Rich World, Poor World Ali A. Allawi, 2024-04-23 A landmark history of the

world economic order exploring how developing countries have fought to escape impoverishment Over the past two decades experiments in neoliberal economics have opened up a chasm of inequality between the Global South and the West Development advice from richer nations has led to social upheaval political unrest environmental degradation and even the creation of a new underclass Brutal extremes of wealth and poverty are now commonplace Ali A Allawi traces the evolution of the world economic order from the late imperial era to the present day Shedding light on continuing controversies Allawi shows how the process of development has been hindered at every turn from poor leadership and lost opportunities to widespread corruption In doing so he argues that the current neoliberal consensus is only the most recent of a series of failed policy imperatives Covering issues in the Global South as well as failures in the West this definitive account offers an impassioned and authoritative call for change

Emerging Markets in an Upside Down World Jerome Booth, 2014-06-03

The world is upside down The emerging market countries are more important than many investors realise They have been catching up with the West over the past few decades Greater market freedom has spread since the end of the Cold War and with it institutional changes which have further assisted emerging economies in becoming more productive flexible and resilient The Western financial crisis from 2008 has quickened the pace of the relative rise of emerging markets their relative economic power and with it political power but also their financial power as savers investors and creditors Emerging Markets in an Upside Down World Challenging Perceptions in Asset Allocation and Investment argues that finance theory has misunderstood risk and that this has led to poor investment decisions and that emerging markets constitute a good example of why traditional finance theory is faulty The book accurately describes the complex and changing global environment currently facing the investor and asset allocator It raises many questions often bypassed because of the use of simplifying assumptions and models The narrative builds towards a checklist of issues and questions for the asset allocator and investor and then to a discussion of a variety of regulatory and policy issues Aimed at institutional and retail investors as well as economics finance business and international relations students Emerging Markets in an Upside Down World covers many complex ideas but is written to be accessible to the non expert

The Political Economy Of International Organizations Roland Vaubel, Thomas D Willett, 2019-10-16 The idea for this volume was conceived by Frederick Praeger founder of Westview Press who asked Roland Vaubel if he would put together a collection of chapters on the public choice approach to the study of international organizations Vaubel felt it would be useful to have a coeditor from the United States and Thomas D Willett enthusiastically agreed to take on these duties

Cuba Jorge Salazar-Carrillo, Andro Nodarse-Leon, 2015-10-08 This book is a study of Cuba's economic development under communism over the last fifty five years. The authors find that Cuba's socioeconomic development has gone backward since the Cuban Revolution in 1959. The authors conclude that Fidel Castro's revolution has been an economic disaster for Cuba. The book first outlines Cuba's economic position prior to the revolution. It reviews Cuba's rankings with respect to Gross Domestic Product, GDP per capita in the 1950s and examines the strength of pre-Castro Cuba's foreign reserves and the health of its monetary system. It also presents pre-Castro Cuba's investments in health care and education and documents the island's development potential in the 1950s. The last few chapters describe the precipitous decline in all of these areas of Cuba's economy under Castro. Despite the socioeconomic catastrophe of the Castro years, the authors envision a post-Castro Cuba where this book can provide a benchmark to measure the developmental success that the Cuban work ethic and entrepreneurial spirit can generate in a free market system.

Knowledge and Incentives in Policy Stefanie Haefele, 2018-06-04 The relative effectiveness of various institutions such as the market or government is based on the ability for individuals to access and use dispersed knowledge in society and the incentives that steer their actions. Market process theory emphasizes the effectiveness of the price system to consolidate and transmit knowledge in the marketplace. Together, this framework provides new insights on the capability of individuals to cooperate and improve society and the limits to government interventions in society. The original research in each chapter uses this economic way of thinking to analyze a variety of public policy issues, examining the incentives responsible for and the factors that contribute to the creation and effectiveness of the policies. These chapters, authored by public policy practitioners and researchers, tackle such pressing issues as public education, the process for approving medical devices, tax policy, and land use regulation.

Human Rights in a Divided World David Hollenbach, 2024-07-01 An astute case for Catholic engagement with human rights for all. Human rights should protect the dignity and well-being of all people. But in today's deeply divided world, some argue that cultural differences and economic inequality undermine their universality. In *Human Rights in a Divided World*, David Hollenbach offers a comprehensive and cohesive analysis of the challenges to human rights, suggesting that today's global realities call for important developments rooted in Catholic ethics. This work of theological social ethics draws on a range of disciplines to address the question of whether or not human rights remain valid as universal standards for action in a multicultural, religiously pluralistic, and economically unequal world. Hollenbach provides a compelling account of the contribution that Catholic ethics and practice make to an unequal world. He applies the proposed understanding of human rights to several issues that are much debated today, including religious freedom, the rights of refugees and other forced migrants, economic rights in the face of significant inequality, and the rights of women. *Human Rights in a Divided World* offers a clear path forward for the church in its engagement with politics and guidance for students of human rights as well as those working to advance them.

