Parent Child Interaction And Developmental Disabilities Theory Research And Intervention:

Parent-Child Interaction and Developmental Disabilities Kofi Marfo, 1988-06-24 This volume brings together original papers by international scholars and practitioners on the question of the effects of parent interaction with developmentally disabled children The contributors present evidence that the quality of parent child interaction differs in the families of disabled children and that this interaction may make the symptoms more or less pronounced For example a strong pattern of parent child interaction appears to reduce the disability in handicapped children even in cases of Down s Syndrome Many of the chapters pose provocative questions and provide insightful directives for future theorizing and research on family interactions involving developmentally disabled infants and children

Resources in Education , 1998 **The role of parent-child interactions in developmental psychopathology: methodological and intervention challenges and opportunities** Rebecca Pearson, Tamsen Jean Rochat, Bronwyne Coetzee, 2025-03-06 Parenting research has always faced substantial methodological challenges assumptions and stigma limiting understanding and translation to more family centred support In addition the focus of most research has focused on the early years with far less knowledge about the role of parents in pre adolescence adolescence and the transition to adulthood or beyond Parenting work lacks diversity with regards to inclusion across cultural settings and is usually limited to mothers the role of fathers grandparents adoptive and foster parents and step parents is under represented Current advancements in technology and data science as well as cross cohort collaboration enabling pooling of observed parent offspring interaction in larger numbers provides opportunities to bring together new understanding In addition enabling the voice of diverse parents with lived experience throughout the research process will enhance the meaning and interpretation of findings **Issues in the Developmental Approach to Mental Retardation** Robert M. Hodapp, Jacob A. Burack, Edward Zigler, 1995-01-27 Issues in the Developmental Approach to Mental Retardation is one of the first books exclusively devoted to applying the theories findings and approaches used in work with nonretarded children to several types of retarded individuals The editors and contributors define the developmental approach and explore theoretical issues as they relate to retarded populations Problems involving similar sequences of development cross domain relations the environment and motivation are all discussed as is the importance of separating the various etiological groups for research and intervention purposes The contributors also examine the nature of development in specific etiological groups types of retardation that are addressed include cultural familial retardation Down syndrome fragile X syndrome autism and children

with sensory and motor handicaps This significant volume demonstrates how data from nonretarded development can inform work with retarded populations and how findings from children with mental retardation enrich developmental theory
