and time and who we are with on this strange planet with its soap bubble coating of life The language in use has abetted and accelerated the catastrophic course we daily continue to choose Speaking of Forms of Life shows us why and how this must change It s a crucial revelation that we must heed because our species alone can consider changing course and our species alone must do so Carl Safina MacArthur Fellow Carl Safina Research Chair for Nature and Humanity Stony Brook University Our biosphere is a miracle Communicating the sense of awe and wonder that it instills in many of us is essential to shift from wanton destruction of our natural world for short term economic profit to health and prosperity for all creatures including us humans Speaking of Forms of Life is the first book that unveils how the way we speak to each other affects the way we value and care for our planet An essential read for everyone who cares about the future of nature and humanity Enric Sala National Geographic Explorer in Residence and Hubbard Medalist **The Life of St. Katharine of Alexandria** John Capgrave,1893