The Politics of Global Debt Stephen P. Riley, 2016-07-27 The Politics of Global Debt

is a detailed political analysis of the origins and consequences of the global debt crisis which emerged in the early 1980s. It assesses both imperialist and New Right interpretations of the crisis and also presents a series of case studies of the effects of external debt upon Africa, Latin America, Eastern Europe and Asia. The book focusses upon the sovereign debt of states and its management and examines the ways in which global economic structures, inefficient policies, weak institutions and corrupt political leaders contribute to a global debt crisis which has both international and domestic roots. [The Battle for Asia](#)

Mark T. Berger, 2004-03-01 Asia has long been an ideological battleground between capitalism and communism, between nationalism and Westernisation and between the nation state and globalization. This book is a history of the Asian region from 1945 to the present day which delineates the various ideological battles over Asia's development. Subjects covered include theories of development, decolonization, US political and economic intervention, the effects of communism, the end of the Cold War, the rise of neo liberalism, Asia after the crisis, Asia in the era of globalisation. Broad in sweep and rich in theory and empirical detail, this is an essential account of the growth of Asian miracle and its turbulent position in the global economy of the twenty first century. **The Road from Mont Pèlerin**

Philip Mirowski, Dieter Plehwe, 2009-06-19 What exactly is neoliberalism and where did it come from? This volume attempts to answer these questions by exploring neoliberalism's origins and growth as a political and economic movement. The Road from Mont Pèlerin presents the key debates and conflicts that occurred among neoliberal scholars and their political and corporate allies regarding trade unions, development, economics, antitrust policies and the influence of philanthropy. **Rivalry And Cooperation In The Asia-Pacific: The Dynamics Of A Region In Transition (In 2 Volumes)**

Mark Beeson, 2019-09-23 Rivalry and Cooperation in the Asia Pacific provides a comprehensive and accessible introduction to the most important strategic and economic region in the world. Asia Pacific is a region that is undergoing a major transformation, largely as a consequence of the rise of China and its growing rivalry with the United States. Whatever happens in the Asia Pacific will profoundly influence global events, not just regional ones. Looking ahead, the region's future direction and even its name is contested and uncertain. This two volume reference work by one of the world's leading analysts of regional affairs places these events in historical context and considers what they may mean for future political, economic and strategic relations. By focusing on the United States, China and the region's most significant middle powers, the book explains why and how the Asia Pacific has become the fulcrum of international events. *Global Marshall Plan*

James A. Yunker, 2014-08-14 Today's foreign aid programs are small scale because of the widespread belief that they are ineffective. This could be an example of a self fulfilling prophecy: small scale virtually guarantees ineffectiveness. However, the pervasive contemporary pessimism regarding global economic inequality is most likely unfounded. The research described in this book suggests that a properly designed and sufficiently massive economic development assistance project, a Global Marshall Plan, could tremendously reduce the economic gap between the richest and poorest nations within a 50 year planning period. Enrichment of the poor nations would not entail impoverishment of the rich.

nations The actual cost of the GMP program to the populations of the rich nations would be a very slight and virtually unnoticeable reduction in the rate of growth of their living standards The model incorporates features suggested by the skeptical literature on foreign aid and it is shown that if certain key parameter values are sufficiently adverse the GMP would indeed be ineffective However extensive sensitivity analysis demonstrates that the optimistic benchmark results are robust against wide variations in the numerical values of most model parameters The fundamental policy implication of this research is that only an actual real world experiment with a Global Marshall Plan could reliably determine whether or not it would be successful

The Classical Liberal Case for Israel Walter E. Block, Alan G. Futerman, 2021-11-02 This book offers a unique perspective on the State of Israel based on classical liberalism both on a historical and theoretical level Specifically it makes a classical liberal and libertarian analysis based upon homesteading and private property rights to defend the State of Israel As such this work explores the history of the Jewish State both to provide a positive case for its right to exist and to clarify the myths surrounding its origin and development At the same time it deals with other relevant related subjects such as the complex situation between Israel and the Palestinian Arabs the military campaigns against the Jewish State the connection between anti Zionism and anti Semitism and Israel's economic miracle The thorough analysis presented in this work intends to show not only why the voices and movements against Israel are wrong including the Boycott Divestment and Sanctions movement BDS but more importantly why Israel is an example of human flourishing and freedom that every advocate for liberty should celebrate The Classical Liberal Case for Israel makes the practical and moral case for Israel It is based on truths and facts that need to be repeated over and over Block Futerman understand that the only way to defeat a big lie is with a big truth Benjamin Netanyahu Prime Minister of the State of Israel Jerusalem Israel Classical Liberalism often associated with the spread West from Northern Europe in creating free nations is argued here as applying to Israel with ancient roots in the principles of human freedom Vernon L Smith Ph D Nobel Prize in Economic Sciences 2002 and Professor George L Argyros Endowed Chair in Finance and Economics Professor of Economics and Law Smith Institute for Political Economy and Philosophy at Chapman University
