Heinlein George Edgar Slusser,1977-05-01 Dr Slusser charts the course of Heinlein s development as a writer from his days as a pulp hack to his enshrinement as a hero of the counter culture *The Classic Years of Robert A. Heinlein* George Edgar Slusser,1977-01-01 Slusser examines Heinlein s classic years from the publication of his first story Life Line in 1939 to The Moon is a Harsh Mistress *The Pleasant Profession of Robert A. Heinlein* Farah Mendlesohn,2019-03-07 Robert A Heinlein began publishing in the 1940s at the dawn of the Golden Age of science fiction and today he is considered one of the genre s big three alongside Arthur C Clarke and Isaac Asimov His short stories were instrumental in developing its structure and rhetoric while novels such as Stranger in a Strange Land and Starship Troopers demonstrated that such writing could be a vehicle for political argument Heinlein s influence remains strong but his legacy is fiercely contested His vision of the future was sometimes radical sometimes deeply conservative and arguments have flared up recently about which faction has the most significant claim on his ideas In this major critical study Hugo Award winner Farah Mendlesohn carries out a close reading of Heinlein s work including unpublished stories essays and speeches It sets out not to interpret a single book but to think through the arguments Heinlein made over a lifetime about the nature of science fiction about American politics and about himself The Work of Robert Reginald Michael Burgess,1992-01-01 A bibliography of science fiction and fantasy writer editor and publisher Robert Reginald with an introduction by William F Nolan and an Afterword by Jack Dann

Science Fiction and the Dismal Science Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-12-10 Despite the growing importance of economics in our lives literary scholars have long been reluctant to consider economic issues as they examine key texts This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics with some attention to related fields such as politics and government Its seventeen contributors include five award winning scholars five science fiction writers and a widely published economist Three topics are covered what noted science fiction writers like Robert A Heinlein Frank Herbert and Kim Stanley Robinson have had to say about our economic and political future how the competitive and ever changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today and how the scholars who examine science fiction have themselves been influenced by the economics of academia Although the essays focus primarily on American science fiction the traditions of Russian and Chinese science fiction are also examined A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject

Not So Fast Doug Hill, 2016 There s a well known story about an older fish who swims by two younger fish and asks How s the water The younger fish are puzzled What s water they ask Many of us today might ask a similar question What s technology Technology defines the world we live in yet we re so immersed in it so encompassed by it that we mostly take it for granted Seldom if ever do we stop to ask what technology is Failing to ask that question we fail to perceive all the ways it might be shaping us Usually when we hear the word technology

we automatically think of digital devices and their myriad applications As revolutionary as smartphones online shopping and social networks may seem however they fit into long standing deeply entrenched patterns of technological thought as well as practice Generations of skeptics have questioned how well served we are by those patterns of thought and practice even as generations of enthusiasts have promised that the latest innovations will deliver us soon to Paradise We're not there yet but the cyber utopians of Silicon Valley keep telling us it's right around the corner What is technology and how is it shaping us In search of answers to those crucial questions Not So Fast draws on the insights of dozens of scholars and artists who have thought deeply about the meanings of machines The book explores such dynamics as technological drift technological momentum technological disequilibrium and technological autonomy to help us understand the interconnected interwoven and interdependent phenomena of our technological world In the course of that exploration Doug Hill poses penetrating questions of his own among them Do we have as much control over our machines as we think And who can we rely on to guide the technological forces that will determine the future of the planet *Up Your Asteroid!* C. Burgess,1996-01-01 An Annotated Bibliography of the First 300 Publications of the Borgo Press 1975 1998 **Invented Religions** Carole M. Cusack,2016-05-06 Utilizing contemporary scholarship on secularization individualism and consumer capitalism this book explores religious movements founded in the West which are intentionally fictional Discordianism the Church of All Worlds the Church of the SubGenius and Jediism Their continued appeal and success principally in America but gaining wider audience through the 1980s and 1990s is chiefly as a result of underground publishing and the internet This book deals with immensely popular subject matter Jediism developed from George Lucas Star Wars films the Church of the Flying Spaghetti Monster founded by 26 year old student Bobby Henderson in 2005 as a protest against the teaching of Intelligent Design in schools Discordianism and the Church of the SubGenius which retain strong followings and participation rates among college students The Church of All Worlds focus on Gaia theology and environmental issues makes it a popular focus of attention The continued success of these groups of Invented Religions provide a unique opportunity to explore the nature of late post modern religious forms including the use of fiction as part of a bricolage for spirituality identity formation and personal orientation *Masterplots* FRANK N. (ED.) MAGILL,1996 **The Real Jesus Myth** Rev. Bill Musselwhite,2013-12-13 The Real Jesus Myth is what happens when a retired but still cynical journalist who is also a retired but still cynical Anglican priest decides to answer some of the questions tossed at him about the Christian Faith Many people don t know enough about the nuts and bolts of Christian belief doctrine to use an unpopular word This isn t their fault most mainline churches put social justice issues front and centre while doctrine evangelism and apologetics gather dust in the rear pews This may be one reason so many mainline churches are scrambling to stay afloat and if so why it s long past time to re emphasize the fundamentals of the Faith The Real Jesus Myth is a fairly orthodox look at the Christian Faith centered around the Nicene Creed and bookended by comments on everything from why the bible is God s word to why orthodoxy isn t as scary as you may think It is written both for Christians and for the curious non Christian but one caution the author is an ex columnist and police reporter not a theologian so don t expect this to read like a textbook **Literature Suppressed on Social Grounds** Dawn B. Sova,2014-05-14 Literature Suppressed on Social Grounds Revised Edition discusses writings that have been banned over the centuries because they offended or merely ignored official truths challenged widely held assumptions or contained ideas or language unacceptable to a state religious institution or private moral watchdog The entries new to this edition include the Captain Underpants series We All Fall Down by Robert Cormier and Jake and Honeybunch Go to Heaven by Margaret Zemach Also included are updates to the censorship histories of such books as To Kill a Mockingbird and Of Mice and Men
