Wilson Ph.D.,2021-04-08 This book is about information ideas and examples of ways every educator can create a learning environment where students succeed and improve each and every day It is a source of learning and guidance for creating goal specific activities and applying the knowledge and wisdom gained from the author s actual experience The book is designed for every superintendent principal and administrator who wants to ensure the best outcomes for students The application of all that is learned from this book will result in every classroom every school making a difference in every child s life There is much to be learned in this book Use it well **Leading Change in Your School** Douglas B. Reeves,2009-04-14 Guiding schools through significant change is one of the toughest challenges educational leaders face but learning from the examples of those who have succeeded can make it less daunting In *Leading Change in Your School* distinguished author and researcher Douglas B Reeves offers lessons learned through his work with educators in thousands of schools around the world and presents real life examples of leaders who have met the challenge of change head on with impressive results for their schools and districts Readers will also find practical resources for engaging their colleagues in change initiatives Expanding on a number of his columns in the journal *Educational Leadership* Reeves offers insights ad recommendations in four areas Creating conditions for change including assessments to determine personal and organizational readiness for change Planning change including cautionary notes about strategic planning Implementing change including the importance of moving from rhetoric to day to day reality and Sustaining change including the need to reorient priorities and values so that individual convenience gives way to a shared sense of the greater good The change leaders both teachers and administrators whose stories Reeves tells come from varied districts but they share a passion for creating schools that work for all students They are Reeves says people like you sharing similar challenges but perhaps with different results *Evidence-based Management of Stroke* José Biller,,José M Ferro,2011-06-01 Winner of a HIGHLY COMMENDED AWARD in the Neurology category of the 2012 BMA Medical Book Competition More than five million people die from stroke each year Stroke is also the leading cause of adult disability affecting over 20 million people worldwide with two thirds of stroke victims left permanently disabled We now know that speed of intervention is critical and patient outcomes are determined by a very narrow therapeutic window during which physicians need to be able

to make their choice of treatment rapidly based on the best evidence available The purpose of this book is to review that evidence for both medical and surgical therapies as well as preventative strategies drawing on the expertise of leading international authorities to distinguish the issues for which there is a consensus on best practice from those for which the evidence remains inconclusive For example for patients with acute ischemic stroke the first choice is intravenous thrombolytic therapy but does a treatment window of 0 3 hours deliver outcomes significantly better than one of 3 4 5 hours Arterial hypertension is the single most important modifiable risk factor for ischemic stroke but what are the effects of blood pressure reduction among acute stroke patients How effective is blood pressure lowering in primary intracerebral hemorrhage What are the arguments in favour of continuation versus temporary discontinuation of antihypertensive therapy immediately after acute ischemic stroke Endovascular procedures carotid angioplasty stenting are increasingly important but what do the data tell us about their safety Or durability How do they compare with carotid endarterectomy The management of unruptured intracranial aneurysms is rife with controversies clip coil wait and watch The authors examine the evidence for and against Other sections examine the impact of various risk factors and special populations A section on stroke after cardiovascular surgeries reviews the incidence and management of stroke following a whole range of procedures Another examines special risks during pregnancy Lastly the book reviews our understanding of childhood stroke and presents current best practice recommendations for this most challenging group of patients

**Hanging Out** Ruth Garner,2002-03-30 There is an unsettledness now in after school childcare The stay at home mom years are largely over Will children even very young children stay home alone or hang out with peers risking loneliness or engaging in problem behavior Will some new form of supervised care emerge The authors in this collection have spent time in community after school programs and have learned what happens there The authors suggest that after school programs can be an important part of a system of childcare as long as we can find ways to build programs for small and scattered populations as well as for densely packed ones and as long as the money to fund programs can be found The money is important Many of the programs discussed in this book are specifically targeted to children from families with low incomes These are the families least likely to be able to pay for care A reader leaves this book with both anxiety and hope about the future of childcare in the United States
