments It appears that few tools developed for sequential environments are adequate for debugging software programs in a distributed concurrent environment The distributed concurrent environment also presents the need for special debugging tools that were not needed for sequential environments This research will present a new model for debugging programs in a distributed

concurrent programming environment This new model was used to design develop and implement an integrated cooperating set of concurrent debugging tools The new debugging model and tool set were used in a distributed Concurrent C development environment running under the UNIX operating system and connected by an Ethernet local area network Actual results obtained from using the new debugging scheme and integrated debugging tool set to detect locate and correct software faults in distributed Concurrent C programs are also presented

Internet and Distributed Computing Systems Yang Xiang, Jingtao Sun, Giancarlo Fortino, Antonio Guerrieri, Jason J. Jung, 2018-10-16 This book constitutes the proceedings of the 11th International Conference on Internet and Distributed Computing Systems IDCs 2018 held in Tokyo Japan in October 2018 The 21 full papers presented together with 5 poster and 2 short papers in this volume were carefully reviewed and selected from 40 submissions This conference desired to look for inspiration in diverse areas e g infrastructure and system design software development big data control theory artificial intelligence IoT self adaptation emerging models paradigms applications and technologies related to Internet based distributed systems to develop new ways to design and manage such complex and adaptive computation resources

Network and Traffic Engineering in Emerging Distributed Computing Applications Abawajy, Jemal H., Pathan, Mukaddim, Rahman, Mustafizur, Pathan, Al-Sakib Khan, Deris, Mustafa Mat, 2012-07-31 This book focuses on network management and traffic engineering for Internet and distributed computing technologies as well as present emerging technology trends and advanced platforms Provided by publisher

Distributed Computing Shlomi Dolev, 2006-10-05 This book constitutes the refereed proceedings of the 20th International Symposium on Distributed Computing DISC 2006 The book presents 35 revised full papers together with 1 invited paper and 13 announcements of ongoing works all carefully selected for inclusion in the book The entire scope of current issues in distributed computing is addressed ranging from foundational and theoretical topics to algorithms and systems issues and to applications in various fields

Guide to Reliable Distributed Systems Kenneth P Birman, 2012-01-15 This book describes the key concepts principles and implementation options for creating high assurance cloud computing solutions The guide starts with a broad technical overview and basic introduction to cloud computing looking at the overall architecture of the cloud client systems the modern Internet and cloud computing data centers It then delves into the core challenges of showing how reliability and fault tolerance can be abstracted how the resulting questions can be solved and how the solutions can be leveraged to create a wide range of practical cloud applications The author's style is practical and the guide should be readily understandable without any special background Concrete examples are often drawn from real world settings to illustrate key insights Appendices show how the most important reliability models can be formalized describe the API of the Isis2 platform and offer more than 80 problems at varying levels of difficulty

Formal Methods for Components and Objects Bernhard Beckert, Ferruccio Damiani, Frank S. de Boer, Marcello M. Bonsangue, 2013-01-05 Formal methods have been applied successfully to the verification of medium sized programs in

protocol and hardware design for some time However their application to the development of large systems requires more emphasis on specification modeling and validation techniques supporting the concepts of reusability and modifiability and their implementation in new extensions of existing programming languages like Java This book contains 20 revised papers submitted after the 10th Symposium on Formal Methods for Components and Objects FMCO 2011 which was held in Turin Italy in October 2011 Topics covered include autonomic service component ensembles trustworthy eternal systems via evolving software data and knowledge parallel patterns for adaptive heterogeneous multicore systems programming for future 3D architectures with many cores formal verification of object oriented software and an infrastructure for reliable computer systems
