Brodhead, 1990-02-22 In *The School of Hawthorne* Brodhead uses Hawthorne as a prime example of how literary traditions are made not born Under Brodhead's scrutiny the Hawthorne tradition opens out onto a wide array of subjects many of which have received little previous attention He offers a detailed account of Hawthorne's life in American letters showing how authors as varied as Melville Howells James and Faulkner have learned from Hawthorne's model while all the while changing the terms in which he has been read As he traces Hawthorne's continued life among his heirs Brodhead also reflects on the ways in which writers receive and resist official tradition how their work is conditioned by the institutionalized pasts that surround them and how they go about creating new traditions to counter existing ones An important contribution to literary history *The School of Hawthorne* also establishes new ways in which literary history itself can be understood

### **Reading for Realism**

Nancy Glazener, 1997. *Reading for Realism* presents a new approach to U.S. literary history that is based on the analysis of dominant reading practices rather than on the production of texts. Nancy Glazener's focus is the realist novel, the most influential literary form of the nineteenth and twentieth centuries, a form she contends was only made possible by changes in the expectations of readers about pleasure and literary value. By tracing readers' collaboration in the production of literary forms, *Reading for Realism* turns nineteenth-century controversies about the realist romance and sentimental novels into episodes in the history of readership. It also shows how works of fiction by Rebecca Harding Davis, Henry James, Nathaniel Hawthorne, and others participated in the debates about literary classification and reading that in turn created and shaped their audiences. Combining reception theory with a materialist analysis of the social formations in which realist reading practices circulated, Glazener's study reveals the elitist underpinnings of literary realism. At the book's center is the Atlantic group of magazines whose influence was part of the cultural machinery of the Northeastern urban bourgeoisie and crucial to the development of literary realism in America. Glazener shows how the promotion of realism by this group of publications also meant a consolidation of privilege, primarily in terms of class, gender, race, and region, for the audience it served. Thus, American realism, so often portrayed as a quintessentially populist form, actually served to enforce existing structures of class and power.

### **Old England, New England, and the Civil War**

Len Gougeon, 2025-05-01. The first study to document how the Civil War brought about a bitter cultural and political conflict between Great Britain and the United States, a conflict that ignited a global struggle for racial equality and human rights. This study tells for the first time the story of a bitter cultural and political conflict that arose between the leading writers and intellectuals of Great Britain and the United States during the Civil War. The latter were virtually all New Englanders. Ralph Waldo Emerson was a central figure. The British side included such notables as Thomas Carlyle, Matthew Arnold, and John Ruskin. The conflict was focused on the viability of liberal democracy and the notion that all men are created equal. The question was: What type of social, political, and cultural paradigm was best suited to ensure the advancement of civilization, one in which all have equal rights regardless of race or class, or one where a small number of privileged white elites exercise a controlling power? The New Englanders embraced the former, and the British, the latter. The result was a bitter alienation that ignited a global campaign for racial equality and universal human rights.
