Philosophical Applications Of Cognitive Science:

Philosophical Applications Of Cognitive Science Alvin I. Goldman, 1993-04-19 One of the most fruitful interdisciplinary boundaries in contemporary scholarship is that between philosophy and cognitive science Now that solid empirical results about the activities of the human mind are available it is no longer necessary for philosophers to practice armchair psychology In this short accessible and entertaining book Alvin Goldman presents a masterly survey of recent work in cognitive science that has particular relevance to philosophy Besides providing a valuable review of the most suggestive work in cognitive and social psychology Goldman demonstrates conclusively that the best work in philosophy in a surprising number of different fields including philosophy of science epistemology metaphysics and ethics as well as philosophy of mind must take into account empirical breakthroughs in psychology One of those rare texts that will also be useful for professionals Philosophical Applications of Cognitive Science is appropriate for students in a wide range of philosophy courses It will also interest researchers and students in psychology who are intrigued by the wider theoretical implications of their work

Readings in Philosophy and Cognitive Science Alvin I. Goldman, 1993 This collection of readings shows how cognitive science can influence most of the primary branches of philosophy as well as how philosophy critically examines the foundations of cognitive science Its broad coverage extends beyond current texts that focus mainly on the impact of cognitive science on philosophy of mind and philosophy of psychology to include materials that are relevant to five other branches of philosophy epistemology philosophy of science and mathematics metaphysics language and ethics The readings are organized by philosophical fields with selections evenly divided between philosophers and cognitive scientists They draw on research in numerous areas of cognitive science including cognitive psychology developmental psychology social psychology psychology of reasoning and judgment artificial intelligence linguistics and neuropsychology There are timely treatments of current topics and debates such as the innate understanding of number children's theory of mind self knowledge consciousness connectionism and ethics and cognitive science

Metaphysics and Cognitive Science Alvin I. Goldman, Brian P. Goldman and His Critics Brian P. McLaughlin, Hilary Kornblith, 2016-10-17 Goldman and His Critics presents a series of original essays contributed by influential philosophers who critically examine Alvin Goldman's work followed by Goldman's responses to each essay Critiques Alvin Goldman's groundbreaking theories writings and ideas on a range of philosophical topics Features contributions from some of the most important and influential contemporary philosophers Covers Goldman's views on epistemology both individual and social in addition to cognitive science and metaphysics Pays special attention to Goldman's writings on philosophy of mind including the evolution of his thoughts on Simulation Theory ST

The Philosophy and Science of Predictive Processing Dina Mendonça, Manuel Curado, Steven S. Gouveia, 2021 Offering a complete guide to the philosophical implications of Predictive Processing this volume's contributors come from disciplines including philosophy neuroscience and psychology Together they explore the many philosophical applications of Predictive Processing including mental health cognitive science and neuroscience These approaches are brought together by an introduction that provides an outline of this topic suitable for newcomers to the field identifying the nuances of the topic

Consciousness and Intentionality: Models and Modalities of Attribution D. Fiset, 2013-03-14 Philosophy of mind has been one of the most active fields in philosophy for the past three decades One of the most significant factors in the development of this discipline has been the emergence of cognitive science and the interest philosophers have taken in the empirical study of mind Another equally important factor has been the naturalistic turn brought about by W V Quine His proposal that normative epistemology be replaced by empirical psychology marked a radical departure from the Fregean anti psychologism and apriorism that had characterized much of the analytic tradition in philosophy But while Quine's program of naturalization called the attention of philosophers to empirical psychology his conception of psychology was inspired by an austere behaviorism which shunned the mentalism of intentional psychology in the Brentanian and phenomenological tradition Thus while agreeing with Brentano that the intentional idiom could not be reduced to that of the natural sciences Quine argued that it is of a piece with

the indeterminacy of translation Most contributors of this collection share the cognitivist stance and believe that the mind needs to be explained rather than eliminated Three main questions are actually confronting current philosophers of mind each addressed by one or another of the contributors to the present collection
