Parties and Elections in Corporate America Howard L. Reiter, 1993 **Parties and Elections in Corporate America** Scholargy Publishing, Incorporated, 2002-09-01 Political Parties in Advanced Industrial Democracies Paul Webb, David Farrell, Ian Holliday, 2002-09-26 How relevant and vital are political parties in contemporary democracies Do they fulfill the functions that any stable and effective democracy might expect of them or are they little more than moribund anachronisms relics of a past age of political life now superseded by other mechanisms of linkage between state and society These are the central questions which this book aims to address through a rigorous comparative analysis of political parties operating in the world's advanced industrial democracies Drawing on the expertise of an impressive team of internationally known specialists the book engages systematically with the evidence to show that while a degree of popular cynicism towards them is often chronic though rarely acute parties have adapted and survived as organizations remodelling themselves to the needs of an era in which patterns of linkage and communication with social groups have been transformed This has enabled them to remain central to democratic systems especially in respect of the political functions of governance recruitment and albeit more problematically interest aggregation On the other hand the challenges they face in respect of interest articulation communication and participation have pushed parties into more marginal roles within Western political systems The implications of these findings for democracy depend on the observer's normative and theoretical perspectives Those who understand democracy primarily in terms of popular choice and control in public affairs will probably see parties as continuing to play a central role while those who place greater store by the more demanding criteria of optimizing interests and instilling civic orientations among citizens are far more likely to be fundamentally critical *Comparative Politics* is a series for students and teachers of political science that deals with contemporary issues in comparative government and politics The General Editors are Max Kaase Vice President and Dean of Humanities and Social Sciences International University Bremen and Kenneth Newton Professor of Government at Southampton University The series is published in association with the European Consortium for Political Research **Parties, Elections, and Political Participation in Latin America** Jorge I Dominguez, 2014-02-04 First Published in 1994 This is Volume five of seven of a collection of essays that gathers together scholarly debates from the 1950s to the 1990s on Mexico Central and South America This text looks at topics such as government parties in Latin America the Mexican elections of 1958 political campaigning the scope of the Chilean Party systems the case of Peronism and electoral change amongst others *Collected Writings From Soka University of America* Tim Janakos, Study Material Based On NCERT Social Science Class - X Dr. J. time This volume provides the first account of the political upheavals of the past two decades and speculates on the future of the country's national party system By documenting how parties and voters responded to new challenges between 1993 and 2011 this book sheds light on one of the most tumultuous periods in Canadian political history *Congressional Record* United States. Congress,1999 Dead Center Joe Manchin,2025-09-16 A memoir and a manifesto like no other by a true maverick in American politics With a foreword by Nick Saban Dead Center It is where Senator Joe Manchin III has stood his entire life For him it's where the real solutions lie if we are ever going to tame the anger bitterness intolerance and tribalism that have infected our political system Through 43 years in politics and 15 years in the Senate Joe Manchin has stayed close to his roots basing his principles in when where and how he was raised Treat people with respect Find dignity in work Put people first and country before party Be fiscally responsible and socially compassionate Only vote for what you understand and can explain to your constituents That's it Dead Center is more than Senator Manchin's declaration of independence from the extremes on both sides In this revealing and entertaining memoir Senator Manchin combines eyebrow raising never before told stories from inside the Senate and the White House with insights into how government does or doesn't work A memoir by one of America's most recognized leaders Dead Center offers a path forward from our polarized political gridlock to governance based on what our American founders practiced **Common Sense**

The Origins and Consequences of Congressional Party Election Agendas Scott R. Meinke,2023-02-23 This Element examines congressional party election agendas asking first how they originate and what priorities within the party they strategically represent and second how they shape post election legislative activity and policymaking After surveying post 1980 agenda efforts it focuses on two prominent cases the Republican Contract with America 1994 and the Democratic New Direction for America 2006 Using archived records and other qualitative evidence it shows that both agendas were leadership driven but were developed in lengthy and relatively inclusive processes Quantifying agenda content it demonstrates that the parties strategically skewed agenda promises toward select segments of the caucus as measured in bill introduction priorities and the promises echoed

leadership messaging from speeches and floor motions in the Congress before the election After winning a majority both parties shifted the House s legislative activity sharply toward agenda priorities but the impact on policy outcomes was substantially constrained Parties, Elections and Electoral Contests Marc Guinjoan,2016-05-13 According to the Duvergerian theories in the long run only viable parties are expected to stand for elections Non viable parties should join a pre electoral coalition with another party or withdraw from competition entirely Why then do non viable political parties throughout the world systematically continue presenting candidates This book responds to this evident but unanswered question to create a general theory about deviations from the Duvergerian equilibrium The author argues that far from being just a random or irrational decision the choice of political parties to present candidates when they do not expect to achieve representation can be explained by the overlap of electoral arenas that generate opportunities for viable parties to present candidates where they are non viable In sum political parties will take advantage of their viability in an arena to present candidacies in other arenas where they do not have chances to become viable The building of this new theory on electoral contamination allows the construction of a new and more encompassing conceptual framework through which to make sense of what until now has been understood as disparate phenomena and contributes to a better understanding of political parties strategic behaviour **American Government** Scott F.
