*Partitioned Africans* A. I. Asiwaju, 1985      **Handbook of Africa's International Relations** Tim Murithi, 2013-09-05

Africa's international relations have often been defined and oriented by the dominant international and geopolitical agendas of the day. In the aftermath of colonialism the Cold War became a dominant paradigm that defined the nature of the continent's relationship with the rest of the world. The contemporary forces of globalization are now exerting an undue influence and impact upon Africa's international relations. Increasingly the African continent is emerging as a vocal and in some respects an influential actor in international relations. There is a paucity of analysis and research on this emerging trend. This timely book proposes to fill this analytical gap by engaging with a wide range of issues with chapters written by experts on a variety of themes. The emerging political prominence of the African continent on the world stage is predicated on an evolving internal process of continental integration. In particular there are normative and policy efforts to revive the spirit of Pan Africanism. The 21st century is witnessing the evolution of Pan Africanism notably through the constitution and establishment of the African Union (AU). Given the fact that there is a dearth of analysis on this phenomenon this volume will also interrogate the notion of Pan Africanism through various lenses notably peace and security, development, the environment and trade. The volume will also engage with the emerging role of the AU as an international actor e.g. with regard to its role in the reform of the United Nations Security Council, climate change, the International Criminal Court (ICC), the treaty establishing Africa as a nuclear free zone, Internally Displaced Persons, the Millennium Development Goals (MDGs), international trade, the environment, public health issues, security and development issues. This book will assess how the AU's role as an international actor is complicated by the difficulty of promoting consensus among African states and then maintaining that consensus in the face of often divergent national interests. This book will in part assess the role of the AU in articulating collective and joint policies and in making interventions in international decision and policy making circles. The Handbook will also assess the role of African social movements and their relationship with global actors. The role of African citizens in ameliorating their own conditions is often underplayed in the international relations discourse and this volume will seek to redress this oversight. Throughout the book the various chapters will also assess the role that these citizen linkages have contributed towards continental integration and in confronting the challenges of globalization.

[Germany and Its West African Colonies](#) Wazi Apoh, Bea Lundt, 2013. West African history is usually seen as mainly influenced by English or French colonialism. There is a new interest in German colonialism but most research is done in European archives and with a European point of view. This book explores German colonial exploits and their consequences in Ghana, Togo and Cameroon mostly from an African point of view. By means of research on sites of the colonial hinterland and the agency of entangled

people the book reveals the simmering impact of the past encounters on indigenous religious cultural political and socio economic developments in West Africa Series African Studies Afrikanische Studien Vol 49      **Somali Refugees in the Horn of Africa** Sidney R. Griffiths, 2005-09-30 Africa is a continent gripped by civil wars and widespread famine The causes of many of the continent s problems are deep rooted and can be traced to Africa s colonial past when European powers divided the spoils of the continent into separate sovereign states The African Inheritance examines the effect this balkanization of Africa has had and is having on the political and economic well being of the continent From a brief history of pre colonial Africa and its

subsequent European partition and inevitable decolonization the book discusses the consequences of such an inheritance small and weak states destructive secessionist movements irredentism and African imperialism Attempts to tackle these problems and assert independent development are inhibited by the colonial inheritance      Regionalism in Africa Daniel C Bach,2015-12-22 Africa which was not long ago discarded as a hopeless and irrelevant region has become a new frontier for global trade investment and the conduct of international relations This book surveys the socio economic intellectual and security related dimensions of African regionalisms since the turn of the 20th century It argues that the continent deserves to be considered as a crucible for conceptualizing and contextualizing the ongoing influence of colonial policies the emergence of specific integration and security cultures the spread of cross border regionalisation processes at the expense of region building the interplay between territory space and trans state networks and the intrinsic ambivalence of global frontier narratives This is emphasized through the identification of distinctive threads of regionalism which by focusing on genealogies trajectories and ideals transcend the binary divide between old and new regionalisms In doing so the book opens new perspectives not only on Africa in international relations but also Africa s own international relations This text will be of key interest to students and scholars of African politics African history regionalism comparative regionalism and more broadly to international political economy international relations and global and regional governance      **Rethinking Language and Literature in a Changing World** Genevoix Nana,Andrew Ngeh,2019-08-20 This volume is a blend of language and literature papers highlighting linguistic functionality and topicality in poetry novels translation and education It sheds light on the fictionalised reality of a strained official linguistic cohabitation in Cameroon as instantiated in present day colonial legacy claims It deals with issues of translation as a stylistic exercise whereby the translator has some creativity licence when rendering the source text into the target language thus embracing Skopos theory s view of translation as a purposeful activity determined by the target text and audience This book also looks at an educational conception of translation as opposed to a professional translation curriculum and advocates a comprehensive needs analysis for translator education in the context of translation teaching at the Advanced School of Translators and Interpreters ASTI in Cameroon The chapters also examine teacher and student discourse in the context of English Language teaching in tertiary education in China and pinpoint a dominant teacher s voice made relevant by a Confucian didactic indexicality which appears to be a stumbling block to any dialogic classroom discourse despite a new curriculum promoting communicative language teaching and student centredness This book will appeal to academics in the fields of language and literature in general and in Cameroon and China in particular It will also be a valuable resource for professional translators and those concerned with teaching the subject in academia as it explores a pragmatic conception of translation and envisages it beyond professionalism as an academic field      Conflict Resolution in Africa Francis M. Deng,I. William Zartman,2011-07-01 While dramatic changes are taking place on the international scene and among the major powers Africa continues to suffer from a multitude

