Reisner,2014-06-24 The book poetically looks at a few failings and near failings in order to shed some light on the why when and how of failure It defines failure as something rather dramatic that many times has consequences far beyond the

initial happenstance The book is not concerned with human or societal failure It is not concerned with mechanical chemical or electrical failure It is however concerned with personal faltering rather than failure The book is concerned with faltering which is a common thing that happens more frequently than failing Faltering is a wavering or hesitating condition that precludes failure and usually prevents failure Faltering is not always bad It is usually when little problems surface before a big problem happens Faltering most often is a learning situation and should be considered a good thing Thank God people falter before failing
