Paris Et Ses Provinces Le Defi De La Decentralisation 17701992:

Republicanism in Nineteenth-Century France, 1814–1871 Pamela Pilbeam, 1995-02-27 This book is a fascinating survey of nineteenth century republicanism the first of its kind this century It investigates why it was that although France was one of the first countries in modern Europe to become a republic in 1792 it was nearly a hundred years before a republic was acceptable to the majority Pamela Pilbeam suggests that republicanism was a witch s brew of Enlightenment rationality bloody memories and conflicting socialist expectations The book concludes that the successful republic of 1871 used the rhetoric of democracy to conceal persistent elitism *Aloysius Bertrand's Gaspard de la Nuit Beyond the Prose Poem*

Valentina Gosetti, 2016-03-22 Aloysius Bertrand s *Gaspard de la Nuit* 1842 is a familiar title to music lovers thanks to Ravel s piano work of the same name and to specialists of French literature especially those interested in Baudelaire s prose poetry Yet until very recently the collection and its author have generally been viewed almost exclusively through the prism of their pioneering role in the development of the prose poem By placing Bertrand back in his original context adopting a comparative approach and engaging with recent critical work on the collection Valentina Gosetti proposes a substantial reassessment of *Gaspard de la Nuit* and promotes a new understanding of Bertrand in his own terms rather than those of his successors Through his playful and ironic reinterpretation of Romantic clichés and his overt defiance of the boundaries of poetry and beauty Bertrand emerges as a fascinating figure in his own right This book is one of the first full length studies of Bertrand s work and it will be of particular interest to specialists of the nineteenth century and of provincial literature and to students of nineteenth century poetry or the fantastic **The University and the Teachers** Harry Judge, Michel

Lemosse, Lynn Paine, Michael Sedlak, 1994-01-01 Here is a book for our times a study in three countries of the relationship between teacher education and the universities An Englishman looks at France a Frenchman at the USA and two Americans at England with the whole introduced and rounded off by Harry Judge who was also the interlocutor of France It is a notable addition to the Oxford Studies in Comparative Education John Tomlinson Director of the Institute of Education University of Warwick The Times Educational Supplement this is an outstanding book on several levels it is a worthwhile read for audiences well beyond those directly involved in teacher education It will be of particular interest to researchers and students of comparative education At a time when politicians seem bent on importing educational practices from other countries it reminds us that there are no easy lessons to be learnt through international comparisons and that we cannot suppose that what is identified as good practice in one country can easily be imported elsewhere without taking into account the cultural context within which it is successful Marilyn Osborn University of Bristol Comparative Education The book is beautifully and engagingly written enlivened by the authors efforts to make sense of that which is foreign to their personal educational experiences The narratives are rich in detail and insights about the forms of teacher education and the cultural logic of their suitability The chapters provoke thought experiments of a kind that are suggestive of outcomes for university

based teacher education if reforms currently proposed in one nation prove to be similar to long standing practices in the others Frank B Murray University of Delaware Comparative Education Review The work recorded in this book was undertaken over four years with support from the Spencer Foundation of Chicago and under the direction of Harry Judge of the University of Oxford Michel Lemosse teaches at the University of Nice and Lynn Paine Michael Sedlak at Michigan State University

The Pride of Place Stephane Gerson, 2018-08-06 Nineteenth century France grew fascinated with the local past Thousands of citizens embraced local archaeology penned historical vignettes and monographs staged historical pageants and created museums and pantheons of celebrities St phane Gerson s rich elegantly written and timely book provides the first cultural and political history of what contemporaries called the cult of local memories an unprecedented effort to resuscitate the past instill affection for one s locality and hence create a sense of place A wide range of archival and printed sources some of them untapped until now inform the author s engaging portrait of a little known realm of Parisian entrepreneurs and middling provincials of obscure historians and intellectual luminaries Arguing that the local and modernity were interlaced rather than inimical between the 1820s and 1890s Gerson explores the diverse uses of local memories in modern France from their theatricality and commercialization to their political and pedagogical applications The Pride of Place shows that contrary to our received ideas about French nationhood and centralism the local buttressed the nation while seducing Parisian and local officials The state cautiously supported the cult of local memories even as it sought to co opt them and grappled with their cultural and political implications The current enthusiasm for local memories Gerson thus finds is neither new nor a threat to Republican unity More broadly yet this book illuminates the predicament of countries that like France are now caught between supranational forces and a revival of local sentiments

Place and Locality in Modern France Philip Whalen, Patrick Young, 2014-10-23 Place and Locality in Modern France analyses the significance and changing constructions of local place in modern France Drawing on the expertise of a range of scholars from around the world this book provides a timely overview of the cross disciplinary thinking that is currently taking place over a central issue in French history The contributed chapters address a range of subjects that include the politics of administrative reform decentralization regionalism and local advocacy the role of commerce in engendering narratives and experience of local place the importance of ethnic class gender and race distinctions in shaping local connection and identity the generation and transmission of knowledge about local place and culture through academia civic heritage and popular memory As a reconsideration of the local in French history Place and Locality in Modern France bridges the divide between micro and macro history for all those interested in ideas of locality and culture in modern French and European history

Confluence Sara B. Pritchard, 2011-04-04 Because of its location volume speed and propensity for severe flooding the Rh ne France s most powerful river has long influenced the economy politics and transportation networks of Europe Humans have tried to control the Rh ne for over two thousand years but large scale development did not occur until the twentieth

century The Rhine valley has undergone especially dramatic changes since World War II Hydroelectric plants nuclear reactors and industrialized agriculture radically altered the river as they simultaneously fueled both the physical and symbolic reconstruction of France In *Confluence* Sara B Pritchard traces the Rhine's remaking since 1945 She interweaves this story with an analysis of how state officials technical elites and citizens connected the environment and technology to political identities and state building In the process Pritchard illuminates the relationship between nature and nation in France Pritchard's innovative integration of science and technology studies environmental history and the political history of modern France makes a powerful case for envirotechnical analysis an approach that highlights the material and rhetorical links between ecological and technological systems Her groundbreaking book demonstrates the importance of environmental management and technological development to culture and politics in the twentieth century As Pritchard shows reconstructing the Rhine remade France itself

Printed Matters Malcolm Gee, Tim Kirk, 2017-10-05 This title was first published in 2002 Since the invention of printing in the mid fifteenth century the production distribution and consumption of printed matter have been the principal means through which new ideas and representations have been spread In recent times cultural historians have taken a growing interest in the previously somewhat isolated field of book history shifting the study of printing and publishing into the centre of historical concern This study of print and printing culture has naturally led historians to a concern with its urban context The urban environment was fundamental to the development of printing from the outset since it was in towns that the necessary combination of technical and entrepreneurial competencies were located and where a growing demand for printed texts was to be found Print permeated the urban experience at every level and formed the chief means by which its ideas values and beliefs were exported to the rest of society In this way print promoted the broader urbanisation of society by spreading urban attitudes and ideas beyond the limits of the city It is with the urban cultural environment that this volume is primarily concerned underlining the centrality of printing and publishing to the understanding of urban culture Focusing particularly on post 1800 France and Germany it considers a wide range of printed matter and engages with a number of recurrent historical issues such as the role of printing in urban economies the construction of metropolitan identities and the testing of moral boundaries