of violent conflicts The toll of these conflicts is monumental in terms of war damage to productivity scarce resources diverted to armaments and military organizations and the resulting insecurity displacement and destruction At the same time Africans in response to internal demands as well as to international changes have begun to focus their attention and energies on these problems and are trying innovative ways to resolve differences by nonviolent means The outcomes of these attempts have urgent and complex implications for the future of the continent with respect to human rights principles of democracy and economic development In this book African European and U S experts examine these important issues and the prospects for conflict management and resolution in Africa They review the scholarship in resolution in light of international changes now taking place Addressing the undying internal causes of conflict they question whether global events will promote peace or threaten to unleash even more conflict The authors focus their analysis on the issues involved in African conflicts and examine the areas in need of the most dramatic changes They offer specific recommendations for dealing with current problems but caution that unless policymakers confront the security situation in Africa further destruction to national unity and political and economic stability is imminent Case studies and themes for further long term research are recommended

**Nationalism and African Intellectuals** Toyin Falola, 2004 An examination of the attempt by Western educated African intellectuals to create a better Africa through connecting nationalism to knowledge from the anti colonial movement to the present day This book is about how African intellectuals influenced primarily by nationalism have addressed the inter related issues of power identity politics self assertion and autonomy for themselves and their continent from the mid nineteenth century onward Their major goal was to create a better Africa by connecting nationalism to knowledge The results have been mixed from the glorious euphoria of the success of anti colonial movements to the depressing circumstances of the African condition as we enter a new millennium As the intellectual elite is a creation of the Western formal school system the ideas it generated are also connected to the larger world of scholarship This world is in turn shaped by European contacts with Africa from the fifteenth century onward the politics of the Cold War and the subsequent collapse of the Soviet Union In essence Africa and its elite cannot be fully understood without also considering the West and changing global politics Neither can the academic and media contributions by non Africans be ignored as these also affect the ways that Africans think about themselves and their continent **Nationalism and African Intellectuals** examines intellectuals ambivalent relationships with the colonial apparatus and subsequent nation state formations the contradictions manifested within pan Africanism and nationalism and the relation of academic institutions and intellectual production to the state during the nationalism period and beyond Toyin Falola is the Jacob and Frances Sanger Mossiker Chair in the Humanities and University Distinguished Teaching Professor at the University of Texas at Austin

**Dilemmas of Weak States** Tatah Mentan, 2017-11-30 Given the dramatic changes that have taken place in global politics in recent years especially following September 11 2001 it is time to examine a series of critical issues confronting the global political economy One of the most important of these issues is

terrorism and its relationship with weak states This book examines the weak state terrorism nexus with particular emphasis on Africa Specifically it provides an in depth analysis of state weakness poverty and the opportunities offered by the latter for the breeding of terrorism and terrorists It also looks at the part played by radical Islam in transnational terrorism in Africa Emerging from this study is recognition of a need for the international system to analyze a wide range of issues that contribute to the weakening of African states

