Participation Development And Social Structure An Empirical Study In A Developing Country:

Participation, Development, and Social Structure M. Bazlul Karim, 1994 *Participation, Development and Social Structure* Bazlul M. Karim, 1994-04-26 M Bazlul Karim surveys the problems and prospects of participatory development involving the primarily rural poor in developing countries The case study focuses exclusively on Bangladesh with considerable emphasis on theoretical and comparative analysis as well The author uses Weberian notion of social stratification as the theoretical guidance in examining the nature of inequalities in wealth status and power These stratification variables are examined in depth in regard to various types of participation participation in development programs social participation and political participation International Development Planning Review ,2005 **Nordic Journal of African Studies** ,2003 *Politics In The Rural States* Frank M. Bryan, 2019-07-11 Blind jazz soul musician Ray Charles is an urban black man But when he published the album *Modern Sounds in Country and Western Music* a decade before Watergate he displayed a profound clarity of vision The album s success forewarned a watershed of cultural values that would broadcast a clear message to an urban nation Come back to rural America The paucity of research on rural politics sets the direction of this volume in several ways The book is developed into two parts The first part treats the nation as a whole describing and analyzing 1 the socioeconomic characteristics of those who populate the rural areas of America with some comparison with the same characteristics of urban dwellers 2 the political views and behavior of rural dwellers in juxtaposition to their urban cousins *The Political Economy of Development* Kate Bayliss, Ben Fine, Elisa Van Waeyenberge, 2011-05-06 Any student academic or practitioner wanting to succeed in development studies radical or mainstream must understand the World Bank s role and the evolution of its thinking and activities The *Political Economy of Development* provides tools for gaining this understanding and applies them across a range of topics The research practice and scholarship of development are always set against the backdrop of the World Bank whose formidable presence shapes both development practice and thinking This book brings together academics that specialise in different subject areas of development and reviews their findings in the context of the World Bank as knowledge bank policy maker and financial institution The volume offers a compelling contribution to our understanding of development studies and of development itself The *Political Economy of Development* is an invaluable critical resource for students policy makers and activists in development studies **Advances in Civil Engineering and Building Materials IV** Shuenn-Yih Chang, Suad Khalid Al Bahar, Adel Abdulmajeed M. Husain, Jingying Zhao, 2015-05-06 Covering a wide range of topics *Advances in Civil Engineering and Building Materials IV* presents the latest developments in Structural Engineering Road Bridge Engineering Geotechnical Engineering Architecture Urban Planning Transportation Engineering Hydraulic Engineering Engineering Management Computational Mechanics Construc *Urban Growth and the Circular Economy* S. Syngellakis, J. Melgarejo, 2018-08-29 Presented at the 1st International Conference on Urban Growth and the Circular Economy that was held in Alicante Spain

the papers included in this book focus on the continuing and rapid growth of cities and their regions of influence and how that has led to the need to find new solutions which allow for promoting their sustainable development. The quest for the Sustainable City has until recently focused on the efficient use of resources with the application of technical advances giving rise to the definition of SMART Cities. The economic model emphasised however is still linear in the sense that the design and consumption follows the pattern of extraction of natural resources, manufacturing, product usage and waste disposal. The continuous growth of urban population has recently given rise to the emergence of a new model which responds better to the challenges of natural resource depletion as well as waste management. This model has been called the circular economy. The circular economy is a recent concept based on the reuse of what up to now has been considered wastes, reintroducing them into the productive cycle. The objective of the circular economy is to reduce consumption and achieve savings in terms of raw materials, water and energy, thus contributing to the preservation of resources in order to reach sustainable development. One of the most important of these resources is water, which is becoming a scarce commodity in an ever expanding world whose population demands a better standard of living. Water is required for agricultural purposes as well as by industry in addition to its use by the general population. The recycling of water is an essential component of the circular economy. There is no possibility for the success of a long term economic policy without addressing the problems of natural resources and environmental pollution, which will affect the reuse of materials and products. The current market economy based on a linear model from resource extraction, manufacturing, consumption and waste disposal has not proved a long term suitable solution in spite of the substantial efforts made in reducing its environmental impacts. This is largely due to the continuous population growth in a society that demands high standards of living, thus requiring an ever increasing share of natural resources.

Planning for Ethnic Tourism Li Yang, Geoffrey

Wall, 2016-04-22. Ethnic tourism has emerged as a means that is employed by many countries to facilitate economic and cultural development and to assist in the preservation of ethnic heritage. However, while ethnic tourism has the potential to bring economic and social benefits, it can also significantly impact traditional cultures, ways of life and the sense of identity of ethnic groups. There is growing concern in many places about how to balance the use of ethnicity as a tourist attraction with the protection of minority cultures and the promotion of ethnic pride. Despite the fact that a substantial literature is devoted to the impacts of ethnic tourism, little research has been done on how to plan ethnic tourism attractions or to manage community impacts of tourism. This book addresses the need for more research on planning for ethnic tourism by exploring the status and enhancement of planning strategies for ethnic tourism development. The book develops the case of a well known ethnic tourist destination in China, Xishuangbanna, Yunnan. It analyzes how ethnic tourism has been planned and developed at the study site and examines associated socio-cultural and planning issues. The authors evaluate the perspectives of four key stakeholder groups: the government, tourism entrepreneurs, ethnic minorities and tourists on ethnic tourism.

through on site observation interviews with government officials planners and tourism entrepreneurs surveys of tourists and ethnic minority people and evaluation of government policies plans and statistics This book is unique in its emphasis on planning and in its focus on China rapidly emerging as a major player in tourism with applications for tourism around the world

Women's Work And Child Welfare In The Third World Joanne Leslie,2021-11-18 Recent trends in women s work and child survival and development in developing countries raise concerns about the relationship between these two key elements of development This paper reviews and analyzes the methodology and findings of 50 studies of both women s work and infant feeding practices and women s work and child nutritional status Although the pattern of findings is complex and occasionally contradictory the paper concludes that overall there is little evidence of a negative effect of maternal employment on child nutrition and therefore no justification for limiting women s labor force participation on the grounds of promoting child welfare

Age-related Diseases Through the Lens of Health Economics Lei Si,Mingsheng Chen,Hui Shao,Susmita Chatterjee,2022-01-27

Public Medical Insurance Reforms in China Xinxin Ma,2021-12-11 This book investigates public medical insurance reform in China and studies its effects from both institutional and empirical study perspectives It provides the reader with academic evidence for understanding the transformation of public medical insurance and its effect on the utilization of healthcare services expenditure for medical care individuals financial portfolio allocation and well being The main content of the book comprises two parts First institutional transformations of public medical insurance are considered medical insurance reform in rural and urban China and problems of medical insurance reform in the country Second it looks at the impact of public medical insurance reforms in China evidence based on empirical studies including determinants of participation in medical insurance the New Rural Cooperative Medical Scheme and its effects on the utilization of healthcare services medical insurance and its effects on out of pocket expenditure risky financial market participation and well being in China This study provides academic evidence about these issues based on economic theories and econometric methods using many kinds of nationwide Chinese representative survey data The book is highly recommended to readers who are interested in up to date and in depth empirical studies on the mechanisms of participation in medical insurance and the impact of public medical insurance reforms on individuals and household behaviors in China This volume will be of interest to those who are interested in the Chinese economy social security policymakers and scholars with an econometric analysis background

Sociologie de la Chine et sociologie chinoise ,1989
