Index Medicus ,1996 **Animal Perception and Literary Language** Donald Wesling,2018-12-26 Animal Perception and Literary Language shows that the perceptual content of reading and writing derives from our embodied minds Donald Wesling considers how humans evolved from animals have learned to code perception of movement into sentences and scenes The book first specifies terms and questions in animal philosophy and surveys recent work on perception then describes attributes of multispecies thinking and defines a tradition of writers in this lineage Finally the text concludes with literature coming into full focus in twelve case studies of varied readings Overall Wesling's book offers not a new method of literary criticism but a reveal of what we all do with perceptual content when we read **The Devil's Captain** Allan Mitchell,2011-05-01 Author of Nazi Paris a Choice Academic Book of the Year Allan Mitchell has researched a companion volume concerning the acclaimed and controversial German author Ernst Jünger who if not the greatest German writer of the twentieth century certainly was the most controversial His service as a military officer during the occupation of Paris where his principal duty was to mingle with French intellectuals such as Jean Cocteau and with visiting German celebrities like Martin Heidegger was at the center of disputes concerning his career Spending more than three years in the French capital

he regularly recorded in a journal revealing impressions of Parisian life and also managed to establish various meaningful social contacts with the intriguing Sophie Ravoux for one By focusing on this episode the most important of J nger s adult life the author brings to bear a wide reading of journals and correspondence to reveal J nger s professional and personal experience in wartime and thereafter This new perspective on the war years adds significantly to our understanding of France s darkest hour

Architecture of Human Living Fascia Jean Claude Guimberteau, Colin Armstrong, 2024-02-21 This unique book illustrates the structure of the fascia in the living human being Dr Guimberteau s photographs provide a detailed account of fascial architecture He is the first person to publish video movies showing the structure of the fascia and how the fascia responds to it The accompanying text explains what the photographs mean clarifies the importance of the fascia and sets out the implications of these findings for everyday therapeutic practice This beautifully illustrated book provides an introduction to Dr Guimberteau s groundbreaking work Based on what can be seen he has developed his own concept of the multifibrillar structural organisation of the body wherein the microvacuole is the basic functional unit His films confirm the continuity of fibres throughout the body thereby seeming to confirm the tensegrity theory which provides the basis of many manual therapy and bodywork teachings His work ties in with that of Donald Ingber on tensegrity within the cytoskeleton and adds to the evidence linking the cytoskeleton to the extracellular matrix as described by James Oschman The book provides for the first time an explanatory introduction and explanation of these theories This material will be highly valued by osteopaths massage therapists chiropractors and others as it provides part of the scientific underpinning of their techniques as well as an explanation of what is happening when they use those techniques to treat their clients So Guimberteau s material confirms what manual therapists already believed but didn t fully understand He has provided an explanation of how fascial layers slide over each other and how adjacent structures can move independently in different directions and at different speeds while maintaining the stability of the surrounding tissues