**Historical Dictionary of The Gambia** David Perfect,2024-09-23 A former British colony The Gambia became independent in 1965 and has had only three presidents since then While The Gambia remained a very poor country under its first prime minister and then president from 1970 Sir Dawda Jawara democratic institutions survived multi party elections were free and fair and the country s human rights record was excellent In contrast there were seriously flawed elections and extensive human rights abuses under first the Armed Forces Provisional Ruling Council and then President Yahya Jammeh Since Adama Barrow became president in 2017 democratic rule and fair elections have been restored although many challenges remain for example the 2020 Constitution has still not been implemented This book examines all aspects of recorded Gambian history from the 15th century when the first European expeditions arrived to the present Historical Dictionary of The Gambia Sixth Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 1 000 cross referenced entries on important personalities as well as aspects of the country s politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about The Gambia

**The Bengal Borderland** Willem van Schendel,2005 The Bengal Borderland constitutes the epicentre of the partition of British India Yet while the forging of international borders between India Pakistan Bangladesh and Burma the Bengal Borderland has been a core theme in Partition studies these crucial borderlands have remarkably been largely ignored by historians

Region-Building in Africa Daniel H. Levine,Dawn Nagar,2016-05-19 This landmark book is the first of its kind to assess the challenges of African region building and regional integration across all five African sub regions and more than five decades of experience considering both political and economic aspects Leading scholars and practitioners come together to analyze a range of entwined topics including the theoretical underpinnings that have informed Africa s regional integration trajectory the political economy of integration including the sources of different waves of integration in pan Africanism and the reaction to neo liberal economic pressures the complexities of integration in a context of weak states and the informal regionalization that often occurs in borderlands the increasing salience of Africa s relationships with rising extra regional economic powers including China and India and comparative lessons from non African regional blocs including the EU ASEAN and the Southern Common Market A core argument of this book running through all chapters is that region building must be recognized as a political project as much as if not more than an economic one successful region building in Africa will need to include the complex political tasks of strengthening state capacity including states capacity as developmental states that can actively engage in economic planning

resolving long standing conflicts over resources and political dominance improving democratic governance and developing trans national political structures that are legitimate and inclusive      *Nation-states and the Challenges of Regional*

*Integration in West Africa* Siga Fatima Jagne,2010      **The Dissolution of the Colonial Empires** Franz

Ansprenger,2018-05-01 First published in 1989 On the eve of the First World War almost 72 million square kilometres of territory and more than 560 million people were under colonial rule By 1980 the European colonial empires had disappeared from the map Concentrating in particular on the British Commonwealth and the French colonial empire the author shows how economic and political changes in the mother countries the awakening national consciousness of the African and Asian peoples and the effects of two World Wars had all compelled Europe to decolonize He argues that although a satisfactory new order in world politics and the global economy has not been achieved in the process the dissolution of the empires came about with remarkably little bloodshed thereby laying a solid foundation for the future The author concludes by looking at the legacy of the decolonized world in the late 1980s He examines the last bastion of European colonial domination South Africa and discusses the emerging new North South relations      The Gambia-Senegal Border Mariama Khan,2019-05-22 This book interrogates the validity of longstanding claims that Gambians and Senegalese are one people in two countries and explores how that claim intersects with the politics and development needs of the two countries Half a century after independence proponents of Senegambian unification continue to campaign on the basis of the longstanding social cultural and religious ties between Africa s smallest country The Gambia and Senegal the much larger country which almost entirely encircles it The border between the two former British and French colonies remains one of the starkest examples of colonial geographical bartering and it continues to serve a dual function as a bridge and a barrier in the social political and economic relations of the two countries The book investigates how the two states are constantly pulled between impulses of cooperation and de escalation and a competitive intimacy that disregards kinship ties and re activates tensions In particular the book shows how these interstate dynamics play out across the border itself where indigenous ideas of relatedness are reflected in the cross border transport and trade sectors and in the religious networks that straddle the two countries This book s skilful exploration of intersecting macro level and micro level relations in the Senegambia region will be of interest to scholars of African politics regional studies international development and border studies      Africa since Independence Paul Nugent,2012-06-13 An indispensable introductory textbook that provides students with a genuinely comparative study of the different trajectories and experiences of independent African states Paul Nugent explores a range of key concerns including the impact of HIV and AIDS the contagion of warfare and efforts at achieving national reconciliation both in the past and today This is an ideal core text for modules on Modern African History African Politics or Africa since Independence or a supplementary text for broader modules on African History which may be offered at the upper levels of an undergraduate History Politics or African Studies degree In addition it is a crucial resource for students who may be studying modern

African history for the first time as part of a taught postgraduate degree in African History African Politics or African Studies
