**Parasite Rex** Carl Zimmer, 2001 *Parasite Rex* Carl Zimmer, 2000 **Science and the Internet** Alan Gross, Jonathan Buehl, 2016-12-05 The essays in *Science and the Internet* address the timely topic of how digital tools are shaping science communication Featuring chapters by leading scholars of the rhetoric of science and technology the volume fills a much needed gap in contemporary rhetoric of science scholarship Overall the essays reveal how digital technologies may both fray the boundaries between experts and non experts and enable more collaborative democratic means of public engagement with science Lisa Ker nen PhD Associate Professor and Director of Graduate Studies Department of Communication University of Colorado Denver *The Mask of the Parasite* Cynthia Damon, 1997 A much needed cultural study of parasitic people in Roman drama politics and society *Making Catfish Bait Out of Government Boys* Claire Strom, 2010 This first full length study of the cattle tick eradication program in the United States offers a new perspective on the fate of the yeomanry in the twentieth century South during a period when state and federal governments were both

increasing and centralizing their authority As Claire Strom relates the power struggles that complicated efforts to wipe out the Boophilus tick she explains the motivations and concerns of each group involved including large and small scale cattle farmers scientists and officials at all levels of government In the remote rural South such as the piney woods of south Georgia and north Florida resistance to mandatory treatment of cattle was unusually strong and sometimes violent Cattle often ranged free and their owners raised them mostly for local use rather than faraway markets Cattle farmers in such areas shows Strom perceived a double threat in tick eradication mandates In addition to their added costs eradication schemes with their top down imposition of government expertise were anathema to the yeomanry s notions of liberty Strom contextualizes her southern focus within the national scale of the cattle industry discussing for instance the contentious place of cattle drives in American agricultural history Because Mexico was the primary source of potential tick reinfestation Strom examines the political and environmental history of the Rio Grande giving the book a transnational perspective Debates about the political and economic culture of small farmers have tended to focus on earlier periods in American history Here Strom shows that pockets of yeoman culture survived into the twentieth century and that these communities had the power to block if only temporarily the expansion of the American state *The Proper Care and Feeding of Zombies* Mac

,2022-08-22 Parasite is a philosophically interesting film because it presents the ethico biological problem of parasitism in a metaphorical and artistic fashion Michel Serres in his book called *The Parasite* holds that parasites are not in fact useless but that they establish communications between different spheres and are thus able to transform large scale organisms Parasites import coincidences activate defence systems and establish new links with the host In this book philosophers explore the film from various angles using the ancient satirist Lucian s *De Parasito* Nietzsche s concept of the vengeance of the weak Dostoyevsky s underground Marxism and many more Parasite Collector Jessica Cohn,2011-01-15 Describes why so many

Kabbalah Hawaiian Kahuna shamanism mystical Christianity and the work of C G Jung In its Native American meaning wetiko is an evil cannibalistic spirit that can take over people s minds leading to selfishness insatiable greed and consumption as an end in itself destructively turning our intrinsic creative genius against our own humanity Revealing the presence of wetiko in our modern world behind every form of destruction our species is carrying out both individual and collective Paul Levy shows how this mind virus is so embedded in our psyches that it is almost undetectable and it is our blindness to it that gives wetiko its power Yet as Levy reveals in striking detail by recognizing this highly contagious mind parasite by seeing wetiko we can break free from its hold and realize the vast creative powers of the human mind Levy explores how artists philosophers and spiritual traditions across the ages have been creatively symbolizing this deadly pathogen of the psyche so as to help us see it and heal it He examines the concept of wetiko as it appears in the teachings of the Kabbalah Hawaiian kahuna shamanism Buddhism and mystical Christianity and through esoteric concepts like egregores demons counterfeiting spirits and psychic vampires He reveals how visionary thinkers such as C G Jung Sri Aurobindo Philip K Dick Colin Wilson Nicolas Berdyaev and Rene Girard each point to wetiko in their own unique and creative way He explores how the projection of the shadow self scapegoating is the underlying psychological mechanism fueling wetiko and examines wetiko in the context of the Covid 19 pandemic showing that we can reframe the pandemic so as to receive the lessons and opportunities embedded in it Revealing how the power of imagination can cure the wetiko mind virus Levy underscores how important it is for each of us to bring forth the creative spirit within us which helps shed the light of consciousness on wetiko taking away its power over us while simultaneously empowering ourselves

**Sybarites** Herbert Dennis Bradley,1929 *People, Parasites, and Plowshares* Dickson D. Despommier,2013-07-16 Dickson D Despommier s vivid visceral account of the biology behavior and history of parasites follows the interplay between these fascinating life forms and human society over thousands of years Despommier focuses on long term host parasite associations which have evolved to avoid or even subvert the human immune system Some parasites do great damage to their hosts while others have signed a kind of peace treaty in exchange for their long lives within them Many parasites also practice clever survival strategies that medical scientists hope to mimic as they search for treatments for Crohn s disease food allergies type 1 diabetes organ transplantation and other medical challenges Despommier concentrates on particularly remarkable and often highly pathogenic organisms describing their lifecycles and the mechanisms they use to avoid elimination He details their attack and survival plans and the nature of the illnesses they cause in general terms enabling readers of all backgrounds to steal a glimpse into the secret work of such effective invaders He also points to the cultural contexts in which these parasites thrive and reviews the current treatments available to defeat them Encouraging scientists to continue to study these organisms even if their threat is largely contained Despommier shows how closer dissection of the substances parasites produce to alter our response to them could help unravel some of our most complex medical conundrums
