National Library of Medicine Current Catalog National Library of Medicine (U.S.),1970 First multi year cumulation covers six years 1965 70 **Individuals as Producers of Their Development** Richard M Lerner,Nancy A. Busch-Rossnagel,2013-09-03 Individuals as Producers of Their Development A Life Span Perspective provides an assessment of the usefulness of viewing the individual as an active contributor to his or her development It extends the breadth of organism environment reciprocities beyond those involved with the child and family On the one hand this extension involves a consideration of the role of evolutionary biological processes on the other it pertains to the broader ecology of human development the social network lying outside the family and the physical environmental contexts of development Person context reciprocities linked to variables that may play their greatest role in the extrafamilial context are also considered Variables such as physical attractiveness race and physical handicap are examples of those discussed in this regard Finally because of the greater scope of the analysis a potentially greater data base is examined in a search for documentation of the presence and role of dynamic person context interactions Relations Between the Sexes Robert L. Ping,1979

Schizophrenia Bulletin ,1976 Masculinity and Femininity Janet T. Spence,Robert L. Helmreich,2014-11-06 Many societies assign sharply distinguished roles to men and women Personality differences as well as physical differences between men and women are used to justify these different sex roles and women are seen as more emotionally and interpersonally sensitive than men while men are said to be more competent achievement oriented and assertive than women A widely held view is that not only do men and women differ but that possession of masculine characteristics precludes possession of feminine characteristics This bipolar conception has led to the definition of masculinity and femininity as

opposites Acceptance of this idea has caused social scientists and laypersons to consider men and women who possess cross sex personality characteristics as less emotionally healthy and socially adjusted than those with sex appropriate traits Previous research by the authors and others done almost exclusively with college students has shown however that masculinity and femininity do not relate negatively to each other thus supporting a dualistic rather than a bipolar conception of these two psychological dimensions Spence and Helmreich present data showing that the dualistic conception holds for a large number of groups varying widely in age geographical location socioeconomic status and patterns of interest whose psychological masculinity and femininity were measured with an objective instrument the Personality Attributes Questionnaire devised by the authors Many individuals are shown to be appropriately sex typed that is men tend to be high in masculinity and low in femininity and women the reverse However a substantial number of men and women are androgynous high in both masculine and feminine characteristics while some are not high in either Importantly the authors find that androgynous individuals display more self esteem social competence and achievement orientation than individuals who are strong in either masculinity or femininity or are not strong in either One of the major contributions of the work is the development of a new multifaceted measure of achievement motivation the Work and Family Orientation Questionnaire which can be used successfully to predict behavior in both males and females and is related to masculinity and femininity in both sexes In addition to investigating the correlates of masculinity and femininity the authors attempt to isolate parental factors that contribute to the development of these characteristics and achievement motivation The book includes analyses of data from students on their perception of their parents which enable the authors to examine the influence of parental masculinity and femininity and parental behaviors and child rearing attitudes on the development of masculinity and femininity and achievement motivation characteristics in their children The important implications of these findings for theories of sex roles personality development and achievement motivation are examined *Adolescent Behavior and Society* Rolf Eduard Helmut Muuss,1975 **DHEW Publication** ,1975 New Directions in Sex Research E.

"Daddy's Gone to War" William M. Tuttle Jr.,1993-09-16 Looking out a second story window of her family's quarters at the Pearl Harbor naval base on December 7 1941 eleven year old Jackie Smith could see not only the Rising Sun insignias on the wings of attacking Japanese bombers but the faces of the pilots inside Most American children on the home front during the Second World War saw the enemy only in newsreels and the pages of Life Magazine but from Pearl Harbor on the war with its blackouts air raids and government rationing became a dramatic presence in all of their lives Thirty million Americans relocated 3 700 000 homemakers entered the labor force sparking a national debate over working mothers and latchkey children and millions of enlisted fathers and older brothers suddenly disappeared overseas or to far off army bases By the end of the war 180 000 American children had lost their fathers In *Daddy's Gone to War* William M Tuttle Jr offers a fascinating and often poignant exploration of wartime America and one of a generation's odyssey from childhood to middle age The voices of the home front children are vividly present in excerpts from the 2 500 letters Tuttle solicited from men and women across the country who are now in their fifties and sixties From scrap collection drives and Saturday matinees to the atomic bomb and V J Day here is the Second World War through the eyes of America's children Women relive the frustration of always having to play nurses in neighborhood war games and men remember being both afraid and eager to grow up and go to war themselves Not all were willing to wait Tuttle tells of one twelve year old boy who strode into an Arizona recruiting office and declared I don't need my mother's consent I'm a midget Former home front children recall as though it were yesterday the pain of saying good bye perhaps forever to an enlisting father posted overseas and the sometimes equally unsettling experience of a long absent father's return A pioneering effort to reinvent the way we look at history and childhood *Daddy's Gone to War* views the experiences of ordinary children through the lens of developmental psychology Tuttle argues that the Second World War left an indelible imprint on the dreams and nightmares of an American generation not only in childhood but in adulthood as well Drawing on his wide ranging research he makes the case that America's wartime belief in democracy and its rightful leadership of the Free World as well as its assumptions about marriage and the family and the need to get ahead remained largely unchallenged until the tumultuous years of the Kennedy assassination Vietnam and Watergate As the hopes and expectations of the home front children changed so did their country's In telling the story of a generation Tuttle provides a vital missing piece of American cultural history
